With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our H31-341_V2.5-ENU experts deem it impossible to drop the exam, if you believe that you have learnt the contents of our H31-341_V2.5-ENU study guide and have revised your learning through the H31-341_V2.5-ENU Practice Tests. If you still fail to pass the exam, you can take back your money in full without any deduction. Such bold offer is itself evidence on the excellence of our products and their indispensability for all those who want success without any second thought.

H31-341_V2.5-ENU questions & answers are valid, covering the whole chapter in the actual test and the key points. You can take H31-341_V2.5-ENU pdf torrent as your study reference. After you get the H31-341_V2.5-ENU exam dumps, do not worry about the update, because one year free update is provided to you. Please pay attention to your payment email and check if there is any H31-341_V2.5-ENU Updated Dumps. Dear, if you have any questions about H31-341_V2.5-ENU study torrent, you can contact us by email or online chat as you like. In addition, we have money back guarantee, in case of failure, we will give you full refund.

H31-341_V2.5-ENU Exam Preparatory: HCIP-Transmission V2.5 & H31-341_V2.5-ENU Test Questions

Do you feel bored about current jobs and current life? Go and come to obtain a useful certificate! H31-341_V2.5-ENU study guide is the best product to help you achieve your goal. If you pass exam and obtain a certification with our H31-341_V2.5-ENU study materials, you can apply for satisfied jobs in the large enterprise and run for senior positions with high salary and high benefits. Excellent Huawei H31-341_V2.5-ENU Study Guide make candidates have clear studying direction to prepare for your test high efficiently without wasting too much extra time and energy.

Huawei HCIP-Transmission V2.5 Sample Questions (Q108-Q113):

NEW QUESTION # 108

OTuk_LOM is an alarm indicating that the frame alignment signal (FAS) is abnormal. This alarm occurs when the frame alignment processing is out of frame (OOF) for three consecutive milliseconds.

- A. TRUE

- B. FALSE

Answer: B

Explanation:

OTUk_LOM (Loss of Multiframe) alarm is generated when frame alignment is lost; however, the statement that it occurs when the Frame Alignment Signal (FAS) is Out of Frame (OOF) for three consecutive milliseconds is false. The actual time threshold differs slightly according to standards and vendor implementations. HCIP-Transmission clarifies these alarm thresholds and conditions to ensure precise timing in fault detection, avoiding false alarms while providing timely notifications for network maintenance.

NEW QUESTION # 109

Which of the following descriptions about the TMK1UNS5 board is wrong?

- A. Support the transmission of OTN services whose total bandwidth does not exceed 200 Gbit/s.
- B. This board belongs to the unified line board, and the current version supports mixed transmission of OTN service, SDH service and packet service.
- C. It supports relay mode, which can be used in the electrical relay station in the system to realize the electrical relay function of the corresponding optical signal.
- D. Support mixed transmission of ODU0, ODU1, ODU2, ODU2e, ODU3, ODU4, ODUflex.

Answer: D

NEW QUESTION # 110

In an OA-free system, the lower threshold of the receive optical power of a line board or the WDM side of an OTU board is the optical module's receiver sensitivity plus 3 dB.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

In OA-free systems, where no optical amplifiers are used, the lower threshold of the receive optical power of a line board or the WDM side of an OTU board is indeed the optical module's receiver sensitivity plus 3 dB.

This ensures a safety margin for stable signal reception and alarm triggering. Without optical amplifiers, signal levels are more susceptible to attenuation, so maintaining this margin helps prevent degradation due to low optical power. HCIP-Transmission highlights this threshold as a standard parameter for optical power management in non-amplified systems.

NEW QUESTION # 111

When configuring i Ethernet Layer 2 attributes, when the "TAG ID" is set to "Access" or "Hybrid", you need to set the "Default VLAN ID" and "VLAN Priority" of untagged frames. "VLAN Priority" should be set according to the unified QoS plan.

- A. True
- B. False

Answer: A

NEW QUESTION # 112

On the network management system, the network element performance monitoring time is set to () minutes and () hours.

- A. 15.12
- B. 30.24
- C. 30.12
- D. 15.24

Answer: D
