

H35-210_V2.5 Exam Collection Pdf - H35-210_V2.5 Test Prep

BONUS!!! Download part of ExamTorrent H35-210_V2.5 dumps for free: https://drive.google.com/open?id=1Dnn_tojfk_-YbgRxwnQLIEkfj8exH6c6

ExamTorrent ensures your success with money back assurance. There is no chance of losing the exam if you rely on ExamTorrent's H35-210_V2.5 Study Guides and dumps. If you do not get through the exam, you take back your money. The money offer is the best evidence on the remarkable content of ExamTorrent.

Huawei H35-210_V2.5 (HCIA-Access V2.5) Exam is an essential certification for ICT professionals who specialize in access network technologies. H35-210_V2.5 exam is designed to validate an individual's knowledge and skills in this field, and equip them with the necessary expertise to succeed in their career. With the Huawei H35-210_V2.5 Exam, individuals can enhance their career prospects, and become a valuable asset to any organization in the ICT industry.

Huawei H35-210_V2.5 Test Prep - H35-210_V2.5 Valid Test Blueprint

H35-210_V2.5 exam materials provide you the best learning prospects, by employing minimum exertions through the results are satisfyingly surprising, beyond your expectations. Despite the intricate nominal concepts, H35-210_V2.5 exam dumps questions have been streamlined to the level of average candidates, pretense no obstacles in accepting the various ideas. The combination of

H35-210_V2.5 Exam Practice software and PDF Questions and Answers make the preparation easier and increase the chances to get higher score in the H35-210_V2.5 exam.

Huawei H35-210_V2.5 (HCIA-Access V2.5) Certification Exam is a professional-level certification exam offered by Huawei to IT professionals who want to specialize in network access technologies. HCIA-Access V2.5 certification exam is designed to validate an individual's knowledge and skills in configuring and managing access networks using Huawei products and technologies. H35-210_V2.5 Exam covers a range of topics, including network security, WLAN planning and design, network troubleshooting, and network management.

Huawei HCIA-Access V2.5 Sample Questions (Q17-Q22):

NEW QUESTION # 17

If a PON system is considered as a black box, the external interfaces of OLTs and ONU are mainly Ethernet interfaces, and GEM encapsulation and decapsulation are performed inside the PON system.

- A. TRUE
- B. FALSE

Answer: A

Explanation:

In a PON system, the OLT (Optical Line Terminal) and ONU (Optical Network Unit) use Ethernet interfaces externally to connect to the service provider's network and end-user devices, respectively. Internally, the PON uses GEM (GPON Encapsulation Method) frames to encapsulate and decapsulate data for transmission over the optical distribution network (ODN).

NEW QUESTION # 18

Which of the following statements is correct?

- A. The LAN Switch may not recognize the MAC address, but must recognize the IP address.
- B. LAN Switch is mainly to find the corresponding IP address according to the MAC address of the data packet to realize the forwarding of the data packet.
- C. Compared with shared Hub, a port of LAN Switch can be said to be a separate conflict domain.
- D. When the LAN Switch receives a data packet containing an unrecognized MAC address, it sends the data packet directly back from the received port.

Answer: C

NEW QUESTION # 19

Vectoring is classified only as system-level vectoring (SLV) and node-level vectoring (NLV) based on system architectures.

- A. FALSE
- B. TRUE

Answer: A

Explanation:

* Vectoring Classification :

* Vectoring is primarily classified into two types based on the scope of crosstalk cancellation:

* System-Level Vectoring (SLV) : Applies to all lines within a single DSLAM or cabinet.

* Node-Level Vectoring (NLV) : Applies to lines across multiple DSLAMs or nodes.

* However, these are not the only classifications. Other implementations, such as hybrid approaches, may also exist depending on the network design.

* Why FALSE?

* The statement incorrectly claims that vectoring is classified only as SLV and NLV, ignoring other possible implementations or variations.

Thus, the correct answer is B .

References:

* HCIA Huawei ACCESS Official Documentation , Chapter: VDSL2 Vectoring Architectures.

* ITU-T G.993.5 Standards for Vectoring in VDSL2 .

NEW QUESTION # 20

Is the following description correct? EPON data packets are variable length. The GPON downstream frame is of fixed length.

- A. False
- **B. True**

Answer: B

NEW QUESTION # 21

Which of the following statements about IP routes are correct?

- **A. IP routes are used to guide IP packet forwarding.**
- B. Routing is a concept at the second layer of the OSI model.
- C. Any route must contain the following information: source address, destination address, and next hop.
- D. In a LAN, a route consists of the following parts: IP address and MAC address.

Answer: A

Explanation:

Let us analyze each option:

* Option A : Incorrect. A route does not include MAC addresses. It typically consists of a destination network, subnet mask, next-hop address, and outgoing interface.

* Option B : Correct. IP routes are essential for guiding the forwarding of IP packets from the source to the destination. Routers use routing tables to determine the best path for packet delivery.

* Option C : Incorrect. Routing is a concept at the network layer (Layer 3) of the OSI model, not the data link layer (Layer 2).

* Option D : Incorrect. A route does not require the source address. It only needs the destination network, subnet mask, and next-hop information.

Thus, the correct answer is B .
