So that customers can prepare according to the latest Salesforce Health Cloud Accredited Professional (Health-Cloud-Accredited-Professional) exam content and pass it with ease.

Salesforce Health Cloud Accredited Professional Sample Questions (Q80-Q85):

NEW QUESTION # 80

A payer is implementing Health Cloud and wants to leverage predefined rules for its prior authorization request review process. The payer would like to leverage out-of-the-box Health Cloud functionality to drive speed to value. Which prebuilt feature should a consultant recommend the payer leverage?

- A. OmniScript Templates
- **B. Expression Set Templates**
- C. FlexCards
- D. Integration Procedures

Answer: B

Explanation:

For a payer implementing Health Cloud, leveraging predefined rules for prior authorization reviews can significantly improve efficiency and speed. Salesforce Health Cloud provides Expression Set Templates as an out-of-the-box feature to achieve this.

* Predefined Rules:

* Expression Set Templates come with prebuilt rule sets that can evaluate conditions, making them ideal for automating prior authorization request reviews.

* Customizable Logic:

* While they provide predefined logic, templates can also be customized to align with specific payer policies or regulatory requirements.

* Faster Implementation:

* Using out-of-the-box templates accelerates time-to-value, as they require minimal configuration compared to building rules from scratch.

* A. Integration Procedures: Focuses on data integration and server-side processing but does not address predefined rules for authorization reviews.

* C. FlexCards: Provides UI components for displaying information but does not support rule evaluation.

* D. OmniScript Templates: Useful for guided workflows but not specifically for predefined rule management.

Expression Sets in Salesforce Health Cloud

NEW QUESTION # 81

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two permission set licenses should the consultant assign to the users to give them access to Health Cloud?

- **A. Health Cloud permission set license**
- B. Health Cloud Platform permission set license
- C. Health Cloud Foundation permission set license

- D. Health Cloud Standard permission set license

Answer: A,D

Explanation:

The users need both the Health Cloud permission set license and the Health Cloud Standard permission set license to access Health Cloud features. The Health Cloud Foundation permission set license is for users who only need access to the Health Cloud data model, and the Health Cloud Platform permission set license is for users who need access to the Health Cloud Lightning components³.

NEW QUESTION # 82

Prior to go-live for Bloomington Caregivers, a consultant loads the future system users into Salesforce.

Which two out-of-the-box permission sets should the consultant assign to the users to give them access to Health Cloud?

Choose 2 answers

- A. Health Cloud Standard
- B. Health Cloud User
- C. Health Cloud Platform permission set license
- D. Health Cloud permission set license
- E. Health Cloud Foundation

Answer: C,D

NEW QUESTION # 83

Which three actions can providers take with the help of the Contact Tracing feature in Health Cloud? (Choose three.)

- A. Perform contact tracing of their patients during an infectious disease outbreak or pandemic.
- B. Track the location duration and number of participants in each contact encounter that the infected person was involved in.
- C. Perform an audit of the Contact Record to keep track of the changes made to the Contact record by users.
- D. Perform contact tracing of their internal employees during an infectious disease outbreak or pandemic.
- E. Track their patients as contacts by using Contact entity in Salesforce.

Answer: A,B,D

NEW QUESTION # 84

Which three types of Electronic Health Record data transmitted via HL7 can be stored in Salesforce objects? (Choose Three.)

- A. Observation Results (ORU)
- B. Admission, Discharge, Transfer Data (ADT)
- C. Continuation of Care document (CCD)
- D. Clinical Document Architecture (CDA)
- E. Personal Health Record (PHR)

Answer: A,B,D

Explanation:

According to the Salesforce documentation¹, the following types of electronic health record data transmitted via HL7 can be stored in Salesforce objects:

Observation Results (ORU): ORU messages contain clinical observations and results, such as lab tests, vital signs, or imaging reports. ORU messages can be stored in the DiagnosticReport object in Health Cloud¹.

Admission, Discharge, Transfer Data (ADT): ADT messages contain information about patient admissions, discharges, transfers, or updates, such as demographics, insurance, or diagnosis. ADT messages can be stored in the EhrPatient object in Health Cloud¹.

Clinical Document Architecture (CDA): CDA is a standard for exchanging clinical documents, such as discharge summaries, progress notes, or referrals. CDA documents can be stored in the Document object in Health Cloud¹.

NEW QUESTION # 85
