Salesforce Health Cloud Accredited Professional Sample Questions (Q101-

Q106):

NEW QUESTION # 101

Which three of the following Health Cloud objects are part of the standard Care Management data Model? (Choose three)

- A. CareProgramGoal
- B. CarePlanGoal
- C. CareSpeciality
- D. CarePlan Template Task
- E. TimelineViewConfiguration

Answer: B,D,E

Explanation:

According to the Health Cloud Data Model Developer Guide, CarePlan Template Task, TimelineViewConfiguration, and CarePlanGoal are three Health Cloud objects that are part of the standard Care Management data model. CarePlan Template Task is a custom object that represents a task that is part of a care plan template. TimelineViewConfiguration is a custom object that defines how to display timeline events for a care plan. CarePlanGoal is a custom object that represents a goal that is part of a care plan. CareSpeciality and CareProgramGoal are not Health Cloud objects that are part of the standard Care Management data model.

NEW QUESTION # 102

In which three ways can users access Provider Management standard objects? (Choose three)

- A. By assigning the Provider Permission set.
- B. By using Service Cloud
- C. By assigning Health Cloud Foundation Permission set.
- D. By assigning Health Cloud Platform Permission set licenses.
- E. By using Health Cloud.

Answer: C,D

Explanation:

Explanation

Health Cloud Foundation

Assigns read access to additional Health Cloud platform capabilities,including the Provider Management data model.

The Health Cloud Provider Network Management permission set grants access to provider management objects so users can manage credentialing and recruiting.

To use the Provider Network Management features of Health Cloud, assign both the Provider Network Management permission set and the Health Cloud permission set to your users

NEW QUESTION # 103

Bloomington Caregivers would like to bulk upload information to support Provider Search and Provider Relationship Card.

What are the two best practice recommendations to upload this information?

Choose 2 answers

- A. Use Provider Card APIL.
- B. Use Data Loader.
- C. Use Provider Relationship API.
- D. Use Composite API Request.

Answer: B,D

NEW QUESTION # 104

A payer is looking to optimize the workflow for its call center, which focuses primarily on members calling to check on the status of their prior authorization requests.

How should a consultant conduct discovery to define a workflow for these call center users?

- A. Research industry trends and develop a point of view, then present it to the customer for validation.
- B. Use work from another project to inform the discovery, then review it with the IT department.
- C. Build a proof of concept to present to the client and ask them for feedback.
- D. Identify personas and ask them to walk through a day in their life, taking notes and identifying opportunities for optimization.

Answer: D

Explanation:

The best way to conduct discovery to define a workflow for the call center users is to identify personas and ask them to walk through a day in their life, taking notes and identifying opportunities for optimization. This approach will help the consultant understand the current state of the process, the pain points and challenges, the goals and expectations, and the potential solutions.

NEW QUESTION # 105

During a design session, the client asks for best practices around when to use DataRaptors vs. Integration Procedures. For which scenario should a consultant advise the client to use a single DataRaptor?

- A. The dataset required needs to read two SObjects with a clearly defined relationship.
- B. The dataset requires connecting to an external data source, such as CSV or REST API.
- C. The action must perform a SendMail task and check for any errors.
- D. The task requires both a read and write of SObject data.

Answer: A

Explanation:

DataRaptors are best for extracting, transforming, and loading Salesforce data, especially when handling data from related SObjects.

* Single DataRaptor for related SObjects:

* Extract:

"Use a DataRaptor Extract when you need to read Salesforce data, such as retrieving fields from multiple related SObjects in a single read." (Source: Omnistudio Standard Guide - DataRaptors)

* Why not B, C, or D?

* SendMail tasks, complex multi-step logic, or external data connections are handled by Integration Procedures, not DataRaptors.

NEW QUESTION # 106

.....

In order to help you get Health-Cloud-Accredited-Professional certification, many experts have worked hard for several years to formulate Health-Cloud-Accredited-Professional exam torrent for all examiners. In such a way, our Health-Cloud-Accredited-Professional study materials not only target but also cover all knowledge points.
