Salesforce Health Cloud Accredited Professional certification exam is the ideal way for healthcare professionals to demonstrate their proficiency in using this platform and their knowledge of the healthcare industry.

## Salesforce Health Cloud Accredited Professional Sample Questions (Q37-Q42):

### NEW QUESTION # 37

An administrator at Bloomington Caregivers has received a change request to alter the appearance of the timeline so that it displays vertically instead of horizontally.

Which step should the administrator take when implementing this change request?

- A. Find the Timeline Orientation setting in Custom Metadata, which controls the orientation of all timelines, and change the value to vertical.
- B. Enable Timeline in Salesforce Setup, then set the toggle for vertical orientation to true to set all timeline orientations as vertical.
- C. Find the Timeline View Configuration for each relevant timeline in the Health Cloud - Lightning Admin app and change the orientation to vertical.
- D. Enable Timeline in Salesforce Setup, then configure and activate new timeline and add to the relevant Lightning record.

**Answer: C**

Explanation:

To modify the timeline orientation in Health Cloud, administrators can adjust the Timeline View Configuration to display the timeline vertically.

Steps:

Access Timeline View Configuration:

Open the Health Cloud - Lightning Admin app in Salesforce.

Locate Timeline View Configuration records.

Edit the Configuration:

Select the relevant configuration for the timeline you wish to update.

Change the orientation setting to Vertical.

Save and activate the updated configuration.

Verify the Changes:

Check the timeline in the respective Lightning record pages to ensure the vertical layout is applied.

Why Other Options Are Incorrect:

A . Enable Timeline in Salesforce Setup: Timelines are already enabled in Health Cloud, and appearance changes are handled at the configuration level.

B . Toggle in Setup: There is no global toggle for orientation in Salesforce Setup.

D . Custom Metadata: Timeline orientation is not controlled by custom metadata; it's managed through view configurations.

### NEW QUESTION # 38

A payer needs to work with plan members and medical providers to influence decisions through a case-by-case review of the appropriateness of care.

When gathering requirements for this use case, which two Utilization Management processes should a consultant discuss with the client?

- A. Designing Next Best Action and Recommendations for the care management team
- B. Considering the number of intake agents who will be using Health Cloud
- C. Considering the Request Review Types; Prior Authorization Review, Concurrent Review, and Retrospective Review
- D. Designing Care Requests to seek authorization from a health plan for drugs, services, and admissions

**Answer: C,D**

### NEW QUESTION # 39

Bloomington Caregivers would like to send patient clinical data to an external payer, How should a consultant advise Bloomington Caregivers to make this information available to the payer using the most cost-effective method in out-of-the-box Health Cloud?

- A. Use MuleSoft Accelerator with H 7 APL
- B. use a third-party tool from AppExchange.

- C. Build a custom remote call-in API into Salesforce.
- **D. Leverage the FHIR R4 Patient API**

**Answer: D**

Explanation:

The FHIR R4 Patient API is a Health Cloud feature that allows users to create, update, and query patient data in Salesforce using the Fast Healthcare Interoperability Resources (FHIR) standard<sup>1</sup>. FHIR is a widely adopted standard for exchanging healthcare information electronically<sup>2</sup>. By using the FHIR R4 Patient API, Bloomington Caregivers can make their patient clinical data available to the external payer in a cost-effective and interoperable way, without requiring any custom development or third-party tools. The FHIR R4 Patient API supports the US Core Patient profile, which defines the minimum set of data elements for exchanging patient information<sup>3</sup>.

#### NEW QUESTION # 40

A pharmaceutical company is looking to support patients throughout their clinical journey. One of the factors the company needs to track is the socioeconomic and cultural barriers that could hinder a patient's process.

Which Health Cloud capability should a consultant implement to fulfill this requirement?

- A. Utilization Management
- B. Care Blockers
- C. Clinical Barriers
- **D. Social Determinants of health**

**Answer: D**

Explanation:

Tracking socioeconomic and cultural barriers that could hinder a patient's progress requires Salesforce Health Cloud's Social Determinants of Health (SDoH) capability.

Key Features of Social Determinants of Health:

Comprehensive Patient View:

Captures data on factors like income, education, housing, and transportation that influence health outcomes.

Risk Identification:

Identifies potential barriers and integrates them into care plans, enabling proactive intervention.

Care Coordination:

Helps care teams design support services and interventions tailored to individual patient needs.

Why Other Options Are Less Suitable:

B . Clinical Barriers: While useful, this focuses on clinical obstacles rather than broader socioeconomic factors.

C . Utilization Management: Centers on managing care authorizations, not patient barriers.

D . Care Blockers: Not a formal Health Cloud capability; overlaps conceptually with SDoH.

#### NEW QUESTION # 41

Which three are steps required to configure Health Cloud? (Choose three.)

- A. Install Health Cloud Unmanaged Packages.
- B. Install the Health Cloud Managed Package.
- **C. Verify that Chatter Is enabled.**
- **D. Configure the console view.**
- **E. Enable the option for contacts to relate to multiple accounts.**

**Answer: C,D,E**
