Reliable 1Z0-1163-1 Dumps & Exam 1Z0-1163-1 Papers

TestPDF has designed Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 which has actual exam Dumps questions, especially for the students who are willing to pass the Oracle 1Z0-1163-1 exam for the betterment of their future. The study material is available in three different formats. Oracle Practice Exam are also available so the students can test their preparation

with unlimited tries and pass Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) certification exam on the first try.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q19-Q24):

NEW QUESTION # 19

What is the role of the Global Order Promising feature in Oracle Fusion Cloud SCM?

- A. It guarantees same-day delivery for all orders.
- **B. It provides real-time order commitment dates based on supply and demand constraints.**
- C. It focuses only on local inventory availability.
- D. It eliminates the need for supplier collaboration.

Answer: B

Explanation:

Global Order Promising (C) provides real-time order commitment dates by analyzing supply (e.g., inventory, production) and demand (e.g., orders, forecasts) constraints enterprise-wide. For instance, if 100 units are requested and 70 are available with a 3-day lead time, it commits to 3 days. Option A is false-no universal same-day guarantee exists. Option B is incorrect-supplier data often informs promises. Option D is wrong-it considers global, not just local, availability. This feature ensures reliable promises, reduces cancellations, and aligns customer expectations with operational capacity.

NEW QUESTION # 20

Which feature in Oracle Fusion Cloud Procurement allows suppliers to manage invoices and purchase orders?

- A. Receipt Accounting.
- **B. Supplier Portal.**
- C. Intelligent Document Recognition (IDR).
- D. Contract Fulfillment Automation.

Answer: B

Explanation:

The Supplier Portal (A) in Oracle Fusion Cloud Procurement allows suppliers to manage invoices and purchase orders (POs) by providing a self-service platform. Suppliers can view POs (e.g., 200 units due Friday), submit invoices, and track statuses in real time, reducing manual communication. Option B (Contract Fulfillment Automation) generates POs from contracts, not supplier management. Option C (IDR) extracts invoice data, not a supplier tool. Option D (Receipt Accounting) records receipts, not supplier interactions. For example, a supplier might invoice \$2,000 for a PO directly in the portal, speeding up payment cycles and improving transparency.

NEW QUESTION # 21

Which activity is fundamental to the Insight to Sourcing OMBP, ensuring effective procurement and cost optimization?

- A. Performance Monitoring, which assesses supplier ability to meet quality and service standards by utilizing audits, inspections, or performance reviews.
- **B. Spend Analysis, which involves categorizing and analyzing historical spending data to identify cost-saving opportunities and strategic sourcing decisions.**
- C. Idea Generation, which identifies market opportunities, incorporating trend analysis and internal innovation.

Answer: B

Explanation:

Spend Analysis (B) is the cornerstone of the Insight to Sourcing OMBP in Oracle Fusion Cloud SCM, as it involves categorizing and analyzing historical spending data to uncover cost-saving opportunities and inform strategic sourcing decisions. By examining past expenditures-e.g., identifying that 70% of spending on raw materials comes from a single supplier-businesses can negotiate better terms, consolidate suppliers, or shift to lower-cost alternatives, optimizing procurement costs. Option A (Idea Generation) is a preliminary step focused on innovation and market trends, not the core analytical activity driving sourcing. Option C (Performance Monitoring) evaluates supplier performance post-sourcing, not the initial insight process. For instance, Spend Analysis might reveal

excessive spending on expedited shipping, prompting a shift to local suppliers, directly impacting cost efficiency and procurement strategy. This data-driven approach ensures decisions are grounded in financial reality, making it fundamental to the OMBP.

NEW QUESTION # 22

What is the function of Manufacturing Execution in Oracle Fusion Cloud SCM?

- A. It eliminates the need for supplier coordination in production planning.
- B. It focuses only on financial reporting for manufacturing expenses.
- C. It tracks and manages real-time production processes on the shop floor.

Answer: C

Explanation:

Manufacturing Execution in Oracle Fusion Cloud SCM is a critical function that tracks and manages real-time production processes on the shop floor, ensuring visibility and control over activities like work order execution, material consumption, and labor tracking. It captures data as production occurs-e.g., when a worker completes an assembly step or uses raw materials-allowing managers to monitor progress, identify bottlenecks, and ensure quality. Option A is incorrect because supplier coordination remains essential for raw material supply; Manufacturing Execution does not eliminate this need but integrates with it. Option C is wrong as financial reporting is handled by Cost Accounting, not Manufacturing Execution, though the latter provides data that feeds into cost calculations. For example, if a factory produces 100 units, Manufacturing Execution records the exact time, resources, and issues (e.g., machine downtime), enabling proactive adjustments. This real-time oversight improves efficiency, reduces waste, and ensures production aligns with planned schedules.

NEW QUESTION # 23

What is the primary function of the Order Promising process in Oracle Fusion Cloud SCM?

- A. It only manages orders for direct-to-customer deliveries.
- B. It provides accurate order commitment dates based on supply and demand availability.
- C. It guarantees same-day shipping for all orders.
- D. It eliminates the need for supplier collaboration.

Answer: B

Explanation:

The Order Promising process (A) in Oracle Fusion Cloud SCM, primarily through Global Order Promising (GOP), provides accurate order commitment dates by analyzing real-time supply (inventory, production capacity) and demand (existing orders, forecasts) data. For instance, if a customer orders 50 units and only 30 are in stock with a 2-day production lead time, it commits to delivery in 2 days, not immediately. Option B is incorrect-it handles all order types (B2B, internal), not just direct-to-customer. Option C is false-no system can universally guarantee same-day shipping; commitments depend on constraints. Option D is wrong-supplier collaboration is often required to fulfill promises. This process enhances customer trust by avoiding overpromising, optimizes resource allocation, and integrates with supply chain planning for seamless execution.

NEW QUESTION # 24

.....

1Z0-1163-1 practice material contains questions & answers together with explanations. You can do your 1Z0-1163-1 study plan according to your actual test condition. If your time is limited, you can remember the questions and answers for the 1Z0-1163-1 preparation. While, if your time is enough for well preparation, you can study and analyze the answers with the help of the 1Z0-1163-1 Exam explanations. No matter in which way you study for the Oracle certification, our 1Z0-1163-1 valid pdf dumps will ensure you 100% pass.

Reliable 1Z0-1163-1 Dumps: <https://www.testpdf.com/1Z0-1163-1-exam-braindumps.html>

Oracle Reliable 1Z0-1163-1 Dumps provides the opportunity to excel in the IT field by offering a candidate with highest paying certifications, Reliable 1Z0-1163-1 Dumps is one of the most popular worldwide IT certifications to validate your skills and capability to perform role related tasks and activities at a specified level of competence.
