

# Here's The Proven And Quick Way To Get Success In Oracle 1z0-1073-24 Exam

BONUS!!! Download part of ExamsLabs 1z0-1073-24 dumps for free: [https://drive.google.com/open?id=1W\\_gBMwky1Zz\\_5MKvzDdqwCIH\\_hOO16eU](https://drive.google.com/open?id=1W_gBMwky1Zz_5MKvzDdqwCIH_hOO16eU)

As the saying goes, time is the most precious wealth of all wealth. If you abandon the time, the time also abandons you. So it is also vital that we should try our best to save our time, including spend less time on preparing for exam. Our 1z0-1073-24 guide torrent will be the best choice for you to save your time. The three different versions have different functions. If you decide to buy our 1z0-1073-24 Test Guide, the online workers of our company will introduce the different function to you. You will have a deep understanding of the three versions of our 1z0-1073-24 exam questions. We believe that you will like our products.

## Oracle 1z0-1073-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Configuring Inventory Counts: This section evaluates the skills of Inventory Control Managers in generating cycle counts and configuring physical inventory processes to ensure accurate stock levels.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Implementing Enterprise Structures: This section measures the skills of Enterprise Architects and covers designing fundamental structures for an enterprise, explaining the role of legal entities within the system, setting up inventory organizations, modeling managerial and functional structures, and describing item and cost organizations.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Understanding Consigned Inventory from a Supplier: This domain focuses on the skills of Supply Chain Coordinators in understanding consigned inventory processes. It includes illustrating the consignment process, creating consumption advice, and explaining ownership transfers and returns from a consignment perspective.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Executing Back-to-Back Process: This section measures the skills of Logistics Managers in applying the back-to-back process flow. It covers managing exceptions within this process flow to ensure smooth operations.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>Maintaining Inventory Replenishment: This domain assesses the capabilities of Replenishment Specialists in maintaining inventory levels. It includes running min-max plans, setting up min-max planning strategies, and outlining PAR location management.</li></ul>

**New 1z0-1073-24 Exam Labs - 1z0-1073-24 Latest Exam Preparation**

Research indicates that the success of our highly-praised 1z0-1073-24 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our 1z0-1073-24 guide torrent implement good practices, systems as well as strengthen our ability to launch newer and more competitive products. In fact, you can totally believe in our 1z0-1073-24 Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our 1z0-1073-24 test questions, you will also get a full refund from our company by virtue of the proof certificate.

## Oracle Inventory Cloud 2024 Implementation Professional Sample Questions (Q45-Q50):

### NEW QUESTION # 45

Which two statements are true about project-driven supply chain?

- A. Exclusion can be set for project cost collection by project type.
- B. Project and task details are not available on the Manage Item Quantities page.
- C. Project and task details can be removed from a referenced return.
- D. Common inventory cannot be used for project-specific picks.

Answer: A,C

### NEW QUESTION # 46

What happens when Transfer Order Required is not enabled on the Manage Interorganization Parameters page for Direct Organization Transfer between Source Organization Atlanta and Destination Organization Seattle?

- A. Transfer orders cannot be created from Atlanta to Seattle.
- B. Transfer orders can be created from Atlanta to Seattle, but approval is mandatory.
- C. Both interorganization transfers and transfer orders can be created from Atlanta to Seattle.

Answer: C

### NEW QUESTION # 47

You have created a new material status Transfit allowing Miscellaneous and Purchase Order Receipt transactions. How can you assign Transfit as a default lot status?

- A. Set Default Lot Status under Associate Item on the Configure Subinventories page
- B. Set Default Lot Status under Lot, Serial Number, and Packing Unit on the Manage Inventory Organization Parameters page.
- C. Set Default Lot Status under Item Specifications in Master Organization.

Answer: C

### NEW QUESTION # 48

The Supply Chain Orchestration Work Area Supply Line Overview page displays supply lines that are aggregated and grouped. Which of the following form the group? (Choose four)

- A. Exceptions
- B. Jeopardy
- C. On-Track
- D. Errors
- E. Rejections

Answer: A,B,C,D

### NEW QUESTION # 49

Set Up Back-to-Back Transfer Flow

The topic explains what you need to do for setting up back-to-back transfer flow.

In the Oracle Product Information Management, ensure that the Item is Back-to-Back enabled.

In Oracle Global Order Promising:

1. Set up a global sourcing rule with Type as Transfer from. Set the organization as the organization requesting the transfer (example, Warehouse 1).
2. Set up a local sourcing rule for the organization (in this example, Warehouse 1) Type as Transfer from, from the organization that has the stock from which the transfer will take place (example, Warehouse 2).
3. Set up an ATP rule with the Promising Mode as Supply chain availability search.
4. Ensure that the Supply chain availability search attributes are enabled according to your requirements. For example, you might want the application to search components and resources to include on-hand or in-transit Supply Types or fulfillment lines Demand Types.
5. Set the ATP Rule Assignment as required.
6. Set the sourcing assignments for the sourcing rules that you defined in steps 1 and 2.
7. Ensure that the assignment level used for the global sourcing rule doesn't include any Organization.
8. Refresh and restart the Order Promising Server for ATP Rules and Sourcing.

With this setup:

\*The global rule is used to source the item from Warehouse 1 if there is stock available to reserve.

\*If there's no stock on hand, Global Order Promising uses the local rule to transfer the item from Warehouse 2 to Warehouse 1.

### Answer:

Explanation:

See the Explanation for the complete solution.

Explanation:

Set Up Back-to-Back Transfer Flow in Oracle Cloud

The Back-to-Back (B2B) Transfer Flow allows organizations to move inventory from one warehouse (source) to another warehouse (destination) when stock is unavailable in the fulfillment location. This setup ensures that Oracle Global Order Promising (GOP) can automatically determine the best supply source and execute the transfer process efficiently.

#### 1. Prerequisites: Enable Back-to-Back for Items

Before setting up the transfer flow, ensure that the item is Back-to-Back enabled in Oracle Product Information Management (PIM):

- \* Navigate to Oracle Product Information Management (PIM).
- \* Search for the item you want to enable for back-to-back fulfillment.
- \* In the item definition, enable the "Back-to-Back Enabled" attribute.
- \* Save and publish the item updates.

# This ensures that the item can participate in the B2B fulfillment process.

#### 2. Configure Global Order Promising (GOP) for Back-to-Back Transfer Flow In Oracle Global Order Promising (GOP), configure the system to determine the best transfer source when fulfilling back-to-back orders.

##### Step 1: Create a Global Sourcing Rule (Type: Transfer From)

- \* Navigate to Oracle Global Order Promising (GOP).
- \* Create a Global Sourcing Rule with the following details:
- \* Type: "Transfer From"
- \* Source Organization: Warehouse 1 (Requesting warehouse or fulfillment location).

# This rule ensures that items are sourced from Warehouse 1 whenever stock is available.

##### Step 2: Create a Local Sourcing Rule (Type: Transfer From)

- \* Create a Local Sourcing Rule for Warehouse 1 as follows:
- \* Type: "Transfer From"
- \* Source Organization: Warehouse 2 (Stock-holding warehouse).

# This rule ensures that if Warehouse 1 does not have stock, the system transfers items from Warehouse 2.

##### Step 3: Set Up an ATP Rule for Availability Check

- \* Create an ATP Rule (Available-to-Promise Rule) with the following parameters:
- \* Promising Mode: "Supply Chain Availability Search".
- \* Enable attributes for supply chain availability search based on business needs.
- \* Configure ATP search to consider on-hand stock, in-transit inventory, components, and resources if needed.

# This ensures that GOP can evaluate stock levels across multiple locations.

##### Step 4: Assign ATP Rule to Organizations

- \* Assign the ATP Rule to the appropriate organizations.
- \* Ensure that the rule applies to Warehouse 1 and Warehouse 2 based on their roles in the sourcing process.

# This enables availability checking when processing sales orders.

##### Step 5: Assign Sourcing Rules to Organizations

- \* Assign the Global Sourcing Rule to the enterprise-wide sourcing assignment.
- \* Assign the Local Sourcing Rule to Warehouse 1, specifying Warehouse 2 as the sourcing location.
- \* Ensure that the assignment level for the global sourcing rule does not include a specific organization (it should apply at a broader

level).

# This ensures that Oracle GOP prioritizes sourcing stock from Warehouse 1 first and transfers from Warehouse 2 if needed.

Step 6: Refresh and Restart Order Promising Server

\* Once the sourcing rules and ATP configurations are in place:

\* Refresh Oracle Global Order Promising (GOP) Rules.

\* Restart the Order Promising Server to apply sourcing and ATP rule changes.

# This step ensures that all updates take effect and are used in future order promising decisions.

3. Expected Behavior After Setup

\* If Warehouse 1 has stock # GOP reserves inventory and processes the sales order immediately.

\* If Warehouse 1 does not have stock # GOP triggers a transfer order to move stock from Warehouse 2 to Warehouse 1.

\* Once the transfer order is fulfilled and received, the sales order is shipped to the customer.

# This ensures automated order fulfillment with minimal manual intervention.

4. Benefits of Back-to-Back Transfer Flow in Oracle Cloud

# Optimized Inventory Utilization - Uses stock efficiently across multiple warehouses. # Automated Stock Transfers - Eliminates manual intervention by automatically moving stock when needed. # Reduced Procurement Costs - Moves existing inventory instead of purchasing new stock. # Faster Order Fulfillment

- Reduces lead times by sourcing from internal stock before procurement. # Seamless Oracle Cloud Integration - Works across Oracle Order Management, Inventory, GOP, and Supply Chain Orchestration.

## NEW QUESTION # 50

.....

The valid updated, and real Oracle 1z0-1073-24 PDF questions and both practice test software are ready to download. Just take the best decision of your professional career and get registered in Oracle 1z0-1073-24 certification exam and start this journey with ExamsLabs 1z0-1073-24 exam PDF dumps and practice test software. All types of Oracle Exam Questions formats are available at the best price. It will enable you to perform well in the final 1z0-1073-24 Exam. ExamsLabs offers 1z0-1073-24 exam study material in the three best formats. Oracle 1z0-1073-24 Exam Questions, Web-based and desktop practice exam software. All these formats play a vital role in your Oracle 1z0-1073-24 exam preparation process.
