Salesforce Heroku-Architect exam covers a wide range of topics, including Heroku platform architecture, application deployment, data management, security, and integration. Heroku-Architect exam consists of multiple-choice questions, scenario-based questions, and hands-on exercises that test the candidates' ability to design and implement solutions on the Heroku platform. Heroku-Architect exam is designed to assess the practical skills and knowledge of the candidates, rather than just theoretical knowledge.

Salesforce Heroku-Architect is a certification exam designed to evaluate the skills and knowledge of professionals working in the field of Salesforce Heroku Architecture. Heroku-Architect exam is aimed at individuals who specialize in the development and implementation of solutions using Heroku, a cloud platform that enables developers to build, deploy, and scale applications quickly and easily.

Salesforce Certified Heroku Architect Sample Questions (Q105-Q110):

NEW QUESTION # 105

Universal Containers experienced an outage with their production Heroku Postgres database due to a fault with the underlying infrastructure. The database was unavailable for an hour. The database is on the Standard-

0 plan.

Which two actions should an Architect recommend to mitigate such database failures and outages in the future? (Choose two.)

- A. Migrate the database to a larger Standard-tier plan.
- B. Migrate the database to a Premium-tier plan.
- C. Create a fork of the database that uses the same plan as the leader.
- D. Create a follower database that uses the same plan as the leader.

Answer: A,D

NEW QUESTION # 106

A customer wants to sync data between their Salesforce org and Heroku Postgres.

Which two limitations should an Architect remember when recommending Heroku Connect? (Choose two.)

- A. Heroku Connect does not provide an API.
- B. Heroku Connect cannot sync custom objects.
- C. Heroku Connect can only access fields and objects that its associated Salesforce integration user can access.
- D. Heroku Connect does not support all Salesforce objects and fields.

Answer: A,C

NEW QUESTION # 107

A healthcare client is creating a web portal for their customers on Heroku, which is sourced from a Salesforce instance. Some of the Salesforce data they wish to display falls under HIPAA compliance, and their auditors have determined this data must be stored encrypted-at-rest. To satisfy this requirement, they have enabled Platform Encryption on Salesforce.

They are investigating Heroku Shield Private Spaces, Shield Dynos, Shield Postgres, and Shield Heroku Connect.

How will Shield Heroku Connect interact with the encrypted fields in Salesforce?

- A. Shield Heroku Connect will be able to access only cypher text in the fields from Salesforce. They will need to import the encryption key from Salesforce to decrypt to store in Shield Postgres.
- B. Shield Heroku Connect will be able to synchronize data from fields in Salesforce without additional customization, but any writes will need to be encrypted using the Salesforce encryption key first before being written.
- C. Shield Heroku Connect will be able to synchronize data bidirectionally without additional customization.
- D. Shield Heroku Connect requires customization on the Salesforce side to decrypt the data before transmitting to Heroku.

Answer: B

Explanation:

NEW QUESTION # 108

A client has a web application that persists data to a local JSON file. They are migrating the application to Heroku. In order for the application to conform to the Twelve-Factor methodology, what changes should an Architect recommend?

- A. The application should persist the data to a local SQLite database.
- B. The application should persist the data to a database add-on.
- C. The application should use at least 2 dynos to ensure that the JSON file is highly available.
- D. The application should be stateless and therefore not persist data at all.

Answer: B

NEW QUESTION # 109

Universal Containers has noticed that with every new product release there is a rise in customer reported Cases and a decrease in first-time fix-rate.

Which two recommendations should a Consultant make? (Choose two.)

- Answer: A,D**
