New Heroku-Architect New Dumps Ebook | High-quality Heroku-Architect Valid Exam Materials: Salesforce Certified Heroku Architect

We also update frequently to guarantee that the client can get more learning Heroku-Architect exam resources and follow the trend of the times. So if you use our Heroku-Architect study materials you will pass the test with high success probability. And our Heroku-Architect learning guide is high-effective. If you study with our Heroku-Architect practice engine for 20 to 30 hours, then you can pass the exam with confidence and achieve the certification as well.

Salesforce Heroku-Architect certification is an advanced certification that validates the skills and expertise of the candidates in designing and deploying scalable applications on the Salesforce Heroku platform. Salesforce Certified Heroku Architect certification is designed for experienced developers and architects who are looking to enhance their skills and knowledge in the Salesforce Heroku platform. Salesforce Certified Heroku Architect certification is a valuable credential that demonstrates the candidates' commitment to their professional development and their passion for staying up-to-date with the latest technologies.

Salesforce Heroku-Architect Certification is a coveted certification for individuals who want to validate their skills and knowledge in developing and deploying applications on the Heroku platform. Salesforce Certified Heroku Architect certification is designed to test a candidate's ability to design, build, and deploy scalable and secure Heroku applications. The Salesforce Heroku-Architect certification is a must-have for professionals looking to advance their career in the cloud computing industry.

Salesforce Certified Heroku Architect Sample Questions (Q141-Q146):

NEW QUESTION # 141

A company currently uses, and will continue to use, the Mulesoft Anypoint Platform integration throughout their architecture. They want to use Heroku Connect to help them integrate Heroku apps with Salesforce apps. What is a benefit of introducing Heroku Connect in this environment?

- A. Heroku Connect provides Salesforce a declarative bidirectional synchronization with Postgres and data proxy capability via Heroku Connect External Objects.
- B. Heroku Connect provides Salesforce a bidirectional synchronization between Platform Events on Salesforce and Apache Kafka on Heroku
- C. Heroku Connect provides Mulesoft an endpoint that is easily consumable by a back-end integration tool
- D. Heroku Connect has a Microsoft connector for access to Heroku Postgres Heroku Redis, and Apache Kafka on Heroku

Answer: A

NEW QUESTION # 142

A customer would like to analyze data stored in a single, large, high-traffic Heroku Postgres database using a reporting tool that runs long-running, expensive read queries. What reporting architecture should be recommended?

A client wants to create a Heroku web application that needs to provide a low-latency experience for its users, who are based primarily in Japan. Many common user actions will result in synchronous writes to the application's Heroku Postgres database. The application does not have advanced compliance requirements.

Which should an Architect recommend?

- A. Deploy the application to a Private Space in the Tokyo region
- B. Deploy the application to a Shield Private Space in the Tokyo region
- C. Deploy the application to the Common Runtime in the Tokyo region
- D. Deploy the application to the Common Runtime in the U.S region and use a CDN to accelerate content delivery

Answer: A

Explanation:

-<https://devcenter.heroku.com/articles/dataclips>

NEW QUESTION # 143

A client currently runs a Ruby script in a one-off dyno each time they deploy their Go application to Heroku. The development team wants the script to be executed before the application is deployed because it performs necessary database migrations. Which approach should an Architect recommend?

- A. Modify the Go buildpack to install Ruby, and run the script from the _profile
- B. Convert the Ruby release script to Go and execute it on application startup
- C. Define different process types for the Ruby script and the Go application in the app's Profile.
- **D. Use both Go and Ruby language buildpacks, and run the Ruby script with release phase**

Answer: D

Explanation:

- There are many scenarios in which a single buildpack is not sufficient when building an application. This includes cases when you need to: Run a buildpack for each language your app uses For example, run a JavaScript buildpack for assets and a Ruby buildpack for your application Run a daemon process such as pgbouncer with your application. Pull in system dependencies with apt. You can check the following for more information: <https://devcenter.heroku.com/articles/using-multiple-buildpacks-for-an-app>

NEW QUESTION # 144

When designing a Heroku application, which two approaches observe the Twelve-Factor methodology?
Choose 2 answers.

- A. The application's database configuration is stored in the application's Profile
- B. On startup, the application's source code fetches and installs any dependencies that are missing according to the application's list of dependencies.
- **C. On deployment, Heroku fetches and installs any dependencies that are missing according to the application's list of dependencies**
- **D. The application's database configuration is stored in the application's config vars.**

Answer: C,D

Explanation:

- <https://devcenter.heroku.com/articles/heroku-connect-database-tables#encrypted-strings>

NEW QUESTION # 145

Which two statements describe characteristics of Private Space Logging? (Choose two.)

- A. Log entries are collated and forwarded by Heroku's Logplex router.
- **B. Log entries can be forwarded to up to three logging services.**
- **C. Log entries are forwarded as HTTPS POST requests.**
- D. Log entries can be forwarded to only one logging service.

Answer: B,C
