Pass Guaranteed High-quality Oracle - High 1Z0-1069-24 Passing Score

Our Oracle 1Z0-1069-24 practice materials are suitable for exam candidates of different degrees, which are compatible whichever

level of knowledge you are in this area. These Oracle 1Z0-1069-24 Training Materials win honor for our company, and we treat Oracle 1Z0-1069-24 test engine as our utmost privilege to help you achieve your goal.

Oracle Recruiting Cloud 2024 Implementation Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25

Which tool would you use to add or remove the Required attribute from the Education Level or Job Type when creating a requisition?

- A. BI Publisher
- B. Fast Formula
- C. HDL Loader
- D. Transaction Design Studio

Answer: D

Explanation:

The correct tool to add or remove the Required attribute from fields like Education Level or Job Type when creating a requisition is Transaction Design Studio. This tool allows administrators to customize the requisition creation process by modifying field properties, such as making them required or optional, without needing custom code or data uploads.

Step-by-Step Solution:

- * Navigate to the HCM Experience Design Studio.
- * Select the Transaction Design Studio option.
- * Choose the Recruiting-related transaction (e.g., "Create Job Requisition").
- * Locate the fields (Education Level or Job Type) in the configuration settings.
- * Adjust the "Required" attribute by enabling or disabling it as needed.
- * Save and test the changes in a sandbox environment before deploying.

Transaction Design Studio is Oracle's tool for tailoring user interface behavior in HCM Cloud, including Recruiting. It allows fine-grained control over field properties like required status, visibility, and default values in transactions such as requisition creation. Fast Formula is used for business logic and rules, BI Publisher for reporting and document generation, and HDL Loader for bulk data imports—none of which directly address field attribute changes in the UI. Reference: Oracle HCM Cloud Recruiting Configuration documentation, Transaction Design Studio section.

NEW QUESTION # 26

Your organization will be creating a variety of offer letters based on hiring types. Which tools do you need to build the templates the teams will use?

- A. Oracle Recruiting Cloud and BI Publisher plug-in only
- B. a data model, BI Publisher plug-in, MS Word, Oracle Recruiting Cloud
- C. a data model and BI Publisher only
- D. Oracle Recruiting Cloud, BI Publisher, MS Excel

Answer: B

NEW QUESTION # 27

Many of the new Redwood Recruiting pages must be enabled before they are available for use by organizations. Which is the primary step used to enable these pages?

- A. Set corresponding administrator profile values to "Y" or "Yes".
- B. Create an SR with Oracle to enable Redwood pages.
- C. Enable the new Redwood offering in the Setup and Maintenance work area.

Answer: A

Explanation:

The primary step to enable Redwood Recruiting pages is to set corresponding administrator profile values to "Y" or "Yes". This activates the Redwood experience by toggling specific profile options in the system.

Step-by-Step Solution:

- * Go to Setup and Maintenance in Oracle HCM Cloud.
- * Search for the "Manage Administrator Profile Values" task.
- * Locate the profile options related to Redwood Recruiting pages (e.g., ORA_HCM_REDWOOD_ENABLED or similar).
- * Set the value to "Y" or "Yes" at the appropriate level (site, user, etc.).
- * Save the changes and verify that the Redwood pages are accessible.

Redwood pages are part of Oracle's modern UX framework, and enabling them typically involves adjusting profile options rather than a full offering setup or an SR (service request). The profile value approach is standard for enabling optional UI features in Oracle HCM Cloud, ensuring flexibility and control. The Setup and Maintenance work area is used for broader configurations, but the specific toggle for Redwood is via profile options. Reference: Oracle Recruiting Cloud Redwood Experience Enablement Guide.

NEW QUESTION # 28

Which tool would you use to remove the mandatory attribute from the phone number and/or email when creating a candidate?

- A. BI Publisher
- B. Fast Formula
- C. HDL Loader
- **D. Transaction Design Studio**

Answer: D

NEW QUESTION # 29

Your recruiting specialist wants to enable intelligent matching features such as Suggested Candidates, Similar Candidates, Similar Jobs, and Suggested Jobs to make the recruiting and hiring processes more efficient and effective. What do you need to do in order to use these features?

- A. Request a controlled availability update from Oracle
- **B. Activate the available embedded AI functionality**
- C. Disable resume parsing

Answer: B

Explanation:

You need to activate the available embedded AI functionality.

Step-by-Step Solution:

- * Go to Recruiting and Candidate Experience Management.
- * Locate the AI settings section.
- * Enable the embedded AI features (e.g., Suggested Candidates).
- * Test the intelligent matching in a requisition.

These AI-driven features are embedded in Oracle Recruiting Cloud and can be activated via configuration, not requiring special requests or disabling other features like resume parsing. Reference: Oracle Recruiting Cloud AI Features Guide, Intelligent Matching section.

NEW QUESTION # 30

.....

Research indicates that the success of our highly-praised 1Z0-1069-24 test questions owes to our endless efforts for the easily operated practice system. Most feedback received from our candidates tell the truth that our 1Z0-1069-24 guide torrent implement good practices, systems as well as strengthen our ability to launch newer and more competitive products. In fact, you can totally believe in our 1Z0-1069-24 Test Questions for us 100% guarantee you pass exam. If you unfortunately fail in the exam after using our 1Z0-1069-24 test questions, you will also get a full refund from our company by virtue of the proof certificate.
