Health-Cloud-Accredited-Professional Torrent

The Health-Cloud-Accredited-Professional exam questions by experts based on the calendar year of all kinds of exam after analysis, it is concluded that conforms to the exam thesis focus in the development trend, and summarize all kind of difficulties you will face, highlight the user review must master the knowledge content. And unlike other teaching platform, the Salesforce Health Cloud Accredited Professional study question is outlined the main content of the calendar year examination questions didn't show in front of the user in the form of a long time, but as far as possible with extremely concise prominent text of Health-Cloud-Accredited-Professional Test Guide is accurate incisive expression of the proposition of this year's forecast trend, and through the simulation of topic design meticulously.

Salesforce Health Cloud Accredited Professional Sample Questions (Q42-Q47):

NEW QUESTION # 42

What is the best practice when transitioning an org from Service Cloud to HC?

- A. Approach depends on how each customer uses their org. Any other options may be used.
- B. Build out HC capabilities in a new org, then migrate all users and data.
- C. Put HC use cases in a new org, leave only Service Cloud use cases in an existing org.
- D. Migrate the entire org in place.

Answer: A

Explanation:

Reference and details below.

We've boiled down the upgrade options into three simple paths to success, depending on each organization's unique situation. Many existing Sales and Service Cloud instances don't have extensive customizations or technical debt. In those cases, upgrading to Health Cloud in the current org frequently provides the fastest path with little to no disruption for existing users.

NEW QUESTION # 43

How should a consultant recommend modeling a physician's locations of service, when the physician practices at multiple hospitals and clinics?

- A. Healthcare Provider Relationship
- B. Healthcare Practitioner Facility
- C. Account Contact Relationship
- D. Healthcare Taxonomy

Answer: B

Explanation:

The Healthcare Practitioner Facility object in Salesforce Health Cloud allows modeling of a physician's locations of service. It captures relationships between healthcare practitioners and the facilities (hospitals, clinics, etc.) where they practice.

Key Features of Healthcare Practitioner Facility:

- * Multiple Locations: Tracks all locations where a physician practices.
- * Relationships: Links practitioners to facilities, ensuring accurate mapping of service areas.
- * Operational Benefits: Facilitates scheduling, referrals, and care coordination by providing accurate location data.

Why Other Options Are Incorrect:

- * Healthcare Taxonomy: Used to classify healthcare providers based on specialties and services, not locations.
- * Healthcare Provider Relationship: Tracks relationships between healthcare organizations or facilities, not individual physician locations.
- * Account Contact Relationship: Provides a general relationship mapping but lacks the specificity required for modeling service locations.

Health Cloud Data Model for Practitioners and Facilities

NEW QUESTION # 44

Bloomington Caregivers is implementing Health Cloud to streamline the process to register patients to care programs while capturing their consent. The company plans to leverage out-of-the-box Health Cloud features. Which Health Cloud feature should a consultant recommend the company use in this scenario?

- A. Care Plan Enrollment Flow
- B. Program Eligibility OmniScript
- C. Enrollment Consent OmniScript
- **D. program Enrollment Flow**

Answer: D

Explanation:

The Program Enrollment Flow is an out-of-the-box feature in Salesforce Health Cloud that streamlines patient registration for care programs while capturing their consent. This flow ensures an efficient and compliant process for onboarding patients into care programs.

Key Features of Program Enrollment Flow:

Consent Capture: Collects and records patient consent as part of the enrollment process.

Eligibility Verification: Integrates eligibility checks to ensure patients meet program requirements.

Streamlined Enrollment: Guides care coordinators through the steps to enroll patients into programs, ensuring consistency.

Why Other Options Are Incorrect:

B . Program Eligibility OmniScript: Focuses on determining program eligibility, not full enrollment with consent capture.

C . Care Plan Enrollment Flow: This flow relates to care plan assignments, not program registration.

D . Enrollment Consent OmniScript: This is not a standard Health Cloud feature; consent capture is integrated into the Program Enrollment Flow.

Program Enrollment in Health Cloud

NEW QUESTION # 45

Which three are steps required to configure Health Cloud? (Choose three.)

- **A. Verify that Chatter Is enabled.**
- **B. Enable the option for contacts to relate to multiple accounts.**
- **C. Configure the console view.**
- D. Install the Health Cloud Managed Package.
- E. Install Health Cloud Unmanaged Packages.

Answer: A,B,C

NEW QUESTION # 46

A new user story requires an OmniScript to update an existing field on a custom SObject. Which two components should a consultant use to satisfy the requirement?

- **A. DataRaptors**
- B. SOQL Query
- C. API Actions
- **D. Integration Procedures**

Answer: A,D

Explanation:

C is correct because Integration Procedures are components that can be used to update an existing field on a custom SObject.

Integration Procedures are reusable processes that can perform various actions on data, such as reading, writing, transforming, or validating. Integration Procedures can be invoked from an OmniScript or a DataRaptor, and can accept input parameters and return output values.

D is correct because DataRaptors are components that can be used to update an existing field on a custom SObject. DataRaptors are data transformation tools that can extract, load, or transform data from any Salesforce object or external data source.

DataRaptors can be invoked from an OmniScript or an Integration Procedure, and can accept input parameters and return output values.

NEW QUESTION # 47
