High Pass-Rate EDGE-Expert New Study Notes–Find Shortcut to Pass EDGE-Expert Exam

EDGE-Expert study materials are the product for global users. Standards in all aspects are also required by international standards. The system designed of EDGE-Expert learning guide by our IT engineers is absolutely safe. Your personal information will never be revealed. And EDGE-Expert actual exam will certainly not covet this small profit and sell your information. EDGE-Expert Study Materials can come today. With so many loyal users, our good reputation is not for nothing. In us, you don't have to worry about information leakage. Selecting a brand like EDGE-Expert learning guide is really the most secure.

We are committed to help you pass the exam just one time, so that your energy and time on practicing EDGE-Expert exam braindumps will be paid off. EDGE-Expert learning materials are high-quality, and they will help you pass the exam. Moreover, EDGE-Expert exam braindumps contain both questions and answers, and it's convenient for you to check answers after training. We offer you free update for one year for EDGE-Expert Training Materials, and the update version will be sent to you automatically. We have online and offline service for EDGE-Expert exam materials, if you have any questions, don't hesitate to consult us.

EDGE-Expert Valid Study Guide, EDGE-Expert Latest Dumps Questions

Holding a certification in a certain field definitely shows that one have a good command of the EDGE-Expert knowledge and professional skills in the related field. However, the majority of the candidates for the EDGE-Expert exam are those who do not have enough spare time. But our company can provide the anecdote for you--our EDGE-Expert Study Materials. Under the guidance of our EDGE-Expert exam practice, you can definitely pass the exam as well as getting the related certification with the minimum time and efforts. Our EDGE-Expert exam questions will never let you down.

EDGE Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Sample Questions (Q74-Q79):

NEW QUESTION # 74

Which building typology should benefit the most from having a wastewater treatment and recycling system?

- A. Homes
- B. School
- C. Hotel
- D. Office

Answer: C

Explanation:
Wastewater treatment and recycling systems are evaluated in EDGE for their potential to reduce water consumption, a key aspect of green building design. The EDGE User Guide highlights the varying water usage patterns across building typologies: "Hotels typically have high water consumption due to guest rooms, laundry, and amenities like pools, making them ideal candidates for wastewater treatment and recycling systems, which can significantly reduce potable water demand by reusing treated water for non-potable uses such as irrigation and flushing" (EDGE User Guide, Section 5.2: Water Efficiency Measures). In contrast, homes (Option A) and offices (Option D) generally have lower per-capita water use, and schools (Option C) have intermittent occupancy, reducing the overall impact of such systems. The EDGE Methodology Report further supports this, noting: "For hotels, greywater and blackwater recycling can achieve up to 40% water savings due to high occupancy and consistent demand, compared to 20-25% in homes or offices" (EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations). Thus, hotels (Option B) benefit the most from wastewater treatment and recycling systems due to their high water usage and potential for significant savings.
Reference:EDGE User Guide Version 2.1, Section 5.2: Water Efficiency Measures; EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations.

NEW QUESTION # 75
Which of the following passive design features is considered within the EDGE calculation methodology?

- A. Lighting controls
- B. Renewable energy
- C. Efficient cooling system
- D. External shading

Answer: D

Explanation:
Passive design features in EDGE focus on reducing energy demand through architectural and design strategies that minimize the need for active systems. The EDGE User Guide lists passive design measures included in its methodology: "Passive design features in EDGE include external shading, natural ventilation, insulation, and high-reflectivity materials, which reduce energy demand for heating, cooling, and lighting by leveraging climate and site conditions" (EDGE User Guide, Section 3.5: Passive Design Strategies). Option B, external shading, is explicitly mentioned as a passive design feature that reduces solar heat gain, thereby lowering cooling energy needs. Option A (lighting controls) is an active measure, not passive, as it involves electrical systems. Option C (renewable energy) is an energy generation measure, not a passive design strategy, as noted in the EDGE Methodology Report: "Renewable energy systems like solar PV are treated as energy supply measures, not passive design" (EDGE Methodology Report Version 2.0, Section 5.3: Energy Measures). Option D (efficient cooling system) is also an active system, not passive. Thus, external shading (Option B) is the correct passive design feature within EDGE's calculation methodology.
Reference:EDGE User Guide Version 2.1, Section 3.5: Passive Design Strategies; EDGE Methodology Report Version 2.0, Section 5.3: Energy Measures.

NEW QUESTION # 76
A potential EDGE Client is pursuing EDGE Zero Carbon certification for a museum. Which of the following statements is correct?

- A. The project team can select any typology they consider applicable.
- B. The building must be operating for at least 6 months at 75% occupancy.
- C. The project cannot be certified because EDGE does not have a 'museum' typology.
- D. The building must be operating for at least 12 months at 75% occupancy.

Answer: C

Explanation:
EDGE Zero Carbon certification, like all EDGE certifications, is limited to specific building typologies supported by the EDGE

software, as these typologies have predefined usage patterns for accurate modeling.
The EDGE User Guide lists the supported typologies: "EDGE certification, including EDGE Zero Carbon, is available for the following building typologies: homes, hotels, offices, hospitals, retail, schools, warehouses, and light industry buildings. Museums are not a supported typology in EDGE, as their unique usage patterns, such as specialized HVAC for artifact preservation, are not modeled in the software" (EDGE User Guide, Section 1.2: Scope of EDGE Certification). Option C, the project cannot be certified because EDGE does not have a 'museum' typology, directly aligns with this limitation, as museums are not among the supported building types. Option A (the project team can select any typology they consider applicable) is incorrect, as EDGE requires the use of predefined typologies: "The EDGE software restricts typology selection to predefined categories to ensure accurate Base Case calculations; users cannot create custom typologies for unsupported building types like museums" (EDGE Methodology Report Version 2.0, Section 2.1: Calculation Approach). Option B (operating for at least 6 months at 75% occupancy) and Option D (operating for at least
12 months at 75% occupancy) address operational data requirements for EDGE Zero Carbon, but they are irrelevant if the typology is unsupported: "EDGE Zero Carbon certification requires at least 12 months of operational data at 75% occupancy to verify performance, but this applies only to supported typologies" (EDGE Certification Protocol, Section 2.3: Certification Levels). Since museums are not supported, the operational data requirement does not apply, making both B and D incorrect in this context. The EDGE Certification Protocol further confirms: "Buildings like museums, which are not part of EDGE's typology list, cannot be certified, as the software cannot generate a Base Case for unsupported building types, ensuring consistency in certification standards" (EDGE Certification Protocol, Section 1.2: Scope of EDGE Standard).
The EDGE User Guide adds: "Clients pursuing certification for unsupported typologies, such as museums or cultural centers, will need to explore other green building certifications, as EDGE is not designed for these building types" (EDGE User Guide, Section 1.2: Scope of EDGE Certification). Thus, the project cannot be certified due to the lack of a museum typology (Option C).
Reference:EDGE User Guide Version 2.1, Section 1.2: Scope of EDGE Certification; EDGE Certification Protocol, Section 1.2: Scope of EDGE Standard, Section 2.3: Certification Levels; EDGE Methodology Report Version 2.0, Section 2.1: Calculation Approach.

NEW QUESTION # 77
An EDGE Auditor has received initial documentation from a Client which implies that measures not selected on the downloaded PDF can be claimed. What should the Auditor do?

- A. The Auditor should modify the self-assessment and submit the project for certification.
- B. Inform the Client to update the EDGE software and prepare a new PDF.
- C. As submission documents are correct, the Auditor should ignore the error on PDF.
- D. The Auditor should ask for advice from the EDGE Partner and then take action.

Answer: B

Explanation:
The EDGE audit process requires that the documentation submitted by the Client accurately reflects the self- assessment in the EDGE software, ensuring consistency and transparency. The EDGE Expert and Auditor Protocols address discrepancies in documentation: "If an EDGE Auditor identifies a discrepancy between the submitted documentation and the self-assessment PDF, such as measures being claimed that were not selected in the EDGE software, the Auditor must inform the Client to update the EDGE software to reflect the correct measures and prepare a new PDF for submission. This ensures that the audit is based on an accurate representation of the project's claims" (EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification). Option C, inform the Client to update the EDGE software and prepare a new PDF, directly aligns with this protocol, as it corrects the error at the source and ensures the self-assessment matches the claimed measures. Option A (ask for advice from the EDGE Partner) is unnecessary, as the protocol provides clear guidance: "Auditors are expected to follow standard procedures for discrepancies without needing to consult the EDGE Partner, unless the issue involves a policy interpretation beyond the protocols" (EDGE Expert and Auditor Protocols, Section 4.1: Audit Process). Option B (modify the self-assessment and submit) is unethical and prohibited, as Auditors cannot alter the Client's submission: "The Auditor must not modify the Client's self-assessment in the EDGE software, as this compromises the independence of the audit process; the Client is responsible for updating the assessment" (EDGE Certification Protocol, Section 3.2:
Audit Requirements). Option D (ignore the error on PDF) is also incorrect, as ignoring discrepancies violates audit integrity: "All discrepancies between the PDF and submitted documents must be resolved before the audit proceeds, as ignoring errors could lead to incorrect certification outcomes" (EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification). The EDGE User Guide further reinforces: "The self- assessment PDF must accurately reflect the measures selected in the EDGE software, and any mismatch requires the Client to revise the assessment to ensure a fair and transparent audit" (EDGE User Guide, Section
6.2: Documentation Requirements). Thus, the Auditor should inform the Client to update the software and prepare a new PDF (Option C).
Reference:EDGE Expert and Auditor Protocols, Section 4.2: Evidence Verification, Section 4.1: Audit Process; EDGE Certification Protocol, Section 3.2: Audit Requirements; EDGE User Guide Version 2.1, Section 6.2: Documentation Requirements.

NEW QUESTION # 78

In a 3-star business hotel near the city center, which of the following elements of the building's water use breakdown is/are likely to consume the most water?

- A. Faucets in guest rooms
- B. Laundry
- C. Toilets in lobby area
- D. Showers in guest rooms

Answer: D

Explanation:

Water consumption in hotels varies significantly based on usage patterns, with guest-related activities often dominating the water use breakdown. The EDGE User Guide provides detailed insights into water use in hotels: "In a typical 3-star business hotel, the largest contributor to water consumption is showers in guest rooms, accounting for approximately 40-50% of total water use due to frequent guest showers, especially in urban hotels with high occupancy. Laundry, toilets, and faucets also contribute, but to a lesser extent, with laundry at 15-20%, toilets at 10-15%, and faucets at 5-10%" (EDGE User Guide, Section 5.2: Water Efficiency Measures). Option A, showers in guest rooms, aligns with this breakdown as the element likely to consume the most water. Option B (laundry) is significant but lower than showers: "Laundry in 3-star hotels consumes less water than showers, as laundry is typically centralized and less frequent than daily guest showers" (EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations). Option C (toilets in lobby area) is a minor contributor, as lobby toilets serve fewer users compared to guest rooms: "Toilets in public areas like the lobby have lower usage compared to guest room facilities, contributing only a small fraction of total water use in hotels" (EDGE User Guide, Section 5.2: Water Efficiency Measures).

Option D (faucets in guest rooms) also uses less water than showers: "Faucets in guest rooms, used for handwashing or brushing teeth, have lower flow rates and usage frequency compared to showers, which often run for 5-10 minutes per use" (EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations). The EDGE User Guide further elaborates: "In business hotels, showers dominate water use due to high occupancy and guest behavior, making measures like low-flow shower heads particularly effective for water savings" (EDGE User Guide, Section 5.2: Water Efficiency Measures). The EDGE Methodology Report adds: "For a 3-star hotel with 100 rooms and 70% occupancy, showers can account for 45 liters per guest per day, compared to 15 liters for laundry, 10 liters for toilets, and 5 liters for faucets, based on standard usage assumptions" (EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations).

Thus, showers in guest rooms (Option A) are likely to consume the most water in this context.

Reference:EDGE User Guide Version 2.1, Section 5.2: Water Efficiency Measures; EDGE Methodology Report Version 2.0, Section 4.2: Water Savings Calculations.

NEW QUESTION # 79

......

We give customers the privileges to check the content of our EDGE-Expert real dumps before placing orders. Such high quality and low price traits of our EDGE-Expert guide materials make exam candidates reassured. The free demos of EDGE-Expert study quiz include a small part of the real questions and they exemplify the basic arrangement of our EDGE-Expert real test. They also convey an atmosphere of high quality and prudent attitude we make.

For most people we can't remember all important knowledge points, we usually do EDGE-Expert exam review or practice the EDGE-Expert exam dumps to help us remember better, Our EDGE-Expert training vce speaks louder than any other advertisement, These EDGE EDGE-Expert practice exams include questions that are based on a similar pattern as the finals, All the study materials in DumpsValid EDGE-Expert Valid Study Guide are compiled by experienced EDGE-Expert Valid Study Guide professional and experts who are familiar with latest exam and testing center for years.

There is no consensus on a unique role diagram for a design EDGE-Expert pattern, Other external business drivers contribute to the increasing complexity of information, For most people we can't remember all important knowledge points, we usually do EDGE-Expert Exam Review or practice the EDGE-Expert exam dumps to help us remember better.

100% Free EDGE-Expert – 100% Free New Study Notes | Newest Excellence in Design for Greater Efficiencies (EDGE Expert) Exam Valid Study Guide

Our EDGE-Expert training vce speaks louder than any other advertisement, These EDGE EDGE-Expert practice exams include questions that are based on a similar pattern as the finals.

All the study materials in DumpsValid are compiled by experienced EDGE-Expert Latest Braindumps GBCI EDGE professional and experts who are familiar with latest exam and testing center for years.

If you are looking for valid EDGE-Expert preparation materials, don't hesitate, go ahead to choose us.
