

# High Pass-Rate FCP\_FMG\_AD-7.6 Exam Online Spend Your Little Time and Energy to Clear FCP\_FMG\_AD-7.6 exam easily

When preparing for the FCP\_FMG\_AD-7.6 exam, a good source of information is what candidates need most, and the price of the materials is one of the important factors to be considered when a candidate choosing. In contrast to most exam preparation materials available online, our FCP\_FMG\_AD-7.6 exam materials of Exam4Free can be obtained at a reasonable price so that each candidate who prepares to take the FCP\_FMG\_AD-7.6 exam can afford it. It will not let any one of the candidates be worried about the price issue, and its quality and advantages exceed all our competitors' similar products. We will never reduce the quality of our FCP\_FMG\_AD-7.6 Exam Questions because the price is easy to bear by candidates and the quality of our exam questions will not let you down. They will prove the best choice for your time and money.

## Fortinet FCP\_FMG\_AD-7.6 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                            |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.</li></ul>  |
| Topic 2 | <ul style="list-style-type: none"><li>Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.</li></ul>                                                         |
| Topic 4 | <ul style="list-style-type: none"><li>Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.</li></ul>                                        |
| Topic 5 | <ul style="list-style-type: none"><li>Troubleshooting</li></ul>                                                                                                                                                                                                                                                                                                                    |
| Topic 6 | <ul style="list-style-type: none"><li>Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a larger scale.</li></ul> |
| Topic 7 | <ul style="list-style-type: none"><li>Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.</li></ul>                 |

## Fortinet FCP\_FMG\_AD-7.6 PDF Dumps Files & FCP\_FMG\_AD-7.6 Reliable Braindumps Pdf

We believe that if you decide to buy the FCP\_FMG\_AD-7.6 exam materials from our company, you will pass your exam and get the FCP\_FMG\_AD-7.6 certification in a more relaxed way than other people.

### Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q32-Q37):

#### NEW QUESTION # 32

Refer to the exhibits.

#### Device Revision Diff wizard

#### CLI output

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE          OID   SN                HA      IP          NAME          ADOM  IPS          FIRMWARE  HW_GenX
fmgfz-managed 188   FGVMO2TM24013504 - 100.65.1.111 BR1-FGT-1    My_ADOM  7.0 MR6 (3401) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up; template:[installed]default
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[unknown]844-01-1
```

An administrator needed to recover all the configurations related to the user, Support. The configurations were saved in configuration revision ID 9.

The administrator reverted the configuration using the Configuration Revision History window and received the CLI output shown in the exhibit.

What can you conclude from the CLI output?

- A. The administrator needs to retrieve the device to correctly detect the FortiGate firmware version.
- B. The administrator installed only the device-level configuration.
- C. The administrator set the flag to 0 to prevent configuration overrides.
- D. The administrator reinstalled the policy package.

**Answer: A**

Explanation:

The CLI output shows the status "dev-db: not modified; conf: in sync; cond: OK; dmx installed," but the firmware version for the device is listed as "[unknown]." This indicates that FortiManager has not properly detected the FortiGate firmware version, likely because the device needs to be retrieved to update its information.

### NEW QUESTION # 33

Refer to the exhibits. An administrator needed to recover all the configurations related to the user, Support. The configurations were saved in configuration revision ID 9.

**Device Revision Diff wizard**

Revision ID: 11

Revision ID: 9

|          |       |          |       |
|----------|-------|----------|-------|
| Total    | 12696 | Total    | 12704 |
| Deleted  | 0     | Added    | 8     |
| Modified | 0     | Modified | 0     |

```
8500 (...)
end

8501 config user group
(...)
12154 set service "ALL"
12155 set comments "test"
(...)
```

```
8500 end
8501 config user local
8502 edit "Support"
8503 set type password
8504 set two-factor email
8505 set email-to "support@mail.com"
8506 next
8507 end
8508 config user group
(...)
12161 set service "ALL"
12162 set users "Support"
12163 set comments "test"
(...)
```

Save Diff as Script

Show Full Diff

Cancel

**CLI output**

```
FortiManager # diagnose dvm device list
--- There are currently 6 devices/vdoms managed ---
--- There are currently 6 devices/vdoms count for license ---

TYPE      OID  SN                HA  IP          NAME      ADOM  IPS          FIRMWARE  HW_GenX
fmgfaz-managed 188  FGV002TM24013504 - 100.65.1.111 BR1-FGT-1 My_ADOM 7.0 MR6 (3401) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: installed; conn: up; template:[installed]default
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[unknown]BR1-FGT-1
```

The administrator reverted the configuration using the Configuration Revision History window and received the CLI output shown in the exhibit.

What can you conclude from the CLI output?

- A. The administrator needs to retrieve the device to correctly detect the FortiGate firmware version.
- B. The administrator installed only the device-level configuration.
- C. The administrator set the flag to 0 to prevent configuration overrides.
- D. The administrator reinstalled the policy package.

**Answer: A**

Explanation:

The CLI output shows the status "dev-db: not modified; conf: in sync; cond: OK; dmx installed," but the firmware version for the device is listed as "[unknown]." This indicates that FortiManager has not properly detected the FortiGate firmware version, likely because the device needs to be retrieved to update its information.

### NEW QUESTION # 34

A service provider administrator has assigned a global policy package to a managed customer ADOM named My\_ADOM. The customer administrator has access only to My\_ADOM. How can the customer administrator edit the global header policy of the global policy package?

- A. The service provider administrator can unlock the global policy from the global ADOM to authorize changes to the customer administrator.
- B. The customer administrator can edit the header policy by using workflow mode on the global ADOM and My\_ADOM.
- C. The customer administrator can edit the header policy by using workspace mode on the global ADOM.
- **D. The customer administrator cannot edit the global header policy; only the service provider administrator can make changes from the global ADOM.**

**Answer: D**

Explanation:

The global policy package is managed only from the global ADOM by the service provider administrator. Customer administrators with access solely to their ADOM (My\_ADOM) cannot edit the global header policy; such changes must be made by the service provider administrator in the global ADOM.

### NEW QUESTION # 35

An administrator has assigned a global policy package to a new ADOM named ADOM1. What will happen if the administrator tries to create a new policy package in ADOM1?

- A. FortiManager will automatically install policies on the policy package in ADOM1.
- B. The administrator will have to assign the global policy package from the global ADOM.
- C. FortiManager will automatically assign the global policy package to the new policy package.
- **D. The administrator will be able to select the option to assign the global policy package to the new policy package.**

**Answer: D**

Explanation:

When a global policy package is assigned to an ADOM, administrators creating new policy packages within that ADOM have the option to select and assign the global policy package to the new policy package if desired.

### NEW QUESTION # 36

Refer to the exhibit.

An administrator created two new meta fields in FortiManager. Which operation can you perform with these parameters?

- A. You can invoke them using the \$ character.
- **B. You can add them to objects as custom attributes.**
- C. You can use them as variables in scripts.
- D. You can export them to be used in other ADOMs.

**Answer: B**

Explanation:

Meta fields in FortiManager can be added to objects as custom attributes, allowing administrators to categorize and add additional information to firewall objects for easier management and identification.

### NEW QUESTION # 37

FCP\_FMG\_AD-7.6 Practice Material is from our company which made these FCP\_FMG\_AD-7.6 practice materials with accountability. And FCP\_FMG\_AD-7.6 Training Materials are efficient products. What is more, FCP\_FMG\_AD-7.6 Exam Prep is appropriate and respectable practice material. We know making progress and getting the certificate of FCP\_FMG\_AD-7.6 Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. Our FCP\_FMG\_AD-7.6 exam prep has taken up a large part of market.
