FCP_FMG_AD-7.6 Reliable Dumps Ppt | FCP_FMG_AD-7.6 Certification Materials

IT elite team of our PracticeMaterial make a great effort to provide large numbers of examinees with the latest version of Fortinet's FCP_FMG_AD-7.6 exam training materials, and to improve the accuracy of FCP_FMG_AD-7.6 exam dumps. Choosing PracticeMaterial, you can make only half efforts of others to pass the same FCP_FMG_AD-7.6 Certification Exam. What's more, after you purchase FCP_FMG_AD-7.6 exam training materials, we will provide free renewal service as long as one year.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting
Topic 2	• This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 3	• Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

Topic 4	Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
---------	--

- **Administration:** This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q38-Q43):

Refer to the exhibit. An administrator assigned a new policy package to FortiGate HQ-NGFW-1.

FortiManager—HQ-NGFW-1 install preview

Based on the exhibit, which two things will happen if they continue with the installation? (Choose two.)

Answer: A,B

The configuration includes a server-list with server-type set to "update rating," which enables FortiGate HQ-NGFW-1 to contact FortiManager as a FortiGuard Distribution Server (FDS) for FortiGuard updates.

NEW QUESTION # 39

Refer to the exhibits.

Diagnose output

```
FortiManager # get system status
Platform Type           : FMG-VM64-KVM
Platform Full Name      : FortiManager-VM64-KVM
Version                 : v7.6.1-build3344 241023 (GA.M)
Serial Number           : FMG-VMTM24012945
BIOS version            : 04000002
```

Diagnose output

```
FortiManager # diagnose dvm device list
--- There are currently 5 devices/vdoms managed ---
--- There are currently 5 devices/vdoms count for license ---

|- vdom:[3]root flags:0 adom:My_ADOM pkg:[never-installed]

FortiManager # diagnose test deploymanager reloadconf 262
Retrieving configuration file from FGT...
Error: Configuration file import error.
```

An administrator runs the reload failure command `diagnose test deploymanager reloadconf 262` on FortiManager.

Why does the administrator receive an error message?

- A. The administrator must use the FortiGate name instead of the ID number.
- **B. The administrator just recently added FortiGate HQ-NGFW as a model device.**
- C. FortiManager does not support FortiOS version 7.0.
- D. FortiManager requires the FortiGate serial number instead of the ID number.

Answer: B

Explanation:

The error occurs because the FortiGate HQ-NGFW device with ID 262 is a newly added model device and has not yet been fully synchronized or installed with a configuration package, which causes the reload configuration command to fail.

NEW QUESTION # 40

Refer to the exhibit. If the monitored interface for the primary FortiManager device fails, what must you do to maintain high availability (HA)?

- A. Reconfigure the primary device to remove the peer IP address of the failed device from its configuration.
- B. Check the integrity database of the primary device to force a secondary device to become the new primary with all active interfaces.
- **C. The FortiManager HA failover is transparent to administrators and does not require any additional action.**
- D. Manually promote one of the working secondary devices to the primary role; and reboot the original primary device to remove the peer IP address of the failed device.

Answer: C

Explanation:

In a FortiManager HA cluster configured with VRRP failover, the failover process is automatic and transparent to administrators. If the monitored interface on the primary device fails, the secondary device takes over without requiring manual intervention to maintain HA.

NEW QUESTION # 41

Refer to the exhibit.

FortiManager is operating behind a network address translation (NAT) device, and the administrator configured the FortiManager NATed IP address under the FortiManager system administration settings.

What is the expected result during discovery?

- A. FortiManager sets both the 100.65.0.120 IP address and 100.65.0.101 IP address on FortiGate.
- **B. FortiManager sets the 100.65.0.120 IP address on FortiGate.**
- C. FortiManager sets both the 100.65.0.120 IP address and 10.0.13.120 IP address on FortiGate.

- D. FortiManager sets the 100.65.0.101 IP address on FortiGate.

Answer: B

Explanation:

When FortiManager is behind a NAT device, setting the NATed IP address (100.65.0.120) in the system admin settings causes FortiManager to use that NATed IP address for communication and configuration with FortiGate during discovery and management operations.

NEW QUESTION # 42

Refer to the exhibit.

FortiManager—HQ-NGFW-1 install preview

An administrator assigned a new policy package to FortiGate HQ-NGFW-1. In the installation preview, they noticed some settings they did not modify and are unsure about the changes.

Based on the exhibit, which two things will happen if they continue with the installation? (Choose two.)

- A. FortiManager will install the CA certificate named root_CA3 to authenticate FortiGate-to-FortiManager communication protocol (FGFM) tunnel connections with FortiGate HQ- NGFW-1.
- B. FortiGate HQ-NGFW-1 can contact the FortiManager acting as FortiGuard Distribution Server (FDS) to download FortiGuard updates.
- C. FortiGate HQ-NGFW-1 can use FortiManager firmware templates to upgrade firmware and ratings.
- D. FortiGate HQ-NGFW-1 will use the root CA3 certificate in firewall address objects or policies.

Answer: A,B

Explanation:

The configuration includes a server-list with server-type set to "update rating," which enables FortiGate HQ- NGFW-1 to contact FortiManager as a FortiGuard Distribution Server (FDS) for FortiGuard updates.

The installation includes a root_CA3 certificate, which FortiManager will install on FortiGate HQ-NGFW-1 to authenticate FGFM tunnel connections between the devices.

NEW QUESTION # 43

.....

If you have interests with our FCP_FMG_AD-7.6 practice materials, we prefer to tell that we have contacted with many former buyers of our FCP_FMG_AD-7.6 exam questions and they all talked about the importance of effective FCP_FMG_AD-7.6 practice material playing a crucial role in your preparation process. Our practice materials keep exam candidates motivated and efficient with useful content based wholly on the real FCP_FMG_AD-7.6 Guide materials.
