

High Pass-Rate HPE2-B04 Latest Questions | Easy To Study and Pass Exam at first attempt & Excellent HP HPE Solutions with VMware

Question: 2 of 25 **PARTIALLY CORRECT** Time Remaining: 16:29:19

Exhibit 1 Exhibit 2 Exhibit 3

Nurses' Notes

0900:
Client reports migraine headache started at 0430 this morning. Reports pain level at a 10 on a scale of 0 to 10. Client has been using an over-the-counter migraine medication for 5 years that usually relieves pain to a 2 or 3 on a 0 to 10 scale. Reports nausea, unrelieved after vomiting once this morning.

1050:
Client reports pain at 2 on a scale of 0 to 10. Reports no nausea currently.

1130:
Provided education about new prescription for sumatriptan.

Before the client leaves the office, the provider prescribes a new medication for the client to use for migraine headaches. Which of the following instructions should the nurse include when teaching the client about administration of their newly prescribed medication?

Select all that apply.

- ☐ Take 1 dose per day to prevent migraine.
- ☒ Administer one nasal spray into each nostril.
- ☒ Take the medication after onset of the migraine.
- ☐ Administer the tablet to dissolve under the tongue.
- ☒ Repeat the dose if the headache returns.

PARTIALLY CORRECT My Answer

The client should use sumatriptan, a serotonin agonist for abortive therapy of migraine headaches after the onset of a migraine headache. They should spray the medication once into one nostril. They may repeat the dose once, 1 hr after the initial dose by the intranasal route.
