UiPath UiPath-TAEPv1 Exam Syllabus Topics:

Topic	Details
Topic 1	• UiPath Studio - Test Activities and Workflow Best Practices: This section of the exam measures the skills of Test Automation Engineers and evaluates knowledge of using verification activities and test-specific functions within UiPath Studio. It involves working with test data generation, document attachments in test cases, and applying workflow analyzer rules for stable collaboration. It also includes mock testing to isolate test case components and ensure focused validations.
Topic 2	• UiPath Test Suite Architecture and API Integrations: This section of the exam measures the skills of Test Automation Engineers and covers the fundamental capabilities of UiPath Test Suite in automating different types of testing such as UI, API, and data-driven testing. It includes an overview of Test Suite tools and how they integrate with each other, as well as with third-party application lifecycle management (ALM) tools through APIs. Candidates are expected to understand API testing concepts and how external tools can be connected for requirement synchronization, defect management, and test case tracking.
Topic 3	• Testing Process: This section of the exam measures the skills of Test Automation Engineers and focuses on applying best practices in test case design and execution. It outlines the importance of structured application testing in UiPath and emphasizes quality assurance through automation.

Topic 4	• UiPath Test Manager: This section of the exam measures the skills of Test Automation Engineers and focuses on using UiPath Test Manager for managing test lifecycles. It includes actions like defining custom fields, managing access, importing • exporting projects, and documenting manual steps using UiPath Task Capture. It also explains how to analyze test results, handle execution re-runs, manage KPIs, and create defects for failed test cases, along with troubleshooting common errors.:
Topic 5	• UiPath Studio - Data-driven Testing: This section of the exam measures the skills of RPA Developers and centers around managing test data variations using data-driven testing approaches. It explains how to add test data through queues, activities, or data sources, and how to create reusable test cases based on this data. The section also highlights connecting UiPath Studio projects to Test Manager to enhance traceability and visibility of test progress.
Topic 6	• UiPath Robot: This section of the exam measures the skills of RPA Developers and explains the role of testing robots and their connectivity with UiPath Orchestrator. It discusses the execution of test cases using both on-premises and cloud-based robots and highlights how different robot types support automation testing in a scalable environment.
Topic 7	• CI • CD Implementation: This section of the exam measures the skills of RPA Developers and introduces the concepts of Continuous Integration and Continuous Delivery (CI • CD). It covers how to implement pipelines and perform tasks using the UiPath Command Line Interface (CLI) for streamlined and automated deployments of test workflows and processes.

UiPath Test Automation Engineer Professional v1.0 Sample Questions (Q110-Q115):

NEW QUESTION # 110

How can the results of a test case be overridden in Test Manager?

- A. Go to Test Results, select a test case and then use the Override tool in the toolbar.
- B. Select the test case from the Results tab and click on Override result.
- C. Navigate to Test Results, click on Test Manager settings and then select Override test results feature.
- **D. Navigate to Test Results, open a test result, open a test case log and then select Tasks > Override result.**

Answer: D

Explanation:

To override the results of a test case in Test Manager, navigate to Test Results, open a specific test result, then open the related test case log and select Tasks > Override result. This allows manual correction of results if needed for traceability or reporting accuracy.

NEW QUESTION # 111

What is the difference between RPA testing and application testing?

- A. RPA testing and application testing are the same thing, the term used simply depends on the specific software involved.
- B. RPA testing evaluates human interactions with software, while application testing checks robotic processes.
- C. RPA testing checks the functionality of a software application, but application testing evaluates the performance of robots.

- D. RPA testing involves checking the quality of robotic processes, whereas application testing checks the functionality of software applications.

Answer: D

Explanation:

The key difference is that RPA testing focuses on verifying the quality and correctness of robotic processes (automations), while application testing verifies the functionality of the underlying software applications being automated.

NEW QUESTION # 112

What does the Total Coverage KPI from the UiPath Test Manager Dashboard measure?

- A. The percentage of projects in an organization that have at least one test case out of the total number of projects in that organization.
- B. The percentage of projects in a tenant that have at least one test case out of the total number of projects in that tenant.
- C. The percentage of requirements that have at least one test case out of the total number of requirements.
- D. The percentage of manual test cases that are also automated.

Answer: C

Explanation:

The Total Coverage KPI in the UiPath Test Manager Dashboard measures the percentage of requirements that have at least one test case linked to them, out of the total number of requirements. It reflects how well the requirements are being tested.

NEW QUESTION # 113

What programming language can be used in Coded Workflows?

- A. VBScript
- B. C#
- C. C# and VB.Net
- D. VB.Net

Answer: C

Explanation:

In Coded Workflows within UiPath, both C# and VB.Net can be used as programming languages. These languages provide flexibility for developers to write complex logic that cannot be achieved with the standard UiPath activities.

NEW QUESTION # 114

Here's a more structured interpretation of the options:

- A. The pre-defined user roles that can perform re-executions are: Test Manager, Test Executor and Manual Tester.
- B. Only the Test Executor can perform re-executions.
- C. Only the Test Manager can perform re-executions.
- D. Any user with access to the Test Manager can perform re-executions.

Answer: A

Explanation:

In UiPath Test Manager, the ability to re-execute test executions is granted to specific pre-defined user roles, including Test Manager, Test Executor, and Manual Tester. These roles are designed to manage and validate test runs as part of the testing lifecycle.
