

High Pass-Rate Valid Dumps C_AIG_2412 Questions - Win Your SAP Certificate with Top Score

The paper materials students buy on the market are often not able to reuse. After all the exercises have been done once, if you want to do it again you will need to buy it again. But with C_AIG_2412 test question, you will not have this problem. All customers who purchased C_AIG_2412 study tool can use the learning materials without restrictions, and there is no case of duplicate charges. For the PDF version of C_AIG_2412 test question, you can print multiple times, practice multiple times, and repeatedly reinforce your unfamiliar knowledge. For the online version, unlike other materials that limit one person online, C_AIG_2412 learning dumps does not limit the number of concurrent users and the number of online users. You can practice anytime, anywhere, practice repeatedly, practice with others, and even purchase together with others. C_AIG_2412 learning dumps make every effort to help you save money and effort, so that you can pass the exam with the least cost.

Being the most competitive and advantageous company in the market, our C_AIG_2412 practice quiz have help tens of millions of exam candidates realize their dreams all these years. If you are the dream-catcher, we are willing to offer help with our C_AIG_2412 Study Guide like always. And if you buy our C_AIG_2412 exam materials, then you will find that passing the exam is just a piece of cake in front of you.

Free PDF Quiz High-quality SAP - Valid Dumps C_AIG_2412 Questions

Choose C_AIG_2412 premium files, you will pass for sure. Each questions & answers of C_AIG_2412 free training pdf are edited and summarized by our specialist with utmost care and professionalism. The SAP C_AIG_2412 latest online test is valid and really trustworthy for you to rely on. The highly relevant content & best valid and useful C_AIG_2412 Exam Torrent will give you more confidence and help you pass easily.

SAP C_AIG_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	Large Language Models (LLMs): This section of the exam measures the skills of AI Developers and covers the practical use of large language models in SAP environments. Candidates are expected to understand how LLMs can be applied to automate tasks, enhance decision-making, and improve user interaction within SAP systems. The exam evaluates knowledge of handling model selection, fine-tuning, and adapting LLMs to specific business cases.
Topic 2	Advanced AI Techniques with SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers advanced techniques available through SAP's Generative AI Hub. Candidates are assessed on their ability to design, optimize, and scale generative AI solutions that go beyond basic implementations. The focus includes applying sophisticated strategies to integrate advanced models, manage performance, and align AI-driven outcomes with complex enterprise goals.

Topic 3	• SAP AI Core: This section of the exam measures the skills of AI Developers and covers the fundamental components of SAP AI Core. Candidates are assessed on their ability to work with the core services that allow machine learning models to be deployed and managed within SAP environments. The focus is on understanding how AI Core fits into SAP's ecosystem and ensures smooth integration with enterprise applications.
Topic 4	• SAP's Generative AI Hub: This section of the exam measures the skills of Solution Architects and covers SAP's Generative AI Hub, which acts as the central layer for designing and managing generative AI solutions. The exam tests knowledge of building, deploying, and connecting AI models to business scenarios through the Hub. Emphasis is placed on leveraging the Hub to streamline workflows and ensure scalable solutions that align with organizational needs.

SAP Certified Associate - SAP Generative AI Developer Sample Questions (Q35-Q40):

NEW QUESTION # 35

What can be done once the training of a machine learning model has been completed in SAP AICore? Note: There are 2 correct answers to this question.

- A. The model can be deployed for inferencing.
- B. The model can be registered in the hyperscaler object store.
- C. The model's accuracy can be optimized directly in SAP HANA.
- D. The model can be deployed in SAP HANA.

Answer: A,B

Explanation:

Once the training of a machine learning model has been completed in SAP AI Core, several post-training actions can be undertaken to operationalize and manage the model effectively.

1. Deploying the Model for Inferencing:

* Deployment Process: After training, the model can be deployed as a service to handle inference requests. This involves setting up a model server that exposes an endpoint for applications to send data and receive predictions.

* Integration: The deployed model can be integrated into business applications, enabling real-time decision-making based on the model's predictions.

NEW QUESTION # 36

How do resource groups in SAP AI Core improve the management of machine learning workloads?

Note: There are 2 correct answers to this question.

- A. They ensure workload separation for different tenants or departments.
- B. They enable simultaneous orchestration of Kubernetes clusters.
- C. They enhance pipeline execution speeds through workload distribution.
- D. They provide isolation for datasets and AI artifacts.

Answer: A,D

NEW QUESTION # 37

You want to use the orchestration service through SAP's generative-AI-hub-sdk.

What does the following code do?

```
from gen_ai_hub.orchestration.models.llm import LLM
```

```
llm =
```

```
LLM(name="gpt-4o", version="latest", parameters={"max_tokens": 256, "temperature": 0.2})
```

- A. Create the Orchestration Configuration
- B. Run the Orchestration Request
- C. Define the LLM

- D. Define the Template and Default Input Values

Answer: C

NEW QUESTION # 38

Which of the following statements accurately describe the RAG process? Note: There are 2 correct answers to this question.

- A. The user's question is used to search a knowledge base or a set of documents.
- B. The embedding model stores the generated answers for future reference.
- C. The LLM directly answers the user's question without accessing external information.
- D. The retrieved content is combined with the LLM's capabilities to generate a response.

Answer: A,D

Explanation:

Retrieval-Augmented Generation (RAG) is a process that enhances the capabilities of Large Language Models (LLMs) by integrating external knowledge sources into the response generation process.

1. Understanding the RAG Process:

* User Query: The process begins with a user's question or prompt, which serves as the input for the system.

* Retrieval Step: The system uses the user's query to search a knowledge base or a set of documents, retrieving relevant information that can inform the response.

* Integration with LLM: The retrieved content is then combined with the LLM's inherent knowledge and language generation capabilities to produce a comprehensive and contextually relevant response.

2. Benefits of the RAG Process:

* Enhanced Accuracy: By incorporating up-to-date and domain-specific information from external sources, RAG improves the accuracy of AI-generated responses.

* Contextual Relevance: The integration of retrieved data ensures that the responses are more aligned with the specific context of the user's query.

3. Application in SAP's Generative AI Hub:

* Generative AI Hub SDK: SAP provides a Generative AI Hub SDK that facilitates the implementation of RAG by enabling seamless integration of retrieval mechanisms with LLMs.

* Tutorials and Resources: SAP offers tutorials, such as "Retrieval Augmented Generation using generative-ai-hub-sdk and HANA vector search," to guide developers in implementing RAG systems effectively.

NEW QUESTION # 39

Which of the following must you do before connecting to a dataset in order to train a machine learning model in SAP AI Core?

Note: There are 2 correct answers to this question.

- A. Provide the storage secret to access the dataset.
- B. Grant access rights to the SAP BTP cockpit.
- C. Store the dataset in the SAP HANA Vector Engine.
- D. Store the dataset in a hyperscaler object store.

Answer: A,D

NEW QUESTION # 40

.....

It-Tests is a platform that will provide candidates with most effective C_AIG_2412 study materials to help them pass their C_AIG_2412 exam. It has been recognized by all of our customers, because it was compiled by many professional experts of our website. Not only did they pass their C_AIG_2412 Exam but also got a satisfactory score. These are due to the high quality of our C_AIG_2412 study torrent that leads to such a high pass rate as more than 98%. You will never feel disappointment about our C_AIG_2412 exam questions.
