We have 24/7 Service Online Support services, and provide professional staff Remote Assistance. Besides, if you need an invoice of our C_ACDET_2506 practice materials please specify the invoice information and send us an email. Online customer service and mail Service is waiting for you all the time. And you can download the trial of our C_ACDET_2506 training engine for free before your purchase. This kind of service shows our self-confidence and actual strength about C_ACDET_2506 study materials in our company. And you will pass your C_ACDET_2506 exam for sure with our best C_ACDET_2506 study guide.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	<ul style="list-style-type: none">• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

SAP C_ACDET_2506 Valid Test Dumps: SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite - TorrentExam Help you Prepare Exam Easily

Just like the old saying goes: "Practice is the only standard to testify truth", which means learning of theory ultimately serves practical application, in the same way, it is a matter of common sense that pass rate of a kind of C_ACDET_2506 exam torrent is the only standard to testify whether it is effective and useful. I believe that you already have a general idea about the advantages of our SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite exam question, but now I would like to show you the greatest strength of our C_ACDET_2506 Guide Torrent --the highest pass rate. According to the statistics, the pass rate among our customers who prepared the exam under the guidance of our C_ACDET_2506 guide torrent has reached as high as 98% to 100% with only practicing our C_ACDET_2506 exam torrent for 20 to 30 hours.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q48-Q53):

NEW QUESTION # 48

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Realize
- B. Configure
- C. Deploy
- D. Setup

Answer: A

Explanation:

The Realize phase is where the core configuration activities happen. During Realize, the project team sets up system parameters, creates templates, defines master data fields, and configures business processes in the SAP Ariba Strategic Sourcing suite. This phase includes building, unit testing, and preparing the system for user acceptance testing. Deploy is focused on cutover and go-live, while Configure and Setup are not formal SAP Activate phases for Ariba.

NEW QUESTION # 49

Which key technical activities occur during the Deploy phase? (Select 3 correct answers)

- A. Go-live
- B. Apply the bundle in production
- C. Rebuild all custom header fields in production
- D. Migration to production
- E. Execute change management plans

Answer: A,B,D

Explanation:

During the Deploy phase, key technical activities include:

* A. Apply the bundle in production: Using Intelligent Configuration Manager (ICM) to migrate configuration bundles to the production environment.

* B. Go-live: Transitioning from project mode to operational live usage of the SAP Ariba solution.

* D. Migration to production: Performing final configuration migration, data loads, and cutover activities per the deployment plan. Rebuilding custom header fields manually (C) is not required because configuration is migrated rather than rebuilt. Executing

change management plans (E) is important but considered a business/change activity, not a technical migration activity. These technical tasks ensure the system is correctly configured and operationally ready for end users.

NEW QUESTION # 50

What does ? represent in the ariba expression below? HierarchicalType="SubAgreement" ? false: true

- A. then
- B. replace
- C. if
- D. else

Answer: A

NEW QUESTION # 51

Which key technical activities occur during the Deploy phase? Note: There are 3 correct answers to this question.

- A. Go-live
- B. Apply the bundle in production
- C. Rebuild all custom header fields in production
- D. Migration to production
- E. Execute change management plans

Answer: A,B,D

NEW QUESTION # 52

You need to revise a published form template. What steps do you follow?

- A. Edit directly in production
- B. Clone and change ID
- C. Delete and recreate
- D. Create a new version, edit, test, and publish

Answer: D

Explanation:

SAP Ariba requires that revisions to published form templates be handled through creating a new version of the template, then editing and testing the draft version before publishing it. The system maintains the prior published version active while you work on the new draft, ensuring no disruption. Cloning and changing IDs is unnecessary and not best practice. Direct edits on published templates are not permitted, and deleting and recreating loses version history and control. This versioning mechanism supports safe, auditable template changes.

NEW QUESTION # 53

.....

Are you planning to attempt the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam of the C_ACDET_2506 certification? The first hurdle you face while preparing for the SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C_ACDET_2506) exam is not finding the trusted brand of accurate and updated C_ACDET_2506 exam questions.
