## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q14-Q19):

### NEW QUESTION # 14

Which process step can automatically create a quality notification?

- A. Making a UD
- B. Creation of quality info record
- C. Creation of an inspection Lot
- **D. Characteristics result recording**

**Answer: D**

### NEW QUESTION # 15

A quality info record is released for the purchase of a material from a supplier. In what ways can you restrict the release? Note: There are 2 correct answers to this question.

- **A. Until the supplier has provided a quality certificate, by entering a certificate type**
- **B. To a quantity, by entering a release quantity**
- C. To a period of time, by supplying a release date
- D. Until the supplier quality score is better than a threshold, by entering the minimum threshold

**Answer: A,B**

Explanation:

The quality info record: Procurement (transaction QI01/QI02) manages supplier-material relationships and can impose release restrictions:

\* To a Quantity, by Entering a Release Quantity (A): In the quality info record, you can set a "Release Quantity" field to limit the approved purchase quantity (e.g., 100 units). Once exceeded, further approval is needed, a standard feature.

\* Until the Supplier Has Provided a Quality Certificate, by Entering a Certificate Type (B): You can specify a certificate type (e.g., "ISO 9001") in the "Certificate" field, blocking release until the supplier provides it, verified during goods receipt.

\* To a Period of Time, by Supplying a Release Date (C): While validity dates exist, they define the record's lifespan, not a specific release restriction mechanism.

\* Until the Supplier Quality Score is Better Than a Threshold (D): Quality scores influence supplier evaluation but aren't directly set as a release condition in the info record.

Thus, "A" and "B" are the correct answers, reflecting standard SAP QM functionality. References: SAP Help Portal - "Quality Info Record: Procurement"; SAP S/4HANA QM User Guide - "Supplier Release".

### NEW QUESTION # 16

During the production inspection, which elements does the system use to determine the layout of results and defects recordings?  
Note : 3 correct answer

- A. Partner profiles
- **B. Confirmation profiles**
- C. Status profiles
- **D. Code groups**
- **E. Report type**

**Answer: B,D,E**

#### NEW QUESTION # 17

You have created a customer business partner in Sales and Distribution. What are some of the options available for an outbound quality inspection? Note: There are 2 correct answers to this question.

- A. The inspection occurs after creation of the sales order
- B. The inspection occurs after release of the sales order
- **C. The inspection is skipped**
- **D. The inspection occurs before the goods issue is posted**

**Answer: C,D**

Explanation:

Outbound quality inspections (e.g., inspection type 10) in Sales and Distribution (SD) occur for deliveries:

\* The Inspection is Skipped (A): If no inspection type (e.g., 10) is active in the material master or quality info record: SD, the inspection can be skipped, a valid option in standard SAP.

\* The Inspection Occurs Before the Goods Issue is Posted (D): For inspection type 10, the inspection lot is created with the delivery (before goods issue, transaction VL02N), allowing inspection before stock is moved (standard process).

\* After Release of the Sales Order (B): Inspections are tied to deliveries, not sales order release.

\* After Creation of the Sales Order (C): Inspection lots are not created at SO creation; they require a delivery.

Thus, "The inspection is skipped" and "The inspection occurs before the goods issue is posted" are the correct answers. References: SAP Help Portal - "Outbound Inspections in QM"; SAP S/4HANA QM User Guide - "SD Integration".

#### NEW QUESTION # 18

After you create customer master records, you define second inspection related default specification in the ....  
Which of the followings options can you use to control when the quality inspection take place (2 correct ans)

- A. The inspection occurs after the transport order is quit.
- **B. The inspection occurs after the good issue in posted**
- **C. The inspection occurs before the good issue in posted**
- D. The inspection occurs after the release of the sales order

**Answer: B,C**

#### NEW QUESTION # 19

.....
