

High-quality Exam FCP_FGT_AD-7.6 Pattern | Easy To Study and Pass Exam at first attempt & Reliable

FCP_FGT_AD-7.6: FCP - FortiGate 7.6 Administrator

Ortho NCLEX Questions

Study online at: <https://studycart24.com/>

vegetables, pasta, broccoli
C. Green vegetables, sardines, salmon with bone, molasses
D. Fresh fruits, English muffins, black beans, asparagus

as fresh fruits, English muffins, black beans, and asparagus are inadequate in calcium.

3. A patient with osteoporosis has been advised to increase the amount of calcium in her diet. Which food provides the most calcium?
An 8-oz glass of milk
An ounce of cheddar cheese
A half cup of raw broccoli
A 4-ounce salmon croquette
- Answer A is correct. An 8-ounce glass of milk contains 290mg of calcium. Answers B, C, and D contain lesser amounts; therefore, they are incorrect. (Note: An ounce of cheddar cheese contains 205 mg of calcium; half a cup of raw broccoli contains 175mg of calcium; and 4 ounces of salmon croquette contains 165 mg of calcium).
4. Which of the following instructions should be included for the patient taking calcium supplements?
A. The patient should take her calcium with meals
B. The patient should take all her daily calcium supplements at one time
C. The patient should take her calcium supplement after meals to prevent stomach upset
D. The patient can use calcium-based antacids for supplement.
- Rationale: Answer D is correct. Many people prefer to supplement their calcium intake with calcium-based antacids. If calcium supplements are used, they should be administered 30 minutes before meals to maximize absorption, so answer A is wrong. Calcium absorption is better if it is administered throughout the day rather than in a single dose, making answer B wrong. Calcium supplements do not cause stomach upset, so answer C is wrong.

2/28

Now is not the time to be afraid to take any more difficult certification exams. Our FCP_FGT_AD-7.6 learning quiz can relieve you of the issue within limited time. Our website provides excellent FCP_FGT_AD-7.6 learning guidance, practical questions and answers, and questions for your choice which are your real strength. You can take the FCP_FGT_AD-7.6 Training Materials and pass it without any difficulty. As long as you can practice FCP_FGT_AD-7.6 study guide regularly and persistently your goals of making progress and getting certificates smoothly will be realized just like a piece of cake.

The price of Our FCP_FGT_AD-7.6 practice guide is affordable, and you can always find that from time to time, we will give some promotion for our worthy customers. Meanwhile, we provide the wonderful service before and after the sale to let you have a good understanding of our FCP_FGT_AD-7.6 Study Materials. Our service are working at 24/7 online to give you the best and the most professional guidance on our FCP_FGT_AD-7.6 learning braindumps.

Efficient Exam FCP_FGT_AD-7.6 Pattern & Leader in Qualification Exams & Marvelous Fortinet FCP - FortiGate 7.6 Administrator

I know your time is very valuable. We guarantee that you can download our products FCP_FGT_AD-7.6 exam questions

immediately after payment is successful. After your current page shows that the payment was successful, you can open your e-mail address. Our system will send you a link to use FCP_FGT_AD-7.6 Guide quiz within five to ten minutes. Then you can study with our FCP_FGT_AD-7.6 preparation materials right away.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 2	VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.
Topic 3	Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.
Topic 4	Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.
Topic 5	Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q26-Q31):

NEW QUESTION # 26

A FortiGate firewall policy is configured with active authentication, however, the user cannot authenticate when accessing a website. Which protocol must FortiGate allow even though the user cannot authenticate?

- A. TACASC+
- **B. DNS**
- C. Kerberos
- D. LDAP

Answer: B

Explanation:

DNS traffic must be allowed so the user can resolve domain names and reach the authentication server or web resources, even if authentication initially fails.

NEW QUESTION # 27

Refer to the exhibit.

The NOC team connects to the FortiGate GUI with the NOC_Access admin profile. They request that their GUI sessions do not disconnect too early during inactivity.

What must the administrator configure to answer this specific request from the NOC team?

- A. Move NOC_Access to the top of the list to ensure all profile settings take effect.
- B. Increase the offline value of the Override Idle Timeout parameter in the NOC_Access admin profile.
- C. Ensure that all NOC_Access users are assigned the super_admin role to guarantee access
- D. Increase the admin timeout value under config system accprofile NOC_Access.

Answer: D

Explanation:

The admin timeout setting in the admin access profile controls the inactivity timeout for GUI sessions. Increasing this value will extend the session duration before automatic disconnection.

NEW QUESTION # 28

Refer to the exhibit.

As an administrator you have created an IPS profile, but it is not performing as expected. While testing you got the output as shown in the exhibit.

What could be the possible reason of the diagnose output shown in the exhibit?

- A. Administrator entered the command diagnose test application ipsmonitor 5.
- B. Administrator entered the command diagnose test application ipsmonitor 99.
- C. FortiGate entered into IPS fail open state.
- D. There is a no firewall policy configured with an IPS security profile.

Answer: D

Explanation:

The output shows the IPS engine count as 0, indicating no active IPS engines are running. This typically means no firewall policy is referencing the IPS security profile, so the IPS profile is not being applied or triggered.

NEW QUESTION # 29

Refer to the exhibits.

HA configuration

```
HQ-NGFW-1 # config system ha

HQ-NGFW-1 (ha) # show
config system ha
  set group-id 5
  set group-name "Training"
  set mode a-p
  set password ENC a4fbyqY4iPexFmAnZgzDY
  set hbdev "port7" 0
  set session-pickup enable
  set override disable
  set priority 200
  set monitor "port1"
  set memory-based-failover enable
  set memory-failover-threshold 70
  set memory-failover-monitor-period 50
  set memory-failover-sample-rate 10
  set memory-failover-flip-timeout 60
end
```

HQ-NGFW-1 System Performance output

```
HQ-NGFW-1 # get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq

Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 10 hours, 50 minutes
```

FORTINET

An administrator has observed the performance status outputs on an HA cluster for 55 seconds.
Which FortiGate is the primary?

- A. HQ-NGFW-2 with the parameter memory-failover-threshold setting
- B. HQ-NGFW-2 with the parameter priority setting
- C. HQ-NGFW-1 with the parameter memory-failover-flip-timeout setting
- **D. HQ-NGFW-1 with the parameter override setting**

Answer: D

Explanation:

The HA configuration shows that override is disabled (set override disable), but despite this, HQ-NGFW-1 has the higher priority (200) and is acting as the primary, as indicated by its higher resource usage and uptime.

Override allows the device with higher priority to take over as primary, so HQ-NGFW-1 is the primary device.

NEW QUESTION # 30

Refer to the exhibit, which shows an SD-WAN zone configuration on the FortiGate GUI.

Based on the exhibit, which statement is true?

- A. The virtual-wan-link and overlay zones can be deleted.
- **B. The Underlay zone is the zone by default.**
- C. The Underlay zone contains no member.
- D. port2 and port3 are not assigned to a zone.

Answer: B

Explanation:

The Underlay zone is the default SD-WAN zone, typically representing the physical interfaces in the SD-WAN configuration before overlay or virtual links are added.

NEW QUESTION # 31

.....

It is known to us that our FCP_FGT_AD-7.6 learning dumps have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the FCP_FGT_AD-7.6 training files. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification. So if you buy the FCP_FGT_AD-7.6 study questions from our company, you will get the certification in a shorter time.
