It is quite convenient to study with our UiPath-ABAv1 study materials. If you are used to study with paper-based materials you can choose the PDF version which is convenient for you to print. If you would like to get the mock test before the real UiPath-ABAv1 exam you can choose the software version, and if you want to study in anywhere at any time then our online APP version is your best choice since you can download it in any electronic devices. And the price of our UiPath-ABAv1 learning guide is favorable.

UiPath Certified Professional Automation Business Analyst Professional v1.0 Sample Questions (Q125-Q130):

NEW QUESTION # 125

What is UiPath AI Center primarily used for?

- A. To exclusively create and manage simple automation scripts without ML integration.
- B. To manage multiple automations and their execution across different robotic systems.
- C. To transform data into real-time, actionable insights, primarily used for creating interactive dashboards and reports.
- D. To deploy, manage, and continuously improve Machine Learning models and consume them within RPA workflows in Studio.

Answer: D

Explanation:

Understanding UiPath AI Center:

AI Center is a platform for deploying, managing, and optimizing Machine Learning models. These models can be seamlessly integrated into RPA workflows using UiPath Studio, enhancing automation capabilities with AI.

Why Option D is Correct:

It bridges the gap between AI and RPA by enabling the integration of ML models directly into automations.

Why Other Options Are Incorrect:

Option A: AI Center focuses on ML integration, not simple automation scripts.

Option B: Insights, not AI Center, is used for dashboards and reports.

Option C: Managing automations is a function of Orchestrator, not AI Center.

This capability allows organizations to harness the power of AI for complex automation scenarios.

NEW QUESTION # 126

What is the correct order of the stages of Process Documentation?

Instructions: Drag and Drop the items on the left to the boxes on the right in a correct order.

Stages

- Update the document by including more scenarios and business rules and validate it with the Process Owner
- Gather all the process information and data
- Prepare the PDD and include any support material that would detail the business rules, roles matrix, the input & output etc
- Prepare the detailed Level 4 process map (including all scenarios) for the As-Is process
- Prepare a high-level process map with process description

Answer Area

1st

2nd

3rd

4th

5th

Answer:

Explanation:

NEW QUESTION # 127

Can an attended user run multiple processes in parallel in Assistant?

- A. No, only one process can run in Assistant at a time
- B. Yes. multiple foreground and background processes
- C. Yes. but only multiple background processes
- D. Yes. but only one foreground process and multiple background processes

Answer: D

Explanation:

In UiPath Assistant, an attended user can run multiple processes in parallel, but only one foreground process and multiple background processes at the same time. This setup allows users to interact with a single process actively while other processes operate in the background, optimizing productivity without compromising user experience. References: UiPath Documentation on UiPath Assistant at <https://docs.uipath.com/>.

NEW QUESTION # 128

What does a Business Logic Translation Table do?

- A. Capture every action performed by the SME on the application layer
- B. List the business rules and use them as reference in the As-Is process description
- C. Capture short video recordings
- D. Process activities detailed at key stroke level with respective screen shots captured

Answer: B

Explanation:

A Business Logic Translation Table lists the business rules and uses them as a reference in the As-Is process description. This table is essential for translating complex business rules into understandable and actionable items that can be incorporated into the automated process, ensuring that all business requirements are met accurately. References: UiPath Documentation on Business Logic Translation at <https://docs.uipath.com/>.

NEW QUESTION # 129

How many samples are recommended to train a custom ML model that has one custom extra field?

- A. 50-90 document samples
- **B. 20-50 document samples**
- C. 5-10 document samples
- D. 5-20 document samples

Answer: B

Explanation:

To train a custom Machine Learning (ML) model that includes one custom extra field, it is recommended to use between 20 to 50 document samples. This range provides a sufficient amount of data to ensure the model can learn effectively while accommodating the variability introduced by the additional custom field

NEW QUESTION # 130

.....

With the rapid development of the world economy, it has been universally accepted that a growing number of people have longed to become the social elite. The UiPath-ABAv1 latest study guide materials will be a shortcut for a lot of people who desire to be the social elite. If you try your best to prepare for the UiPath-ABAv1 Exam and get the related certification in a short time, it will be easier for you to receive the attention from many leaders of the big company like us, and it also will be very easy for many people to get a decent job in the labor market with the help of our UiPath-ABAv1 learning guide.
