# Highly-demanded 1Z1-771 Exam Braindumps demonstrate excellent Learning Questions - Dumpkiller

One of the best features of Oracle 1Z1-771 exam dumps is its discounted price. Our Oracle 1Z1-771 Exams prices are entirely affordable for everyone. We guarantee you that no one can beat us in terms of 1Z1-771 Exam Dumps prices. Get any Oracle 1Z1-771 exam dumps format and start preparation with confidence.

## Oracle 1Z1-771 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences. |
| Topic 2 | • Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development. |
| Topic 3 | • Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development. |

| Topic 4 | • Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX. |
|---|---|
| Topic 5 | • Creating and Using Forms: This section evaluates the proficiency of Form Developers in designing user-friendly forms. It covers creating interactive grids, developing simple forms linked to reports, and implementing master-detail forms for effective data management. |
| Topic 6 | • Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction. |
| Topic 7 | • Implementing Navigation in Your Application: This section assesses the skills of UX Designers in designing smooth application navigation. It includes configuring shared components, setting up search functionalities, and enhancing user experience with intuitive navigation structures. |
| Topic 8 | • Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management. |
| Topic 9 | • Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features. |
| Topic 10 | • Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments. |
| Topic 11 | • Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities. |
| Topic 12 | • Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions. |

## Study 1Z1-771 Tool - Study 1Z1-771 Dumps

Success in the 1Z1-771 certification exam is essential to advance your career. The Oracle APEX Cloud Developer Professional (1Z1-771) certification can set you apart from the competition and give you the edge you need to grow in your career. However, preparing for the 1Z1-771 test can be challenging, mainly if you have limited time. Here's where Dumpkiller comes in with actual 1Z1-771 Questions. We at Dumpkiller are well aware of the importance of the Oracle 1Z1-771 certification in order to stand out in today's competitive job environment.

## Oracle APEX Cloud Developer Professional Sample Questions (Q21-Q26):

**NEW QUESTION # 21**
Which two Query Source types can be used to create a dynamic LOV?

- A. Select List
- B. SQL Query
- C. Procedure
- D. Function Returning SQL Query

**Answer: B,D**

Explanation:
A dynamic List of Values (LOV) in APEX populates options based on a query source. The supported types include:
Function Returning SQL Query: A PL/SQL function that returns a SQL query string (e.g., RETURN 'SELECT ename, empno FROM emp';). This offers flexibility for dynamic conditions or complex logic.
SQL Query: A direct SQL statement (e.g., SELECT ename, empno FROM emp) executed at runtime to fetch LOV values. It's the simplest and most common approach.
Procedure: Procedures execute logic but don't return query results in the format required for an LOV (they don't produce a result set directly).
Select List: This is a UI component, not a query source type for defining an LOV.
Dynamic LOVs enhance user interaction by providing real-time, data-driven options, critical for forms and filters.

## NEW QUESTION # 22
Which two statements are true about faceted search pages?

- A. A facet's chart can be seen only in a nonmodal dialog.
- B. Faceted Search supports the ability to filter columns storing multiple values.
- C. Facets map to specific database columns.
- D. Multiple charts are not visible in the same region.

**Answer: B,C**

Explanation:
Faceted search pages in APEX provide dynamic filtering. The true statements are:
Faceted Search supports the ability to filter columns storing multiple values: Facets can handle multi-value columns (e.g., comma-separated lists or JSON arrays) using appropriate SQL (e.g., INSTR or JSON_TABLE), enabling complex filtering scenarios like tags or categories.
Facets map to specific database columns: Each facet is tied to a column in the underlying query (e.g., DEPTNO or JOB), ensuring data-driven filtering.
Multiple charts are not visible in the same region: False; multiple facets can display charts within the same region, depending on settings.
A facet's chart can be seen only in a nonmodal dialog: False; charts can appear inline or in dialogs, configurable via facet attributes.
This functionality makes faceted search ideal for exploratory data analysis.

## NEW QUESTION # 23
How many instances of a Workflow can exist in the "In Development" state?

- A. 0
- B. Unlimited
- C. 1

**Answer: A**

Explanation:
In Oracle APEX Workflow, only one instance of a workflow can exist in the "In Development" state at a time. This ensures that developers work on a single draft version before publishing it. Multiple instances are allowed in other states (e.g., "Published"), but not during development.

## NEW QUESTION # 24
Which two layout modes are available for Page Designer under Utilities?

- A. Single Pane
- B. Three Pane
- C. Two Pane
- D. Four Pane

**Answer: B,C**

Explanation:
Page Designer's layout modes under Utilities adjust the workspace:
A . Two Pane: Splits into two vertical sections (e.g., tree and properties), ideal for focused editing.
B . Three Pane: Adds a third section (e.g., tree, grid, properties), offering a balanced view for complex pages.
C . Four Pane: Not available; APEX limits to three for usability.
D . Single Pane: Not an option; the minimum is two panes.
Developers toggle these via the Utilities menu to optimize screen real estate based on task complexity.

## NEW QUESTION # 25

Which two declarative options in Oracle APEX allow you to download BLOB/CLOB content?

- <span style="color:red">A. Download Dynamic Action</span>
- B. Share Dynamic Action
- <span style="color:red">C. Download Page Process</span>
- D. APEX_UTIL.DOWNLOAD PL/SQL API

**Answer: A,C**

Explanation:
Declarative options for downloading BLOB/CLOB content include:
Download Dynamic Action: A built-in action type to trigger downloads of BLOB/CLOB data.
Download Page Process: A process type that declaratively handles BLOB/CLOB downloads from a table.
APEX_UTIL.DOWNLOAD is a PL/SQL API, not a declarative option, and Share Dynamic Action is for sharing URLs, not downloading files.
