The result of your exam is directly related with the 1z0-1057-24 learning materials you choose. So our company is of particular concern to your exam review. Getting the 1z0-1057-24 certificate of the exam is just a start. Our 1z0-1057-24 practice materials may bring far-reaching influence for you. Any demands about this kind of exam of you can be satisfied by our 1z0-1057-24 training quiz. So our 1z0-1057-24 practice materials are of positive interest to your future. Such a small investment but a huge success, why are you still hesitating?

Oracle Project Management Cloud 2024 Implementation Professional Sample Questions (Q87-Q92):

NEW QUESTION # 87

Which three are part of using the Rapid Implementation for Project Financial Management Applications macro-enabled Microsoft Excel spreadsheet to enter setup data?

- A. Upload setup data.
- B. Generate CSV files.
- C. Import Projects.
- D. Prepare setup data.
- E. File Import and Export.

Answer: A,B,D

Explanation:

https://docs.oracle.com/applications/fare12/projectop_gs/OAPFM/OAPFM2264569.htm#OAPFM2159921 Configuring Rapid Implementation: Procedure Project application administrators can use the rapid implementation feature to set up the Project Financial

Management offering. Use the Rapid Implementation for Project Financial Management Applications macro-enabled Microsoft Excel spreadsheet to enter setup data and generate the ProjectsWorkbook.zip. Upload this .zip file to the Setup and Maintenance work area. When the upload completes, the offering is configured based on the setup information that you provide.

Perform the following steps to configure rapid implementation for the Project Financial Management offering:

- * Prepare setup data.
- * Generate CSV files.
- * Upload setup data.
- * Correct errors, if any, and reload the data.

NEW QUESTION # 88

Which three are valid password complexity criteria while setting up password policies? (Choose three.)

- A. Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character
- B. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters
- C. Simple: At least 8 characters and 1 number
- D. Complex: At least 8 characters, 1 uppercase, and 1 number
- E. Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character

Answer: B,D,E

Explanation:

Password complexity criteria are criteria that determine how strong or secure a password must be for a user account. Password complexity criteria can include requirements such as minimum length, uppercase letters, lowercase letters, numbers, special characters, etc. Three of the valid password complexity criteria while setting up password policies are:

- * Complex: At least 8 characters, 1 uppercase, and 1 number
 - * Very Complex: At least 8 characters, 1 uppercase, 1 number, and 2 special characters
 - * Very Complex: At least 8 characters, 1 uppercase, 1 number, and 1 special character
- Simple: At least 8 characters and 1 number is not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum security standards for Oracle Cloud applications.

Very Complex: At least 6 characters, 1 uppercase, 1 number, and 1 special character is also not a valid password complexity criterion while setting up password policies, as this criterion does not meet the minimum length requirement of 8 characters for Oracle Cloud applications. NEW QUESTION # 89

You are now the project manager of a newly created implementation project. Which two items are not part of managing an implementation project?

- A. Select the offering you want to implement.
- B. Monitor the progress of completing setup tasks.
- C. Enable optional functional areas and features by opting in.
- D. Generate a list of setup tasks.
- E. Assign tasks to various users who are responsible for managing setup data.

Answer: A,C

Explanation:

Selecting the offering you want to implement and enabling optional functional areas and features by opting in are not part of managing an implementation project. These are part of configuring an implementation project, which is done before managing an implementation project. Configuring an implementation project allows you to define the scope and features of your implementation based on your business needs. Managing an implementation project involves assigning tasks to various users who are responsible for managing setup data, monitoring the progress of completing setup tasks, and generating a list of setup tasks. These are part of executing an implementation project, which is done after configuring an implementation project. Executing an implementation project allows you to perform the setup tasks and validate the setup data for your implementation.

NEW QUESTION # 90

Your customer has implemented Oracle Project Portfolio Management Cloud recently and they have hired new employees for their Professions Services business. These employees are set up in Oracle Human Capital Management Cloud, but the Project Administrators are unable to add them as resources in the Planning Resource Breakdown Structure. What are three conditions for new employees to show up in the list? (Choose three.)

- A. All new employees created as persons must have an active supervisor.
- B. All new employees created as persons must have an active project role.
- C. All new employees created as persons must have an active assignment.
- D. All new employees created as persons must be assigned to a department.
- E. Current date is before the effective date of the resource, and you did not enable the "Include people with future-dated effective start dates" option during the search.

Answer: C,D,E

Explanation:

Ref: https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/project-foundation-configuration-define-project-resource-breakdown-structures.html#OAPFM180158_2 Why can't I find persons in the list of resources when I enter team members, planning resources, or person rate schedules?

You can't find persons in the list of resources when you enter team members, planning resources, or person rate schedules in the following situations:

- * The administrator didn't assign a department while creating users. Persons must have an active assignment and be assigned to a department in Oracle Fusion Human Capital Management before they can be added as team members or entered as resources on the planning resource breakdown structure or person rate schedule.
- * The resource isn't active in Oracle Fusion Human Capital Management because the current date is before the effective date of the resource. If you want to include persons who will start in the future, select the Include people with future-dated effective start dates option when you search for the person.
- * Persons assigned as project managers aren't active as of the project start date.
- * The assignment of the person is terminated, and an appropriate value isn't set for the number of days to display people with terminated assignments. You can set the profile value appropriately at the site profile level using the Specify Number of Days to Display People with Terminated Assignments task in the Setup and Maintenance work area.

NEW QUESTION # 91

What are three configuration items that you need to set up by using the Project Organizations functional area in Project Financial Management configurations? (Choose three.)

- A. Manage Project Unit Options
- B. Manage Business Unit
- C. Manage Project Types
- D. Manage Project Unit Organizations
- E. Manage Project Organization Classifications

Answer: A,D,E

Explanation:

Reference: <https://docs.oracle.com/en/cloud/saas/project-portfolio-management/19b/oapfm/define-project-organizations.html#OAPFM3094543> Topic - Manage Project Unit Organizations

NEW QUESTION # 92
