NEW QUESTION # 378

A company needs to create a series of mobile applications to empower their field engineers to accomplish several tasks with varying degrees of complexity.

Match each option to its answer.

Instructions: To answer, drag the appropriate app type from the column on the left to its definition on the right.
Each app type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

App types

model-driven
dashboard
dataset
canvas

Answer Area

Definition	App type
Quickly create apps for very complex business processes with very little or no code.	App type
Create simple apps with a highly customizable user interface layouts.	App type

Answer:

Explanation:

Options   **Answer Area**

Share

Embed

Get Data

Pin

Requirement	Option
Ensure that coworkers can see the dashboard.	Share
Display data from Microsoft Excel in the dashboard.	Get Data
Add a report tile to the dashboard.	Pin

Explanation

Definition	App type
Quickly create apps for very complex business processes with very little or no code.	canvas
Create simple apps with a highly customizable user interface layouts.	model-driven

Box 1: canvas

Both model-driven and canvas apps allow you to easily build business apps. They both share access to the Common Data Service providing standard and custom entities. Canvas apps start with your user experience, crafting a highly tailored interface with the power of a blank canvas and connecting it to 200 data sources.

Canvas apps can be built for web, mobile, and tablet applications. Model-driven apps start with your data model - building up from the shape of your core business data and processes in the Common Data Service to model forms, views, and other components. Model-driven apps automatically generate great UI that is responsive across devices.

Box 2: model-driven
