Microsoft PL-200 Exam is an essential certification for professionals who work with Power Platform solutions. PL-200 exam tests candidates on their ability to create and configure solutions using Power Apps, Power Automate, and Power Virtual Agents, among other tools. Passing PL-200 exam demonstrates that a candidate has the necessary skills to help organizations optimize their business processes and increase productivity. Microsoft Power Platform Functional Consultant certification is highly valued by employers and is an excellent way to advance one's career in the field of Dynamics 365 and Power Platform.

Microsoft Power Platform Functional Consultant Sample Questions (Q195-Q200):

NEW QUESTION # 195
You need to recommend a role for users to perform several required tasks. The solution must use the principle of least privilege. Which roles should you recommend? To answer, drag the appropriate roles to the correct functions. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
Graphical user interface, text, application Description automatically generated

Box 1: Office 365 Global Administrator

You may think that the Dynamics 365 system administrator would have power to do all the actions needed to manage Dynamics 365, but this is not the case. What's different in Microsoft cloud deployments is that licenses and user accounts are managed in Office 365 by an Office 365 Global Administrator. This role is analogous to a network administrator for an on premises deployment. The Global Administrator is the only role to create new user accounts and assign subscription licenses for Dynamics 365 (and other Office 365 apps such as Skype, Power BI and SharePoint).

Box 2: Dynamics 365 system administrator

The Dynamics 365 system administrator may assign roles and permissions to the Dynamics 365 user within an instance of Dynamics 365. The Dynamics 365 system administrator also controls all the settings in Dynamics 365.

Box 3: Dynamics 365 admin

The Dynamics 365 admin can perform backups and restores.

NEW QUESTION # 196

A customer uses Power Apps to view and maintain their contacts that are stored in Microsoft Dataverse.

Several columns must be configured to ensure the security settings for sales associates are view only.

You need to configure the access restrictions.

Which component for field-level security should you use? TO answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point

Action	Component
Enable the fields for record-level security.	Azure Data Lake Gen2 / Azure SQL / Power Apps app designer / Microsoft Power Platform admin center
Set the security settings for the sales associates to view only.	Azure Active Directory group team / Dataverse table / Field Security Profiles / User

Answer:

Explanation:

Action	Component
Enable the fields for record-level security.	Azure Data Lake Gen2 / Azure SQL / Power Apps app designer / Microsoft Power Platform admin center
Set the security settings for the sales associates to view only.	Azure Active Directory group team / Dataverse table / Field Security Profiles / User

Explanation

Action	Component
Enable the fields for record-level security.	Power Apps app designer ▼
Set the security settings for the sales associates to view only.	User ▼

NEW QUESTION # 197

You are a Dynamics 365 administrator.

You create a new app.

You need to create the site map for the app.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Add a subarea.
- Add a view.
- Add a group.
- Add an area.

Answer Area

Answer:

Explanation:

Actions

- Add a subarea.
- Add a view.
- Add a group.
- Add an area.

Answer Area

1. Add an area.
2. Add a group.
3. Add a subarea.

Explanation

Add an area.
Add a group.
Add a subarea.

NEW QUESTION # 198

You are designing a Power Virtual Agents chatbot for a store.

You need to teach the chatbot to acknowledge the store's product categories and the variations within specific categories.

You need to create custom entities to provide the chatbot with the knowledge of the product categories.

Which features should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Requirement	Feature
Analyze misspellings, grammar variations, and semantic variations.	Slot filling / Synonyms / Smart matching / Topics / Fuzzy matching
Make the bot smarter by expanding the matching logic.	Slot filling / Synonyms / Topics
Extract a category selected by a user during a conversation into a variable for later use.	Slot filling / Synonyms / Smart matching / Topics

Answer:

NEW QUESTION # 199

A company uses a model-driven Power Apps app in a new environment. The base language is English.

You need to configure French and Spanish.

Which configuration component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement | Microsoft | **Configuration component**

Allow a language to be used within an organization.

- Default language
- Language collation
- Language packs
- LCID

Enable the languages.

- Browser
- Environment
- Power Apps app
- Tenant

Answer:

Explanation:

Requirement | **Configuration component**

Allow a language to be used within an organization.

- Default language
- Language collation
- Language packs
- LCID

Enable the languages.

- Browser
- Environment
- Power Apps app
- Tenant

Explanation
Box 1: Language packs
Before users can start using a Language Pack to display a language, the Language Pack must be enabled in your organization.
Box 2: Environment
Enable the language
These settings can be found in the Microsoft Power Platform admin center by going to Environments > [select an environment] > Settings > Product > Languages.
