certification to improve their futures with it. Success in the test plays an important role in the up gradation of your CV and getting a good job or working online to achieve your dreams. The students are making up their minds for the ServiceNow CIS-SPM test but they are mostly confused about where to prepare for it successfully on the first try.

ServiceNow Certified Implementation Specialist - Strategic Portfolio Management Sample Questions (Q15-Q20):

NEW QUESTION # 15

What is a resource event?

- A. An event scheduled by a project manager.
- B. A block of time that a resource spends on a task.
- C. An external event.
- **D. A non-scheduled activity impacting capacity.**

Answer: D

Explanation:

Explanation

A resource event is a non-scheduled activity that affects the availability and capacity of a resource or a group of resources. Examples of resource events are vacations, holidays, training, or sick leave. Resource events can be created by resource managers or resources themselves, and they can be viewed in the resource calendar or the resource workbench. You can find more information about resource events in the Product Documentation for ServiceNow.

NEW QUESTION # 16

Which system property needs to be set to True to be able to allocate budgets in Project Workspace?

- A. com.snc.project.rollup.cost
- B. sn_invst_pln.budget_allocation_attribute
- **C. sn_invst_pln.enable_budget_allocation_v2**
- D. sn_plng_att_core.default.expense_type

Answer: C

NEW QUESTION # 17

Which table stores daily capacity of a user?

- A. User Profile.
- B. Resource_Allocation_Daily.
- C. Resource_Event.
- **D. Resource,Aggregate_Daily.**

Answer: D

NEW QUESTION # 18

The Project management application supports two types of external dependencies. What are they?

Choose 2 answers

- A. Change Dependency.
- **B. Soft Dependency.**
- C. Milestone Dependency.
- **D. Hard Dependency.**
- E. Task Dependency.

Answer: B,D

Explanation:

Explanation

The Project Management application supports two types of external dependencies: hard dependency and soft dependency. A hard dependency is a dependency that must be met before a task can start or finish. A soft dependency is a dependency that is preferred but not mandatory for a task to start or finish. You can find more information about these dependency types in the Product Documentation for ServiceNow.

NEW QUESTION # 19

Which of the following can be used to calculate planned cost when creating a resource plan?

Choose 2 answers

- A. Demand rate
- B. Project rate
- C. Rate card
- D. Default rate

Answer: B,C

Explanation:

Explanation

According to the ServiceNow documentation¹, a rate card is a table that defines the hourly cost of labor for different roles or resources. A project rate is a fixed rate that is applied to all resources assigned to a project, regardless of their roles or individual rates. Both of these can be used to calculate the planned cost of a resource plan by multiplying the hours allocated to each resource by the corresponding rate. The other options are incorrect because:

A: Demand rate: A demand rate is a rate that is applied to a demand, not a resource plan. It is used to estimate the cost of fulfilling a demand before it is converted into a project².

C: Default rate: A default rate is a rate that is applied to a resource when no other rate is specified. It is not a valid option for calculating the planned cost of a resource plan, as it is only used as a fallback option³.
