Snowflake COF-C02

SnowPro Core Certification Exam

2

difficulty on [COF-C02 Exam](#) day. Plus, we have various question types and difficulty levels so that you can tailor your Snowflake COF-C02 exam dumps preparation to your requirements.

Snowflake COF-C02: SnowPro Core Certification exam is a challenging and comprehensive exam that tests your skills and knowledge of Snowflake's cloud data warehousing platform. SnowPro Core Certification Exam certification is globally recognized and highly valued by employers seeking qualified professionals in the data warehousing field. With adequate preparation and practical experience, candidates can take and pass the exam to achieve their desired certification and propel their careers forward.

Snowflake SnowPro Core Certification Exam Sample Questions (Q90-Q95):

NEW QUESTION # 90
Which services does the Snowflake Cloud Services layer manage? (Select TWO).

- A. Data storage
- B. Query execution
- C. Compute resources
- D. Authentication
- E. Metadata

Answer: D,E

Explanation:
<https://docs.snowflake.com/en/user-guide/intro-key-concepts.html>
The cloud services layer is a collection of services that coordinate activities across Snowflake. These services tie together all of the different components of Snowflake in order to process user requests, from login to query dispatch. The cloud services layer also runs on compute instances provisioned by Snowflake from the cloud provider.
Services managed in this layer include:
Authentication
Infrastructure management
Metadata management
Query parsing and optimization
Access control

NEW QUESTION # 91
Which of the following describes how clustering keys work in Snowflake?

- A. Clustering keys sort the designated columns over time, without blocking DML operations
- B. Clustering keys create a distributed, parallel data structure of pointers to a table's rows and columns
- C. Clustering keys establish a hashed key on each node of a virtual warehouse to optimize joins at run-time
- D. Clustering keys update the micro-partitions in place with a full sort, and impact the DML operations.

Answer: A

Our COF-C02 free dumps demo will provide you some basic information for the accuracy of our exam materials. All questions and answers in our COF-C02 real dumps are tested by our certified trainers with rich experience and one or two days is enough for you practicing Valid COF-C02 Exam Pdf. Our COF-C02 dumps torrent contains everything you want to solve the challenge of real exam.

Snowflake SnowPro Core Certification Exam Sample Questions (Q418-Q423):

NEW QUESTION # 418

What is a limitation of a Materialized View?

- A. A Materialized View can only reference up to two tables
- B. A Materialized View cannot support any aggregate functions
- C. A Materialized View cannot be joined with other tables
- **D. A Materialized View cannot be defined with a JOIN**

Answer: D

Explanation:

There are several limitations to using materialized views:

A materialized view can query only a single table.

Joins, including self-joins, are not supported.

NEW QUESTION # 419

What is the recommended file sizing for data loading using Snowpipe?

- A. A compressed file size greater than 1 GB, and up to 2 GB
- B. A compressed file size greater than 10 MB, and up to 100 MB
- C. A compressed file size greater than 100 GB, and up to 250 GB
- **D. A compressed file size greater than 100 MB, and up to 250 MB**

Answer: D

Explanation:

Explanation

NEW QUESTION # 420

Which statement accurately describes Snowflake's architecture?

- A. It uses a local data repository for all compute nodes in the platform.
- B. It is a blend of shared-disk and shared-everything database architectures.
- **C. It is a hybrid of traditional shared-disk and shared-nothing database architectures.**
- D. It reorganizes loaded data into internal optimized, compressed, and row-based format.

Answer: C

Explanation:

Snowflake's architecture is unique in that it combines elements of both traditional shared-disk and shared-nothing database architectures. This hybrid approach allows Snowflake to offer the scalability and performance benefits of a shared-nothing architecture (with compute and storage separated) while maintaining the simplicity and flexibility of a shared-disk architecture in managing data across all nodes in the system. This results in an architecture that provides on-demand scalability, both vertically and horizontally, without sacrificing performance or data cohesion.

NEW QUESTION # 421

Which of the following activities consume virtual warehouse credits in the Snowflake environment? (Choose two.)

- A. Running a custom query
- B. Caching query results
- C. Running EXPLAIN and SHOW commands
- D. Running COPY commands
- E. Cloning a database

Answer: A,C

Explanation:

Running EXPLAIN and SHOW commands, as well as running a custom query, consume virtual warehouse credits in the Snowflake environment. These activities require computational resources, and therefore, credits are used to account for the usage of these resources. Reference: [COF-C02] SnowPro Core Certification Exam Study Guide

NEW QUESTION # 422

How can a Snowflake user access a JSON object, given the following table? (Select TWO).

SRC
<pre>{ "salesPerson": { "name": "user", "id": "1234", } }</pre>

- A. src:salesperson.name
- B. src:salesPerson. name
- C. SRC:salesperson.Name
- D. SRC:salesperson.name
- E. src:salesperson.Name

Answer: A,E

Explanation:

To access a JSON object in Snowflake, dot notation is used where the path to the object is specified after the column name containing the JSON data. Both lowercase and uppercase can be used for attribute names, so both "name" and "Name" are valid. References: [COF-C02] SnowPro Core Certification Exam Study Guide

NEW QUESTION # 423

.....

Career competitive is similar with playing tennis, if you want to defeat your opponents every time, you will improve yourself continuously.
