

How Can You Pass Fortinet FCP_FGT_AD-7.6 Certification Exam With Flying Colors?

BONUS!!! Download part of RealExamFree FCP_FGT_AD-7.6 dumps for free: <https://drive.google.com/open?id=1XyMJFARK3TcFiywcVpYqRxckN3AJBdjX>

We are pleased to inform you that we have engaged in this business for over ten years with our FCP_FGT_AD-7.6 exam questions. Because of our past years' experience, we are well qualified to take care of your worried about the FCP_FGT_AD-7.6 Preparation exam and smooth your process with successful passing results. Our pass rate of the FCP_FGT_AD-7.6 study materials is high as 98% to 100% which is unique in the market.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.
Topic 2	<ul style="list-style-type: none">Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 3	<ul style="list-style-type: none">Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.
Topic 4	<ul style="list-style-type: none">Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.

Topic 5	<ul style="list-style-type: none"> • Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.

FCP_FGT_AD-7.6 Reliable Exam Pass4sure | Dumps FCP_FGT_AD-7.6 Discount

With the help of FCP_FGT_AD-7.6 study materials, you can conduct targeted review on the topics which to be tested before the exam, and then you no longer have to worry about the problems that you may encounter a question that you are not familiar with during the exam. With FCP_FGT_AD-7.6 study materials, you will not need to purchase any other review materials. We have hired professional IT staff to maintain FCP_FGT_AD-7.6 Study Materials and our team of experts also constantly updates and renew the question bank according to changes in the syllabus. With FCP_FGT_AD-7.6 study materials, you can study at ease, and we will help you solve all the problems that you may encounter in the learning process.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q39-Q44):

NEW QUESTION # 39

What are three key routing principles in SD-WAN? (Choose three.)

- A. Regular policy routes have precedence over SD-WAN rules.
- B. By default, SD-WAN rules are skipped if the included SD-WAN members do not have a valid route to the destination.
- C. SD-WAN rules have precedence over any other type of routes.
- D. By default, SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member.
- E. By default, SD-WAN rules are skipped if only one route to the destination is available.

Answer: B,C,D

Explanation:

SD-WAN rules are skipped if none of the SD-WAN members have a valid route to the destination.

SD-WAN rules take precedence over other route types.

SD-WAN rules are skipped if the best route to the destination is not an SD-WAN member by default.

NEW QUESTION # 40

Refer to the exhibit.

The NOC team connects to the FortiGate GUI with the NOC_Access admin profile. They request that their GUI sessions do not disconnect too early during inactivity.

What must the administrator configure to answer this specific request from the NOC team?

- A. Ensure that all NOC_Access users are assigned the super_admin role to guarantee access
- B. Move NOC_Access to the top of the list to ensure all profile settings take effect.
- C. Increase the admin timeout value under config system accprofile NOC_Access.
- D. Increase the offline value of the Override Idle Timeout parameter in the NOC_Access admin profile.

Answer: C

Explanation:

The admin timeout setting in the admin access profile controls the inactivity timeout for GUI sessions. Increasing this value will extend the session duration before automatic disconnection.

NEW QUESTION # 41

Refer to the exhibits.

FortiGate HA cluster topology

Current HA status

```
HQ-NGFW-1 # get system ha status
...
Configuration Status:
  FGVM02TM24013423(updated 0 seconds ago): in-sync
  FGVM02TM24013423 chksum dump: e1 60 2e 42 b8 c1 c6 df 11 34 0c 21 80 79 a4 9f
  FGVM02TM24013501(updated 4 seconds ago): in-sync
  FGVM02TM24013501 chksum dump: e1 60 2e 42 b8 c1 c6 df 11 34 0c 21 80 79 a4 9f
...
number of member: 2
HQ-NGFW-1      , FGVM02TM24013423, HA cluster index = 1
HQ-NGFW-2      , FGVM02TM24013501, HA cluster index = 0
number of vcluster: 1
vcluster 1: work 169.254.0.2
Primary: FGVM02TM24013423, HA operating index = 0
Secondary: FGVM02TM24013501, HA operating index = 1
```

New FortiGate HA configuration

```
HQ-NGFW-1
# config system ha
  set group-id 5
  set group-name "Fortinet"
  set mode a-p
  set password *
  set hbdev "port7" 50 "port8" 60
  set session-pick enable
  set override disable
  set priority 90
  set monitor "port3"
```

```
HQ-NGFW-2
# config system ha
```

```

set group-id 5
set group-name "Fortinet"
set mode a-p
set password *
set hbdev "port7" 50 "port8" 60
set session-pick enable
set override enable
set priority 110
set monitor "port3"

```

Based on the current HA status, an administrator updates the override and priority parameters on HQ-NGFW-1 and HQ-NGFW-2 as shown in the exhibit.

What would be the expected outcome in the HA cluster?

- A. HQ-NGFW-1 will synchronize the override disable setting with HQ-NGFW-2.
- B. HQ-NGFW-1 will remain the primary because HQ-NGFW-2 has lower priority.
- C. HQ-NGFW-2 will take over as the primary because it has the override enable setting and higher priority than HQ-NGFW-1.
- D. The HA cluster will become out of sync because the override setting must match on all HA members.

Answer: C

Explanation:

With override enabled on HQ-NGFW-2 and its higher priority (110 vs. 90), HQ-NGFW-2 will become the primary device, preempting HQ-NGFW-1 despite the current primary status.

NEW QUESTION # 42

Refer to the exhibits.

System Performance output

```

# get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
Memory: 2042076k total, 1837868k used (90%), 104146k free (5.1%), 100062k freeable (4.9%)
Average network usage: 19/2 kbps in 1 minute, 19/4 kbps in 10 minutes, 19/3 kbps in 30 minutes
Maximal network usage: 36/18 kbps in 1 minute, 58/86 kbps in 10 minutes, 58/87 kbps in 30 minutes
Average sessions: 21 sessions in 1 minute, 22 sessions in 10 minutes, 21 sessions in 30 minutes
Maximal sessions: 22 sessions in 1 minute, 28 sessions in 10 minutes, 28 sessions in 30 minutes
Average session setup rate: 0 sessions per second in last 1 minute, 0 sessions per second in last 10 minutes
Maximal session setup rate: 0 sessions per second in last 1 minute, 1 sessions per second in last 10 minutes
Average NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Maximal NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 22 hours, 50 minutes

```

Memory usage threshold settings

```

config system global
set memory-use-threshold-extreme 89
set memory-use-threshold-green 82
set memory-use-threshold-red 88
end

```

The exhibits show the system performance output and default configuration of high memory usage thresholds on a FortiGate device. Based on the system performance output, what are the two possible outcomes? (Choose two.)

- A. FortiGate drops new sessions.
- B. Administrators can access FortiGate only through the console port.
- C. Administrators can change the configuration.
- D. FortiGate has entered conserve mode.

Answer: A,C

Explanation:

Since memory usage is at 90%, exceeding the red threshold (88%), FortiGate enters a state where configuration changes are still allowed.

In this state, FortiGate drops new sessions to preserve resources and maintain stability.

NEW QUESTION # 43

Which two statements describe characteristics of automation stitches? (Choose two.)

- A. Multiple actions can run in parallel.
- B. Actions involve only devices included in the Security Fabric.
- C. An automation stitch can have multiple triggers.
- D. Triggers can involve external connectors.

Answer: A,D

Explanation:

Automation stitches can execute multiple actions concurrently (in parallel).

Triggers for automation stitches can come from external connectors beyond just Fortinet devices.

NEW QUESTION # 44

.....

This is a desktop-based FCP_FGT_AD-7.6 practice exam software that doesn't require an internet connection except for license validation during purchase. The software provides FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) practice exams that are customizable, helping students prepare for the actual FCP_FGT_AD-7.6 Exam. The team updates the Fortinet FCP_FGT_AD-7.6 tests regularly and is available 24/7 to address any issues. Assessment records are saved for easy tracking. Windows computers support the desktop Fortinet FCP_FGT_AD-7.6 practice exam software.
