The Fortinet FCSS\_ADA\_AR-6.7 certification is a valuable credential that plays a significant role in advancing the Fortinet professional's career in the tech industry. With the FCSS—Advanced Analytics 6.7 Architect (FCSS\_ADA\_AR-6.7) certification exam you can demonstrate your skills and knowledge level and get solid proof of your expertise. You can use this proof to advance your career. The Fortinet FCSS\_ADA\_AR-6.7 Certification Exam enables you to increase job opportunities, promotes professional development, and higher salary potential, and helps you to gain a competitive edge in your job search.

## Fortinet FCSS\_ADA\_AR-6.7 Exam Syllabus Topics:

| Topic   | Details                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 1 | <ul style="list-style-type: none"><li>FortiSIEM Baseline and UEBA: This section tests the knowledge of Compliance Officers and Threat Analysts in implementing baseline profiles and User and Entity Behavior Analytics (UEBA). It covers creating baseline reports, configuring UEBA agents, and analyzing log-based behavioral patterns to detect anomalies and insider threats.</li></ul>                    |
| Topic 2 | <ul style="list-style-type: none"><li>Conditions and Remediation: This section measures the skills of Incident Responders and SOAR Specialists in remediating security incidents. It includes configuring manual and automated remediation workflows, integrating FortiSOAR with FortiSIEM for streamlined incident resolution, and deploying scripts to address threats while maintaining compliance</li></ul> |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Topic 3 | <ul style="list-style-type: none"> <li>FortiSIEM Rules and Analytics: This section evaluates the expertise of Security Analysts and Automation Engineers in configuring FortiSIEM rules and analytics. It includes constructing security rules based on event patterns, leveraging MITRE ATT&amp;CK® frameworks, and configuring advanced nested queries and lookup tables for complex threat detection and correlation.</li> </ul>                                                                                  |
| Topic 4 | <ul style="list-style-type: none"> <li>Multi-Tenancy SOC Solution for MSSP: This section of the exam measures the skills of MSSP Architects and SOC Engineers in designing and deploying multi-tenant Security Operations Center (SOC) environments using FortiSIEM. It covers defining collectors and agents, deploying FortiSIEM in hybrid setups, managing resource allocation, and installing</li> <li>managing Windows and Linux agents for scalable event monitoring in multi-tenant architectures.</li> </ul> |

## FCSS\_ADA\_AR-6.7 Preparation & Valid FCSS\_ADA\_AR-6.7 Test Voucher

We verify and update the FCSS\_ADA\_AR-6.7 exam dumps on regular basis as per the new changes in the actual exam test. So the FCSS\_ADA\_AR-6.7 study torrents you purchase on our NewPassLeader site are the latest and can help you to deal the difficulties in the real test. We work 24/7 to keep our FCSS\_ADA\_AR-6.7 most advanced and quickly to respond your questions and requirements. FCSS\_ADA\_AR-6.7 free pdf demo is accessible for try before you purchase. The quality and validity of FCSS\_ADA\_AR-6.7 study guide are unmatched and bring you to success.

## Fortinet FCSS—Advanced Analytics 6.7 Architect Sample Questions (Q10-Q15):

### NEW QUESTION # 10

Refer to the exhibit.

```
[root@worker1 active]# ls -la /querywkr/active/13127*
drwxr-xr-x 4 admin admin 36 Nov  3 11:23 .
drwxr-xr-x 7 admin admin 80 Oct  8 15:51 ..
```

```
[root@worker2 active]# ls -la /querywkr/active/13127*
drwxr-xr-x 4 admin admin 36 Nov  3 11:23 .
drwxr-xr-x 7 admin admin 80 Oct  8 15:51 ..
drwx----- 2 admin admin 23 Nov  3 11:23 13127t1
```

```

FORTINET
[root@worker3 active]# ls -la /querywkr/active/13127*
drwxr-xr-x 4 admin admin 36 Nov  3 11:23 .
drwxr-xr-x 7 admin admin 80 Oct  8 15:51 ..
drwx----- 2 admin admin 23 Nov  3 11:23 13127t0
drwx----- 2 admin admin 23 Nov  3 11:13 13127t2

```

Which workers are assigned tasks for the query ID13127? (Choose two.)

- A. Worker3 has two tasks for query ID 13127\*.

- B. Worker1 has one task for query ID 13127\*.
- C. Worker2 has two tasks for query ID 13127\*.
- D. Worker1 has no tasks for query ID 13127\*.
- E. Worker3 has four tasks for query ID 13127\*.

**Answer: A,D**

Explanation:

The exhibit shows the directory listings for three different workers (worker1, worker2, and worker3) under the /querywkr/active/13127\* path, which indicates active query tasks assigned to each worker.

1. Worker1 (worker1)

The output does not show any subdirectories or task files (13127t0, 13127t1, etc.), meaning Worker1 is not assigned any tasks.\*

2. Worker2 (worker2)

The output shows one task (13127t1) under /querywkr/active/13127\*.

The worker has only one assigned task, not two, so options C and D are incorrect.

3. Worker3 (worker3)

The output shows two tasks (13127t0 and 13127t1), indicating that Worker3 is processing two tasks for query ID 13127\*.

### NEW QUESTION # 11

Refer to the exhibit.

| Hour Of Day | Host IP | Host Name | Min CPU Util | AVG CPU Util | Max CPU Util | Std Dev CPU Util | numPoints |
|-------------|---------|-----------|--------------|--------------|--------------|------------------|-----------|
| 9           | 1.1.1.1 | ServerA   | 33.50        | 33.50        | 33.50        | 0                | 1         |
| 10          | 1.1.1.1 | ServerA   | 37.06        | 37.06        | 37.06        | 0                | 1         |
| 11          | 1.1.1.1 | ServerA   | 40.12        | 40.12        | 40.12        | 0                | 1         |
| 12          | 1.1.1.1 | ServerA   | 45.96        | 45.96        | 45.96        | 0                | 1         |

  

| Hour Of Day | Host IP | Host Name | Min CPU Util | AVG CPU Util | Max CPU Util | Std Dev CPU Util | numPoints |
|-------------|---------|-----------|--------------|--------------|--------------|------------------|-----------|
| 9           | 1.1.1.1 | ServerA   | 32.31        | 32.31        | 32.31        | 0                | 1         |
|             |         |           |              |              |              |                  |           |
|             |         |           |              |              |              |                  |           |
|             |         |           |              |              |              |                  |           |

The profile database contains CPU utilization values from day one. At midnight on the second day, the CPU utilization values from the daily database will be merged with the profile database.

In the profile database, in the Hour of Day column where 9 is the value, what will be the updated minimum, maximum, and average CPU utilization values?

- A. Min CPU Util=33.50, Max CPU Util=33.50 and AVG CPU Util=33.50
- B. Min CPU Util=32.31, Max CPU Util=33.50 and AVG CPU Util=33.50
- C. Min CPU Util=32.31, Max CPU Util=32.31 and AVG CPU Util=32.31
- D. Min CPU Util=32.31, Max CPU Util=33.50 and AVG CPU Util=32.67

**Answer: D**

### NEW QUESTION # 12

Refer to the exhibit.

Expression Builder

Expression: (AVG(Firewall Session)-STAT\_AVG(AVG(Firewall Session):112))/STAT\_STDDEV(AVG(Firewall Session):112)

Function:  +

Event Attribute: Type in attribute... +

CMDB Attribute:  +

If the Z-score for this rule is greater than or equal to three, what does this mean?

- A. The rate of firewall connection is above the current average value.

- B. The rate firewall connection is above the historical average value.
- C. The rate of firewall connection is below historical average value.
- D. The rate of firewall connection is optimum.

**Answer: B**

Explanation:

The Z-score formula in the expression builder calculates how many standard deviations the current value is from the historical average. The formula used is:

$$Z = \frac{\text{AVG}(\text{Firewall Session}) - \text{STAT\_AVG}(\text{AVG}(\text{Firewall Session});112)}{\text{STAT\_STDDEV}(\text{AVG}(\text{Firewall Session});112)}$$

AVG(Firewall Session) represents the current firewall session rate.

STAT\_AVG(AVG(Firewall Session);112) represents the historical average over a 112-time unit window.

STAT\_STDDEV(AVG(Firewall Session);112) represents the historical standard deviation over the same period.

AZ-score # 3 indicates that the current firewall session rate is significantly higher than the historical average (3 standard deviations above the mean), signaling an anomaly.

### NEW QUESTION # 13

What are the benefits of understanding the MITRE ATT&CK® framework in the context of FortiSIEM?

- A. Streamlining software updates for FortiSIEM?
- B. Enhancing rule creation based on known attack patterns?
- C. Improving the correlation of security events?
- D. Implementing effective response strategies to detected threats?

**Answer: B,C,D**

### NEW QUESTION # 14

Refer to the exhibit.

If the Z-score for this rule is greater than or equal to three, what does this mean?

- A. The rate of firewall connection is above the current average value.
- B. The rate of firewall connection is above the historical average value.
- C. The rate of firewall connection is below historical average value.
- D. The rate of firewall connection is optimum.

**Answer: B**

### NEW QUESTION # 15

.....

The contents of FCSS\_ADA\_AR-6.7 study materials are all compiled by industry experts based on the examination outlines and industry development trends over the years. And our FCSS\_ADA\_AR-6.7 exam guide has its own system and levels of hierarchy, which can make users improve effectively. Our FCSS\_ADA\_AR-6.7 learning dumps can simulate the real test environment. After the exam is over, the system also gives the total score and correct answer rate.
