iLO Dedicated Network Port	Enabled

OK Cancel

Answer:

Explanation:

Explanation:

The area to check for the HPE OneView SSO certificate is under Security, then HPE SSO.

Security: This section deals with all security-related settings, including certificates.

HPE SSO: This stands for "Single Sign-On" and is the specific technology that HPE OneView uses for integrated authentication. The certificate will be listed here if it's properly applied.

To get to this section, you would click on "Security" in the left-hand navigation menu, and then "HPE SSO" in the main content area.

NEW QUESTION # 41

Drag and Drop Question

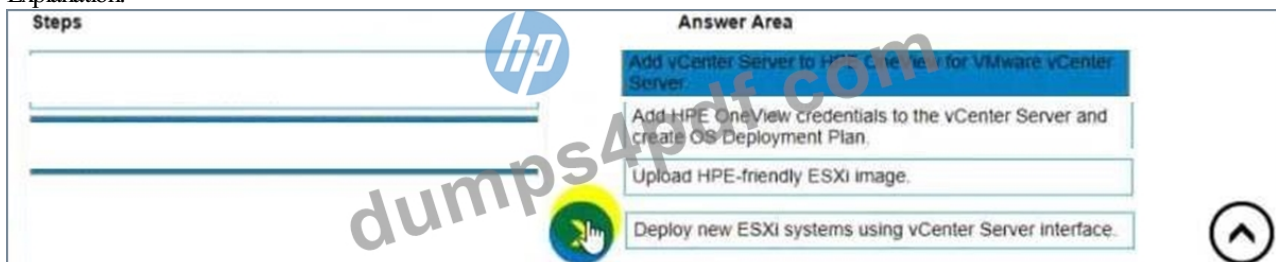

Your customer plans to use HPE OneView for VMware vCenter Server to deploy ESXi systems.

They created a server profile template that they want to use in HPE OneView. Put the steps required to configure HPE OneView for VMware vCenter Server on the left into their correct order on the right.

Answer:

Explanation:

NEW QUESTION # 42

An HPE Synergy customer needs to prevent a timeout and loss of communication during an external switch firmware upgrade. Click the parameter that the customer should configure within an uplink set to meet this requirement

Create Uplink Set

General

Name: Prod-US

Consistency checking: Exact match

Type: Ethernet

Connection mode: Automatic

LACP timer: Short (1s)

LACP load balancing: Source & Destination MAC Address

LACP failover trigger: All active uplinks transition to offline

LACP distribute uplink ports: ☒

Answer:

Explanation:

Create Uplink Set

General

Name: Prod-US

Consistency checking: Exact match

Type: Ethernet

Connection mode: Automatic

LACP timer: Short (1s)

LACP load balancing: Source & Destination MAC Address

LACP failover trigger: All active uplinks transition to offline

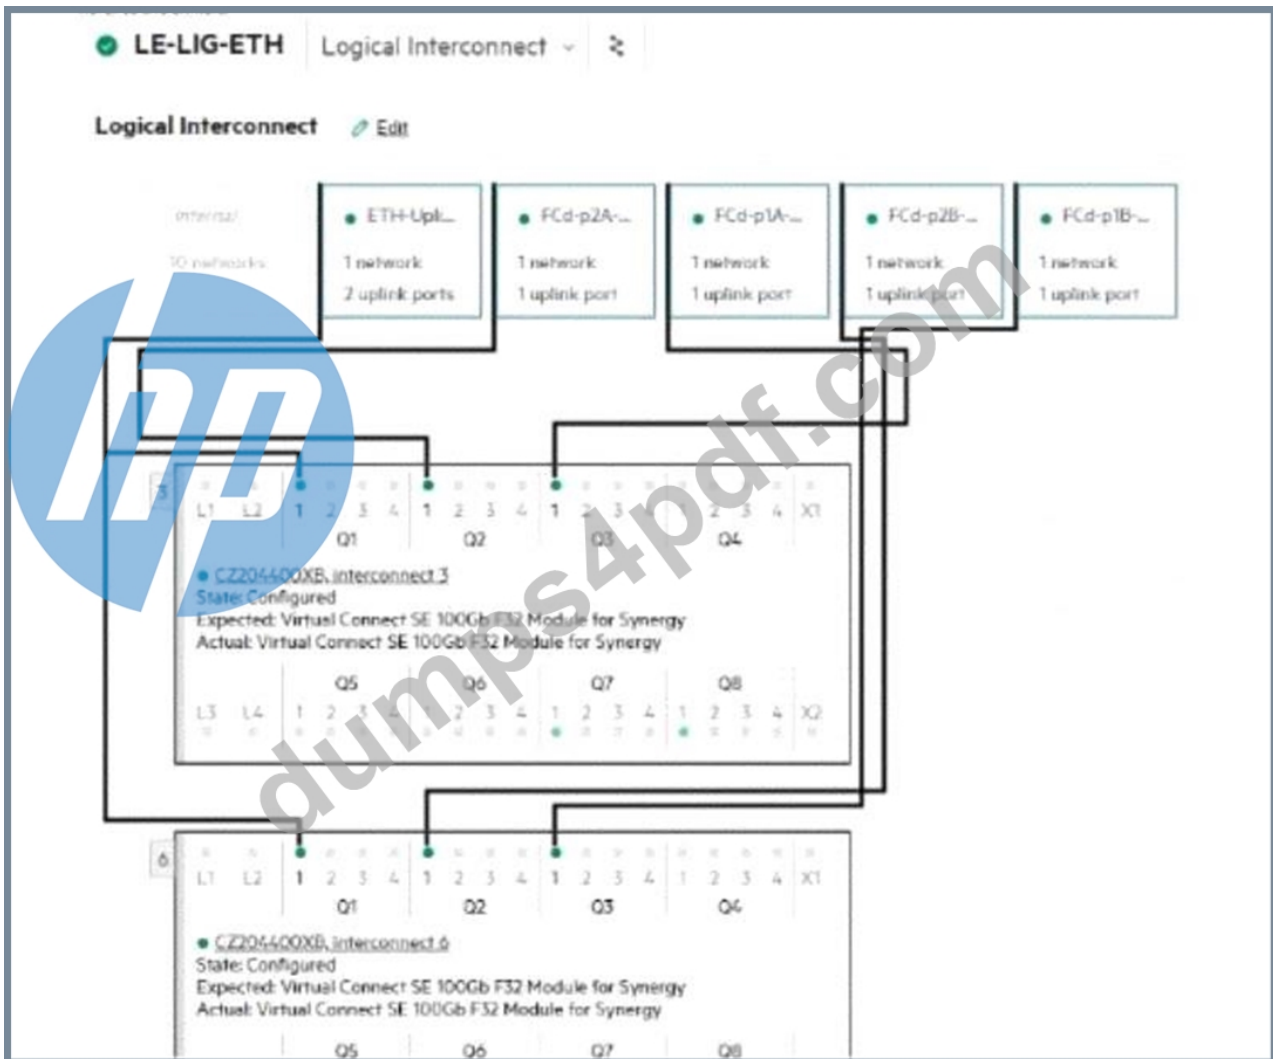

LACP distribute uplink ports: ☒

Explanation:

To prevent a timeout and loss of communication during an external switch firmware upgrade, the customer should configure the LACP failover trigger within the uplink set. By setting the LACP failover trigger to "All active uplinks transition to offline," the configuration ensures that the traffic will be redirected to available uplinks in the event of an uplink failure or during the upgrade process, maintaining communication and preventing timeouts.

NEW QUESTION # 43

Refer to Exhibit:

Your customer plans to update the firmware for the logical interconnect shown.

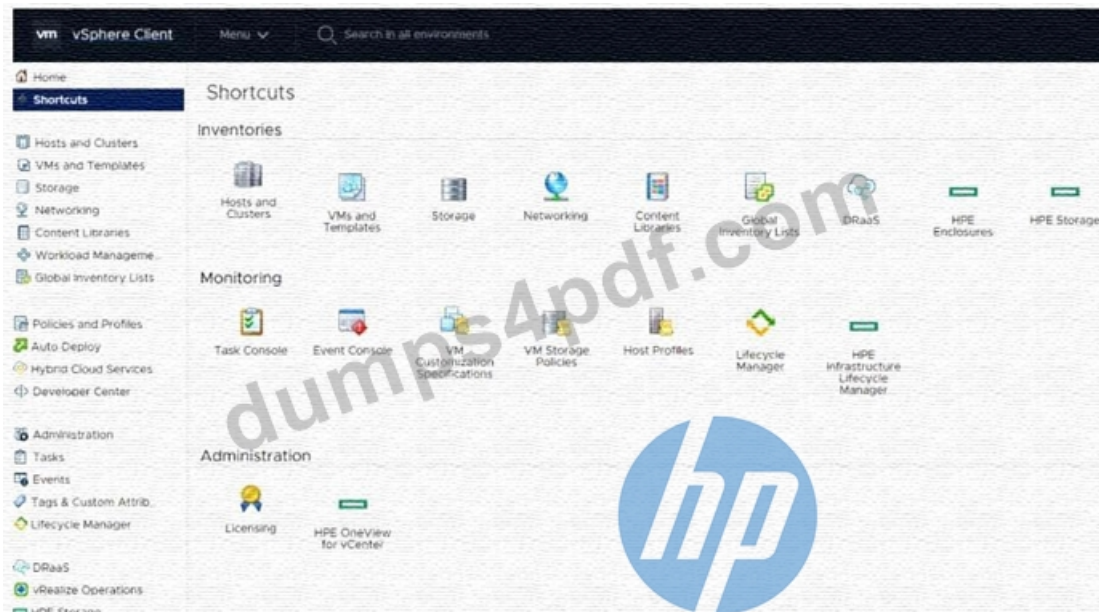

Based on the information in the exhibit, which statement about network connectivity is true?

- A. It is possible to update this logical interconnect without network downtime if orchestrated method is used.
- B. Compute nodes will experience network downtime if the Force option is selected, as it will enforce parallel update.
- C. Compute nodes will experience network downtime not longer than 1 minute regardless of the orchestration method.
- D. Only the manual orchestration method will allow a firmware upgrade without causing network downtime.

Answer: A

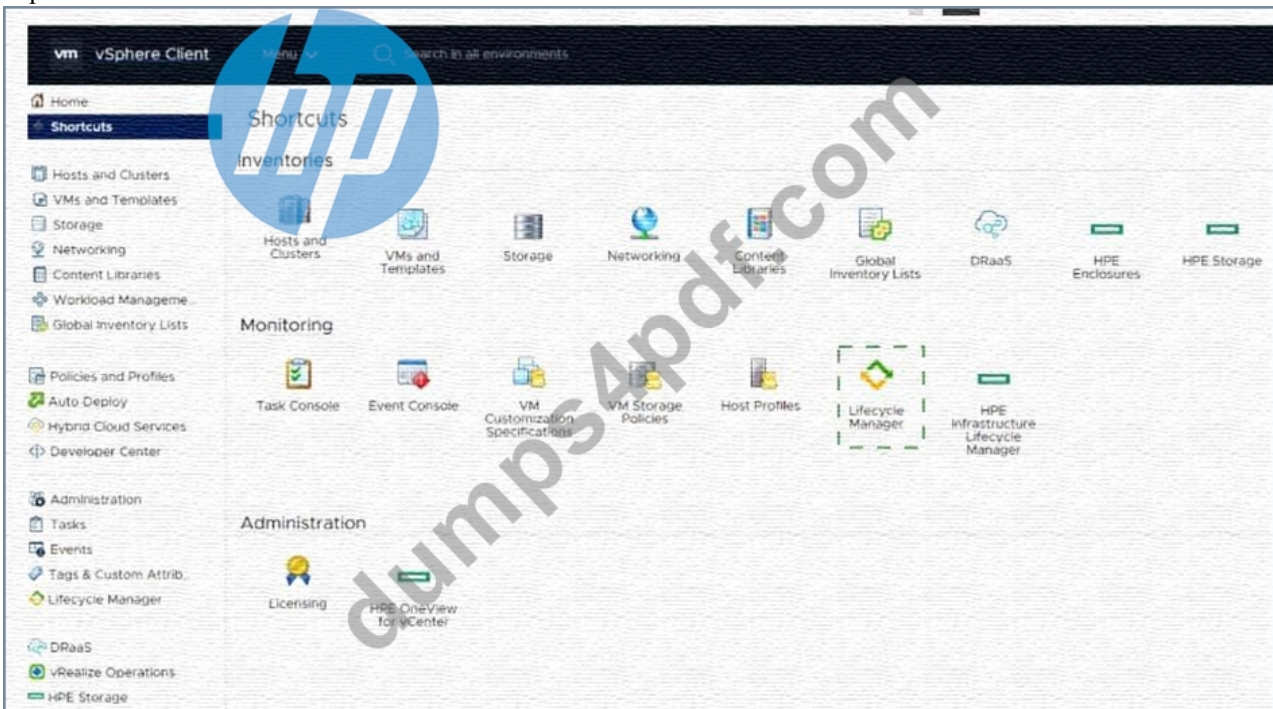

NEW QUESTION # 44

Click the option that will allow you to change the ESXI image used In an OS Deployment Plan.

Answer:

Explanation:

Explanation:

The Lifecycle Manager in the vSphere Client interface is used for managing and updating ESXi hosts, including changing the ESXi image used in an OS Deployment Plan. This tool allows administrators to import, export, and apply different ESXi images, ensuring that the hosts are running the desired version and configuration of ESXi.

NEW QUESTION # 45

.....

There are three versions of our HPE0-S59 study questions on our website: the PDF, Software and APP online. And our online test engine and the windows software of the HPE0-S59 guide materials are designed more carefully. During our researching and developing, we always obey the principles of conciseness and exquisiteness. All pages of the HPE0-S59 Exam simulation are simple and beautiful. As long as you click on them, you can find the information easily and fast.
