How to pass the HPE0-S59 exam successfully and quickly? The answer lies in our valid and excellent HPE0-S59 training guide. We have already prepared our HPE0-S59 training materials for you. They are professional HPE0-S59 practice material under warranty. Accompanied with acceptable prices for your reference, all our HPE0-S59 Exam Materials with three versions are compiled by professional experts in this area more than ten years long.

HP HPE0-S59 exam is designed for IT professionals who are interested in validating their skills and knowledge in HPE compute solutions. HPE0-S59 exam measures an individual's ability to design, deploy, manage, and troubleshoot HPE compute solutions. Passing HPE0-S59 Exam earns the individual the HPE ATP – Server Solutions V4 certification.

HP HPE0-S59 Reliable Dumps, HPE0-S59 Reliable Dump

Our HPE0-S59 exam dumps strive for providing you a comfortable study platform and continuously explore more functions to meet every customer's requirements. We may foresee the prosperous talent market with more and more workers attempting to reach a high level through the HP certification. To deliver on the commitments of our HPE0-S59 Test Prep that we have made for the

majority of candidates, we prioritize the research and development of our HPE0-S59 test braindumps, establishing action plans with clear goals of helping them get the HP certification.

The path to achieving success in the HP HPE0-S59 certification Exam

It's not easy to become an HPE0-S59 certified professional. The first step is to pass your HPE0-S59 exam with high marks. The second step is to choose the right HPE0-S59 exam preparation material. But how do you choose the best study guide?

- Check out the price and quality

The most expensive product does not always guarantee high quality. It's good for you to check out reviews of different products online before making a buying decision.

- Check out the coverage

Every exam guide covers a different range of topics, so before choosing one, make sure that it meets your needs and can help you pass your exam successfully. **HP HPE0-S59 exam dumps** will enhance your skills.

- Check out the format

Make sure that the study guide has all the necessary features such as examples, practice exams and explanations for answers so that you can prepare yourself well for your exam

HPE0-S59 exam is an important certification exam for IT professionals who want to validate their skills in designing, configuring, and managing HPE compute solutions. HPE0-S59 Exam covers a wide range of topics and requires candidates to have a deep understanding of HPE compute solutions technologies, products, and services. To pass the exam, candidates must score at least 70% on the exam, and those who pass will receive the HPE ATP - Hybrid IT Solutions V2 certification, which is a globally recognized certification that demonstrates their expertise in HPE compute solutions.

HPE Compute Solutions Sample Questions (Q19-Q24):

NEW QUESTION # 19

Your customer has an HPE Synergy frame equipped with a D3940 Storage Module. Each of the compute nodes has an appropriate storage controller installed and two 12Gb SAS switches installed in the first fabric. The customer reports that compute nodes cannot access the storage module. What should you verify first when troubleshooting this problem?

- A. If the D3940 storage module is properly licensed through HPE OneView interface.
- **B. If there is a logical interconnect created based on the 12Gb SAS switches.**
- C. If there is at least one iSCSI network configured that will provide access to the module.
- D. If the D3940 module is imported in managed state that allows volume provisioning.

Answer: B

Explanation:

When compute nodes cannot access the D3940 Storage Module in an HPE Synergy environment, the first thing to check is whether a logical interconnect has been created based on the 12Gb SAS switches. Logical interconnects are essential for defining the connection and communication pathways between the compute nodes and the storage module. Without a proper logical interconnect configuration, the compute nodes will not be able to access the storage module.

NEW QUESTION # 20

Your customer has an HPE Synergy platform deployed and managed using HPE OneView. The customer also has HPE Superdome Flex with RMC deployed. They plan to deploy a second nPar and HPE Superdome Flex 280. They plan to manage new components using HPE OneView. What must be done to achieve this goal?

- **A. The customer must add a second Rack Management Controller for HPE Superdome Flex 280**
- B. The customer has to add HPE Superdome Flex to the HPE OneView used to manage HPE Synergy
- C. The customer should deploy an HPE OneView appliance for HPE Superdome Flex management
- D. The customer must use iLO5 to add HPE Superdome Flex systems to HPE OneView

Answer: A

NEW QUESTION # 21

As a result of the troubleshooting process, you recommend replacing HPE Synergy Composer modules which HPE Synergy Composer 2. Why would you recommend this change?

- A. HPE Composer 1 running HPE OneView 5.2 or later can support only 12 frames within a single management node
- B. HPE Composer 2 provides access to iLO interface that can be used for full management of HPE Composer 2 remotely
- C. HPE Composer 1 cannot support remote frames, which doubles the configuration and management procedures effort
- **D. HPE Composer 2 can support more than the maximum 21 frames that are supported with HPE Composer 1 and HPE OneView.**

Answer: D

Explanation:

HPE Composer 2 offers enhanced scalability compared to HPE Composer 1. While HPE Composer 1 and HPE OneView support up to 21 frames, HPE Composer 2 extends this limit, allowing for greater scalability and more efficient management of larger HPE Synergy environments. This makes HPE Composer 2 a suitable recommendation for customers needing to manage more than 21 frames.

NEW QUESTION # 22

Your customer plans to use HPE Primera to boot HPE Synergy compute nodes. They currently have two HPE Virtual Connect SE 100Gb F32 Modules for Synergy modules installed in the frame. The customer wants to use FC as a storage access protocol. What must be done to complete this task?

- A. Add FC upgrade licenses in HPE OneView that will enable FC connectivity for the modules
- **B. FC connectivity on the modules should be enabled through the service console by disabling FCoE.**
- C. Enter both modules into a maintenance mode, then enable FC connectivity through CLI
- D. Enable FC primary and secondary boot on the modules through the HPE OneView interface

Answer: B

NEW QUESTION # 23

Your customer plans to deploy a VMware ESXi with HPE Synergy platform. They also plan a vSAN deployment leveraging HPE D3940 Storage Modules and SSD drives. The customer requested the following components:

- HPE Synergy frame with ten HPE Synergy 480 Gen10 Plus compute modules
- Two HPE Virtual Connect SE 100Gb F32 Modules for Synergy
- An appropriate number of vSAN Standard licenses for each compute node
- One HPE D3940 Storage Module with 40 SSDs - All required cables and options

Which statement about this request is true?

- A. One HPE Virtual Connect SE 100Gb F32 Module for Synergy should be replaced with 50GbE SFP+ ILM
- B. 20 SSD drives should be removed from this setup, as D3940 supports only 20 SSD or SAS drives.
- **C. vSphere licenses should be added, as vSAN licenses do not replace vSphere licenses**
- D. vSphere Standard licenses should be replaced with Enterprise Plus licenses to enable vSAN

Answer: C

Explanation:

vSAN licenses and vSphere licenses are separate entities. While vSAN licenses cover the storage virtualization aspect of VMware's hyper-converged infrastructure, vSphere licenses are required for the actual hypervisor operations. Therefore, the customer must ensure they have the appropriate vSphere licenses in addition to vSAN licenses for their compute nodes.
