You many attend many certificate exams but you unfortunately always fail in or the certificates you get can't play the rules you wants and help you a lot. So what certificate exam should you attend and what method should you use to let the certificate play its due rule? You should choose the test HPE7-A03 Certification and buys our HPE7-A03 learning file to solve the problem. Passing the test HPE7-A03 certification can help you increase your wage and be promoted easily and buying our HPE7-A03 prep guide materials can help you pass the test smoothly.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.
Topic 2	<ul style="list-style-type: none">Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.

Topic 3	<ul style="list-style-type: none"> • Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.
Topic 4	<ul style="list-style-type: none"> • Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.

Other HP HPE7-A03 Exam Keywords

When candidates decide to pass the HPE7-A03 exam, the first thing that comes to mind is to look for a study material to prepare for their exam. The most people will consider that choose HPE7-A03 question torrent, because it has now provided thousands of online test papers for the majority of test takers to perform simulation exercises, helped tens of thousands of candidates pass the HPE7-A03 Exam, and got their own dream industry certificates. HPE7-A03 exam prep has an extensive coverage of test subjects, a large volume of test questions, and an online update program.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q72-Q77):

NEW QUESTION # 72

XYZ Regional Hospital is an integrated healthcare system of Hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 1x neighborhood health centers and 1Z5 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced.

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital Is located In New York City
- Dila Health Center Is located in City A
- Mount Health Center is located In City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States
- Requirements:**
- Provide, via management software, one single pane of glass to manage wired and wireless LANs, and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time insight, troubleshooting tools, and service Level performance reporting
- Seamless integration across wired, wireless. WAN, S0-8branch. IoT
- * Provide secure wireless access to all the employees of (he Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)
- Security options Including WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical teams, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital
- XYZ Regional Hospital is looking for an NAC solution to address its security challenges-Requirements:
- fully redundant NAC solution for management and authentication
- wireless and wired authentication for the main hospital will be handled locally
- wireless and wired authentication for the health centers will be handled locally
- wireless and wired authentication for the clinics will be authenticated against the main hospital NAC
- staff users/devices should be able to visit any site and have the same experience
- support 35k devices

Locations:

- XYZ Regional Hospital is located in City 1 - 15k devices

- Dila Health center is located in City 2 - 8k devices
 - Mount Health Center is located in City 3 - 5k devices
 - Rock Health Center is located in City 4 - 4k devices
 - 125 branch clinics are located at different locations across the US - 2k devices
- Which solution meets the customer's requirements?

- A.
 - 1x 3010 as a Publisher for the main DC
 - 1x 3010 as a Standby Publisher for the DR
 - 2x 3010 as Subscribers for the Main Hospital
 - 2x C1000 as Subscribers for the Dila Health Center
 - 2x VMs as Subscribers for the Mount Health Center
 - 2x C2020 as Subscribers for the Rock Health Center
 - 15k + 10k Access licenses
- B.
 - 1x 3010 as a Publisher for the main DC
 - 1x C2020 as a Standby Publisher for the DR
 - 2x C2020 as Subscribers for the Main Hospital
 - 2x C1000 as Subscribers for the Dila Health Center
 - 2x C1000 as Subscribers for the Mount Health Center
 - 2x VMs as Subscribers for the Rock Health Center
 - 15k + 10k Access licenses
- C.
 - 1x C3010 as a Publisher for the main DC
 - 1x C3010 as a Standby Publisher for the DR
 - 2x C3010 as Subscribers for the Main Hospital
 - 2x C1000 as Subscribers for the Dila Health Center
 - 2x VMs as Subscribers for the Mount Health Center
 - 2x VMs as Subscribers for the Rock Health Center
 - 35k Access licenses
- D.
 - 1x 3010 as a Publisher for the main DC
 - 1x 3010 as a Standby Publisher for the DR
 - 2x 3010 as Subscribers for the Main Hospital
 - 2x C2020 as Subscribers for the Dila Health Center
 - 2x C2020 as Subscribers for the Mount Health Center
 - 2x C2020 as Subscribers for the Rock Health Center

Answer: C

Explanation:

Option B in the provided selections outlines a configuration that includes an Aruba ClearPass Policy Manager as a Publisher for the main DC and as a Standby Publisher for the DR, with subscriber servers allocated to the main hospital and health centers. This setup is likely to match the requirement for a fully redundant NAC solution, with local handling of authentication for the main hospital and health centers, and centralized authentication for the clinics. The inclusion of VMs (Virtual Machines) as subscribers for health centers suggests scalability and flexibility for future expansion. The provision of 35k access licenses aligns with the support for 35k devices across all locations.

NEW QUESTION # 73

A customer wants to have the ability to show network usage. Which product would allow them to have this visibility?

- A. ClearPass
- B. UXI
- C. Aruba OS 8.X
- D. Central

Answer: D

Explanation:

Aruba Central provides a cloud-based management platform for managing and monitoring Aruba Instant APs, switches, and branch gateways. It offers a comprehensive dashboard that gives insights into network usage, health, and performance metrics. Central allows network administrators to have visibility over their entire network infrastructure from a single pane of glass, including detailed usage statistics, which can be broken down by device, application, and time. This visibility into network usage is crucial for optimizing network performance, planning capacity, and understanding user behavior. Aruba Central's analytics and reporting capabilities enable customers to track and analyze network usage, making it the appropriate product choice for customers wanting to monitor their network usage closely.

NEW QUESTION # 74

You are designing a solution with Aruba OS10-based access points and redundant gateways and these are the requirements:

* W1-F16E based access points

- * support for tunneled traffic
- * application visibility
- * rogue APs
- * live upgrades
- * Air Slice
- * Cloud Guest Authentication
- * AI insights

Which licenses are needed? (Select two.)

- **A. Gateway Foundation**
- B. WIAN Gateway
- C. AP Foundation
- **D. AP Advanced**

Answer: A,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

* ArubaOS 10 Licensing Model Overview: Aruba Central licensing for AOS10 deployments is divided into AP licenses and Gateway licenses, each with Foundation and Advanced tiers.

* AP Foundation License provides:

* Standard AP management in Central.

* Basic monitoring and upgrades.

* WPA3, OFDMA, MU-MIMO.

* Basic connectivity features.

* AP Advanced License adds:

* Application visibility

* Rogue AP detection (WIDS/WIPS)

* Air Slice (QoS and SLA assurance)

* AI Insights

* Advanced monitoring and optimization features

* Gateway Foundation License provides:

* Tunneled traffic support (WLAN gateway role)

* Role-based access control

* Cloud Guest Authentication integration

* Policy enforcement firewall (PEF) functions

* WLAN Gateway License is not a separate option in Aruba Central licensing; the required features are included in the Gateway Foundation tier.

* Requirement Mapping:

* Wi-Fi 6E APs # Supported by both AP Foundation and AP Advanced (hardware capability, not license-specific).

* Tunneled traffic # Requires Gateway Foundation (D).

* Application visibility # Requires AP Advanced (C).

* Rogue APs (WIPS/WIDS) # Requires AP Advanced (C).

* Live upgrades # Covered under AP Advanced capabilities.

* Air Slice # Requires AP Advanced (C).

* Cloud Guest Authentication # Supported through Gateway Foundation (D).

* AI Insights # Requires AP Advanced (C).

* Why Not the Other Options?

* A (AP Foundation): Provides only baseline AP management - does not include advanced features like application visibility, rogue AP detection, or Air Slice.

* B (WLAN Gateway): Not a standalone license tier; functionality is delivered via Gateway Foundation.

* C (AP Advanced): Required for Air Slice, rogue APs, AI Insights, and application visibility.

* D (Gateway Foundation): Required for tunneling, guest authentication, and policy enforcement.

Final Justification:

To meet all of the listed requirements, you need:

* AP Advanced (C) # for advanced RF, AI, security, and application features.

* Gateway Foundation (D) # for tunneling, guest services, and gateway role support.

NEW QUESTION # 75

A global cruise line company needs to refresh its current fleet. They want to refresh the insides of the ship to be cost-effective and

increase their sustain ability. They Mill replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh Us current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins. 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF. of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single

OM2 pair to the IDF. the maximum length is 60 meters (200 ft). Each technical room is connected by a single

OM2 pair to the IDF. with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs).

the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on the best practices, what should be recommended as the most cost-effective switch model for the technical rooms?

- A. Aruba 6300M 12p ClassD PoE and 36p Class6 PoE HPE Smart Rate 1G/2.5G/5G and 2p SOG and Zp 10G
- B. HPE Aruba Networking 6300M 24p HPE Smart Rate 1 G/2.5G/5G/10G Class6 PoE and 2p 50G and 2 p 25G
- C. HPE Aruba Networking 6200M 36G 12SR5 ClassG PoE 4SFP*
- D. HPE Aruba Networking 6200M 24G Class- PoE 4SFP*

Answer: B

Explanation:

For technical rooms requiring redundant power and an upgrade to 10GbE uplinks to handle increased network traffic, the most cost-effective switch model is the HPE Aruba Networking 6300M 24p HPE Smart Rate 1G/2.

5G/5G/10G Class6 PoE and 2p 50G and 2p 25G. This model offers the necessary port density and speed flexibility, with support for high-power PoE devices and uplink capabilities that meet the future-proofing needs for technical rooms on the cruise ships. The switch's redundant power capabilities ensure high availability and resilience for critical technical room infrastructure, aligning with the customer's requirements for sustainability, cost-effectiveness, and preparedness for future hardware refreshes without extensive unused port capacities.

NEW QUESTION # 76

ACME retail has 38 locations spread out across Ave US states and two provinces in Canada. They are looking to grow 20% over the next two years. They have an HO with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 st m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board. A typical store is reportedly about 60,000 sq ft (5575 sqm) and smaller stores are planned at 25,000 sq ft

2320 sq m. The locations need to expand the abilities to vendors that need to add setup displays or Interactive kiosks in the stores. The current Infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current pbx system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would like to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can

interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDF's located on floors one and two. The HOF is in the basement, and you have multiple WAN circuits for the HO links. Each store has a local handoff from the cable company (ethernet) In the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

What are two primary concerns of the Stakeholder' (Select two.)

- A. future proof
- B. cost of solution
- C. ease of access
- D. expansion

Answer: A,B

Explanation:

For the stakeholders at ACME Retail, the primary concerns include the cost of the solution and ensuring that the solution is future-proof. Given the company's budget concerns, it is crucial that the chosen network infrastructure offers a good return on investment and aligns with their financial constraints. At the same time, considering the company's growth plans and the rapid evolution of technology, the solution must be scalable and adaptable to future needs. This involves selecting networking equipment and technologies that can support emerging trends, such as increased wireless device usage, cloud computing, and advanced security requirements, without necessitating frequent, costly upgrades. Balancing these concerns will help ACME Retail achieve its operational goals while positioning itself for sustainable growth and innovation.

NEW QUESTION # 77

.....

Are you still staying up for the HPE7-A03 exam day and night? If your answer is yes, then you may wish to try our HPE7-A03 exam materials. We are professional not only on the content that contains the most accurate and useful information, but also on the after-sales services that provide the quickest and most efficient assistants. With our HPE7-A03 practice torrent for 20 to 30 hours, we can claim that you are ready to take part in your HPE7-A03 exam and will achieve your expected scores.
