They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood which makes any learners have no obstacles and our HPE7-A08 Guide Torrent is suitable for anyone. The content is easy to be mastered and has simplified the important information. Our HPE7-A08 test torrents convey more important information with less questions and answers and thus make the learning relaxing and efficient.

HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.
Topic 2	• Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.

Topic 3	• Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.
Topic 4	• Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.

Quiz HPE7-A08 - HPE Aruba Networking Switching Professional Exam Useful New Exam Online

To suit customers' needs of the HPE7-A08 preparation quiz, we make our HPE7-A08 exam materials with customer-oriented tenets. Famous brand in the market with combination of considerate services and high quality and high efficiency HPE7-A08 study questions. Without poor after-sales services or long waiting for arrival of products, they can be obtained within 5 minutes with well-built after-sales services.

HPE Aruba Networking Switching Professional Exam Sample Questions (Q314-Q319):

NEW QUESTION # 314
A Linux SFTP server is configured for IP address 192.168.1.100, and the CX 6325 switch has a management IP address 192.168.1.200.
How can you back up the saved switch configuration to a remote location?

- A. Use the command scp admin@192.168.1.200:/startup-config on the SFTP server.
- B. Use the command scp admin@192.168.1.200:/running-config on the SFTP server.
- C. Use the command copy startup-config scp://user@192.168.1.100/switch_config.cfg vrf default on the switch.
- D. Use the command copy startup-config sftp://user@192.168.1.100/switch_config.cfg vrf mgmt on the switch.

Answer: D

NEW QUESTION # 315
Refer to the exhibit:

```
Core-2(config# show running-config  begin vsx
vsx
    system-mac 06:02:10:00:02:00
    inter-switch-link lag 256
    role secondary
    vsx-sync-global vsx-global
!
!
https-server vrf mgmt
```

The primary VSX switch has a DHCP relay configured; however, the secondary switch does not display the DHCP relay configuration in the running configuration.
How can the VSX configuration be changed to have the same config on both nodes?

- A. On the primary switch, add vsx-sync ip-helper under VSX configuration.
- B. On the secondary switch, add vsx-sync ip-helper under VSX configuration.
- C. On the primary switch, add vsx-sync dhcp-relay under VSX configuration.
- D. On the secondary switch, add vsx-sync dhcp-relay under VSX configuration.

Answer: C

Explanation:

In a VSX cluster, certain configurations such as DHCP relay need to be synchronized between both nodes. To sync DHCP relay configuration from the primary to the secondary, the command:

vsx-sync dhcp-relay

must be added under the VSX configuration on the primary switch. This ensures that DHCP relay settings are pushed to the secondary member automatically.

Adding vsx-sync ip-helper relates to IP helper addresses, not DHCP relay specifically.

Adding the sync command on the secondary has no effect as synchronization originates from primary.

NEW QUESTION # 316

A company has a third-party AAA server solution. The campus access layer was just upgraded to AOS-CX switches that perform access control with MAC-Auth and 802.1X. The company has an Aruba Mobility Controller (MC) solution for wireless, and they want to leverage the firewall policies on the controllers for the wired traffic.

What is correct about how the company should implement a security solution where the wired traffic is processed by the MCs?

- A. Implement downloadable user roles with a device role defined on the AOS-CX switches and MCs
- B. Implement downloadable user roles with a gateway role defined on the AOS-CX switches
- C. Implement local user roles with a gateway role defined on the AOS-CX switches
- D. Implement standards-based RADIUS VSAs to pass policy information directly to the AOS-CX switches and MCs

Answer: C

Explanation:
Because it use 3rd party aaa server.

NEW QUESTION # 317

Your customer has an existing gateway cluster that they are using to tunnel traffic from APs and would like to configure the same for their CX switches. Which tunneling option should you recommend?

- A. VNBT
- B. UBT
- C. IPSec
- D. GRE

Answer: B

NEW QUESTION # 318

Which two features in Aruba CX switches help in automating network-wide policy enforcement? (Select two)

- A. Network Analytics Engine (NAE)
- B. Aruba NetEdit
- C. Dynamic Segmentation
- D. Virtual Switching Framework (VSF)

Answer: B,C

Explanation:
Dynamic Segmentation enforces role-based network access, while NetEdit automates configuration changes, ensuring consistent security policies across the network.

NEW QUESTION # 319
