Solution brief

## CREATE INTELLIGENT STORAGE OPERATIONS WITH HPE AND VMWARE SECURE WORKLOADS AND DATA SOLUTIONS

Automate and integrate your storage environment to better protect mission-critical workloads.

- On-premises capacity planning is challenging: 92% of enterprises wait a month or more for new capacity, but they also waste 40-70% of their server capacity.<sup>1</sup>
- Scalability and agility are critical concerns: 70% of IT decision-makers say capacity planning is a headache, while 60% say performance is poor.<sup>2</sup>
- A shift from storage arrays to software-defined storage: 21% of businesses plan to use software-defined storage solutions instead of buying shared storage arrays.<sup>3</sup>

### MODERNIZATION DEMANDS BETTER STORAGE INFRASTRUCTURE

Companies are now inundated with data, but still face challenges with how to securely and effectively manage it all. However, traditional storage solutions often aren't equipped to meet the evolving business needs of modern organizations, seamlessly unify their hardware and software storage resources, or offer capabilities for them to easily align storage resources with individual application requirements. Companies already grapple with too much complexity and struggle to manage storage across different environments. To meet today's business demands, they need simplified, dynamic storage management that increases their IT visibility, reduces complexity, and provides robust support for business-critical workloads. Integrated storage solutions that virtualize and automate storage, streamline compliance, and facilitate service-level delivery will give organizations the capabilities they need to create a more agile, protected enterprise.

### WHY HPE AND VMWARE SECURE WORKLOADS AND DATA SOLUTIONS

As leaders in Virtual Volumes (vVols), HPE and VMware are changing how to best manage external storage and virtualize more business-critical workloads. Built for the cloud, HPE's AI-enabled intelligent, application-aware predictive storage provides maximum ROI, lower TCO, ease of use, cost benefits, and simplicity for VMware deployments. Together, our solutions tightly integrate applications and storage resources to simplify day-to-day operations, improve VM management, and increase efficiency.

#### Deep Integration

As a key vVols design and integration partner and reference platform, HPE delivers full vVols support across the HPE Alletra, HPE Primera, and HPE Nimble Storage platforms, with hardware architectures optimized for vVols. HPE Primera and HPE Nimble Storage combined have the largest number of vVols integrations for VMware.
