HPE7-A01 Demo Test - HP Realistic Aruba Certified Campus Access Professional Exam New Braindumps Pdf Pass Guaranteed
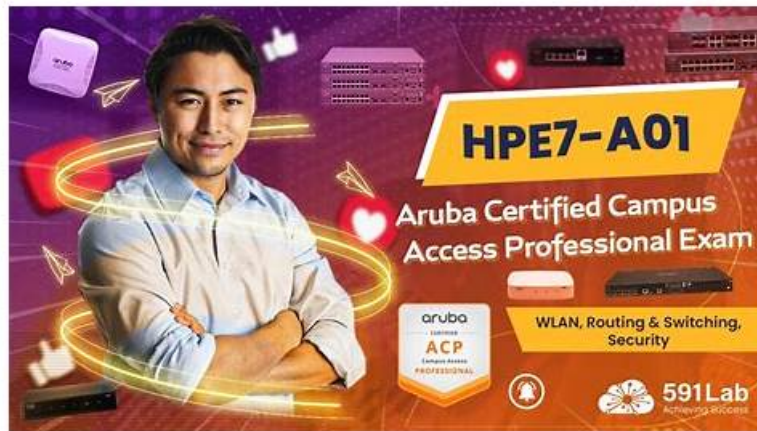

Our HPE7-A01 practice materials are high quality and high accuracy rate products. It is all about their superior concreteness and precision that helps. Every page and every points of knowledge have been written from professional experts who are proficient in this line and are being accounting for this line over ten years. Many exam candidates attach great credence to our HPE7-A01 practice materials. Our HPE7-A01 practice materials do not need any ads, their quality has propaganda effect themselves.

HP HPE7-A01 (Aruba Certified Campus Access Professional) Exam is an industry-recognized certification exam for IT professionals who specialize in designing, implementing, and managing Aruba networking solutions. Aruba Certified Campus Access Professional Exam certification exam is designed to validate the skills and knowledge required for professionals to configure, optimize, and troubleshoot Aruba WLANs (Wireless Local Area Networks) in campus environments.

The HP HPE7-A01 Exam is designed to test the candidate's understanding of different Aruba technologies, including ArubaOS switches, access points, and controllers. HPE7-A01 exam also covers topics such as VLANs, IP routing, wireless security, and troubleshooting. Passing the exam indicates that the candidate has the skills and knowledge required to design, deploy, and manage Aruba wireless and wired networks.

Reliable HPE7-A01 Guide Dumps: Aruba Certified Campus Access Professional Exam - HPE7-A01 Test Prep Materials - PrepAwayTest

In the HP HPE7-A01 Dumps PDF format of PrepAwayTest, the questions are very relevant to the actual Aruba Certified Campus Access Professional Exam (HPE7-A01) exam. The Aruba Certified Campus Access Professional Exam (HPE7-A01) dumps PDF format is appropriate for laptops, smartphones, and tablets. As the HPE7-A01 PDF questions file is portable, you can easily study via it anywhere. You can also print these HP PDF Dumps. PrepAwayTest regularly updates its Aruba Certified Campus Access Professional Exam (HPE7-A01) questions PDF file to improve the questions and introduce changes when required.

HP Aruba Certified Campus Access Professional Exam Sample Questions (Q111-Q116):

NEW QUESTION # 111
How is Multicast Transmission Optimization implemented in an HPE Aruba wireless network?

- A. When this option is enabled the minimum default rate for multicast traffic is set to 12 Mbps for 5 GHz
- B. "The optimal rate for sending multicast frames is based on the highest broadcast rate across all associated clients
- C. The optimal rate for sending multicast frames is based on the lowest broadcast rate across all associated clients.

- D. The optimal rate for sending multicast frames is based on the lowest unicast rate across all associated clients.

Answer: D

NEW QUESTION # 112

A customer has a site with 200 AP-515 access points 75AP-565 access points installed. The customer is rolling out new mobile phones with Wi-Fi-calling. 802.1X is in use for authentication.
What should be enabled to ensure the best roaming experience?

- A. 802. 11r
- B. 802.1X
- C. 802.11W
- D. 802 .11h

Answer: A

Explanation:
https://www.howtogeek.com/794724/what-is-wi-fi-calling/ 2:
https://www.networkcomputing.com/networking/your-network-optimized-wifi-calling 3:
https://www.arubanetworks.com/techdocs/AOS-CX/10.10/HTML/monitoring_6300-
6400/Content/Chp_LEDs/fr Wi-Fi calling is a feature that allows you to make or receive voice calls over Wi-Fi instead of cellular network.
Wi-Fi calling can provide better voice quality and reliability in areas with poor or no cellular coverage.

NEW QUESTION # 113

With Aruba CX 6300. how do you configure ip address 10 10 10 1 for the interface in default state for interface 1/1/1?

- A. int 1/1/1. ip address 10.10.10.1/24
- B. int 1/1/1. no switching, ip address 10 10 10.1/24
- C. int 1/1/1. switching, ip address 10 10 10 1/24
- D. int 1/1/1. routing, ip address 10.10.10 1/24

Answer: B

Explanation:
To configure an IP address for an interface in default state for interface 1/1/1 on Aruba CX 6300 switch, you need to disable switching on the interface first with the command no switching. Then you can assign an IP address with the command ip address. The other options are incorrect because they either do not disable switching or use invalid keywords such as switching or routing.

NEW QUESTION # 114

What is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches?

- A. Controller authentication and port-based tunneling of all traffic
- B. Central authentication and port-based tunneling of the voice traffic.
- C. Switch authentication and local forwarding of the voice traffic
- D. Switch authentication and user-based tunneling of the voice traffic.

Answer: C

Explanation:
This is the best practice for handling voice traffic with dynamic segmentation on AOS-CX switches. Dynamic segmentation is a feature that allows AOS-CX switches to tunnel user traffic to a controller or another switch based on user roles and policies. For voice traffic, it is recommended to use switch authentication and local forwarding, which means the voice devices are authenticated by the switch and their traffic is forwarded locally without tunneling. This reduces latency and jitter for voice traffic and improves voice quality. The other options are incorrect because they either use central authentication or tunneling, which are not optimal for voice traffic. References:

NEW QUESTION # 115

In an ArubaOS 10 architecture using an AP and a gateway, what happens when a client attempts to join the network and the WLAN is configured with OWE?

- A. RADIUS protocol is utilized.
- B. No encryption is applied.
- C. The Gateway will not respond.
- D. Authentication information is not exchanged

Answer: D

Explanation:
This is the correct statement about what happens when a client attempts to join the network and the WLAN is configured with OWE (Opportunistic Wireless Encryption). OWE is a standard that provides encryption for open networks without requiring any authentication or credentials from the client or the network. OWE uses a Diffie-Hellman key exchange mechanism to establish a secure session between the client and the AP without exchanging any authentication information. The other options are incorrect because they either describe scenarios that require authentication or encryption methods that are not used by OWE.
