

HPE7-A03 Test Torrent - Your Wisest Choice to Pass Aruba Certified Campus Access Architect Exam

For candidates who will attend the exam, choose the right HPE7-A03 exam torrent is important. We offer you the HPE7-A03 exam dumps to help you pass the exam. With the skilled experts to compile the exam dumps, the HPE7-A03 study materials of us contain the questions and answers, and you can get enough practicing by using them. Besides, the HPE7-A03 Soft test engine stimulates the real exam environment, and you can know what the real exam is like by using this version.

If you want to ace the Aruba Certified Campus Access Architect Exam (HPE7-A03) test, the main problem you may face is not finding updated HPE7-A03 practice questions to crack this test quickly. After examining the situation, the DumpsReview has come with the idea to provide you with updated and actual HP HPE7-A03 Exam Dumps so you can Pass HPE7-A03 Test on the first attempt. The product of DumpsReview has many different premium features that help you use this product with ease. The study material has been made and updated after consulting with a lot of professionals and getting customers' reviews.

Fully Updated HP HPE7-A03 Dumps - Ensure Your Success With HPE7-A03 Exam Questions

You can easily get HP HPE7-A03 certified if you prepare with our HP HPE7-A03 questions. Our product contains everything you need to ace the HPE7-A03 certification exam and become a certified HP professional. So what are you waiting for? Purchase this updated HP HPE7-A03 Exam Practice material today and start your journey to a shining career.

HP HPE7-A03 Exam Syllabus Topics:

Topic	Details
Topic 1	Analyze Requirements: It focuses on determining possible high-level solutions. The topic also discusses mapping the needs into technical solutions and evaluating the proposed solution against project objectives and dependencies. Moreover, it also focuses on documenting assumptions.
Topic 2	Propose the Solution: The focal point of this topic is creating the design documentation and the final design. Moreover, the topic also focuses on presenting the solution.
Topic 3	Architect the Solution: It measures your knowledge about identifying the solution options, designing high-level topologies, selecting the correct products, and determining the suitable overlay and underlay design. Additionally, the topic discusses how to verify that the design meets the original requirements.

Topic 4	• Discover Requirements: This topic defines the goals and identifies the current environment and the objectives. Lastly, it also focuses on collecting information.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q61-Q66):

NEW QUESTION # 61

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client has decided to market additional tools to its retail customers. The desire is to make a Blue Dot wayfinding app available to any customer to allow them to locate stores and services within the retail space.

They would also like to have directed pop-ups within the app appear when a customer walks within close proximity to any of the 10 "Promotional Kiosks." What licensing will be needed to make this retail solution a reality? (Select two.)

- A. qty 2 Meridian Map subscriptions
- B. qty 1 Meridian Map subscription
- C. qty 10 Aruba beacons
- D. qty 2 Meridian Blue Dot subscriptions

Answer: A,D

NEW QUESTION # 62

What is the simple difference between a main distribution framework (MOF) closet and an intermediate distribution framework (IDF) closet?

- A. MDF Is a term used in Europe whereas the Americas refer to all network closets as IDFs in their documentation.
- B. MDFs only connect to other MDFs, and IDFs only connect to other IDFs.
- C. MDFs always have larger rooms than IDFs.
- D. MOF is the point where traffic egresses the campus network, and IDFs distribute that connectivity throughout the building.

Answer: D

Explanation:

In network design, the Main Distribution Frame (MDF) and Intermediate Distribution Frame (IDF) are critical components of the network infrastructure. The MDF is the primary hub of the network, often where services from outside the campus or building enter and get distributed. It acts as a central point for network distribution. On the other hand, IDFs are secondary hubs situated throughout the building or campus, extending connectivity provided by the MDF to various endpoints or areas within the building. The simple difference between them lies in their roles within the network infrastructure: the MDF serves as the main point of network ingress and egress, while IDFs are used to further distribute the network to specific locations or floors within the building.

NEW QUESTION # 63

Identify the stakeholders when gathering information for the network design and new IDF/MDF design. (Select two.)

- A. Chief Financial Officer
- B. Network Operations manager
- C. Help desk manager

- D. Facility manager

Answer: B,C

Explanation:

When designing a network and considering new Intermediate Distribution Frame/Main Distribution Frame (IDF/MDF) deployments, it's essential to gather information from various stakeholders to ensure the design meets all operational and organizational requirements. According to Aruba Campus Access learning resources, the Help Desk Manager and Network Operations Manager are crucial stakeholders in this process.

The Help Desk Manager provides insights into common issues, user complaints, and service requests, which can influence network design decisions to improve user experience and operational efficiency. The Network Operations Manager, on the other hand, offers a technical perspective on network management, maintenance requirements, and operational challenges. Engaging with these stakeholders ensures that the network design is aligned with both user needs and technical operational standards, contributing to a more resilient, efficient, and user-friendly network infrastructure.

NEW QUESTION # 64

Which alternative source is best suited for site surveys or simulations if no floor plans are available?

- A. blank sheet of paper
- **B. fire escape plan**
- C. Google Maps
- D. simple wall drawings

Answer: B

Explanation:

When floor plans are not available for site surveys or simulations, the best alternative source to use is the fire escape plan (Option D). Fire escape plans are typically available in most buildings and provide a simplified layout of the premises, including walls, doors, and sometimes the location of permanent fixtures. While not as detailed as architectural floor plans, fire escape plans can offer enough information for initial site survey estimations and RF planning. They allow network designers to understand the basic layout and potential RF obstacles or coverage areas, making them a practical tool for preliminary wireless network planning and simulations in the absence of more detailed floor plans.

NEW QUESTION # 65

What should be Included in an Executive Summary? (Place the correct Items into the list at the right Order is no: Important Not all cottons win be used)

POSSIBLE INCLUSIONS	CORRECT INCLUSIONS
brief summary	
contact information	
high-level design	
job roles	
purpose of the document	
recommended cabling	
recommendations	
scope	
target audience	

Answer:

Explanation:

POSSIBLE INCLUSIONS	CORRECT INCLUSIONS
brief summary	
contact information	
high-level design	
job roles	
purpose of the document	
recommended cabling	
recommendations	
scope	
target audience	

For an Executive Summary, typically the following items should be included:

- ### NEW QUESTION # 66

To stand in the race and get hold of what you deserve in your career, you must check with all the HP HPE7-A03 Exam Questions that can help you study for the HP HPE7-A03 certification exam and clear it with a brilliant score. You can easily get these HP HPE7-A03 Exam Dumps from HP that are helping candidates achieve their goals.
