

HPE7-J02 Pdf Files & Exam HPE7-J02 Vce Format

Our company provides the free download service of HPE7-J02 test torrent for all people. If you want to understand our HPE7-J02 exam prep, you can download the demo from our web page. You do not need to spend money; because our HPE7-J02 test questions provide you with the demo for free. You just need to download the demo of our HPE7-J02 Exam Prep according to our guiding; you will get the demo for free easily before you purchase our products. By using the demo, we believe that you will have a deeply understanding of our HPE7-J02 test torrent. We can make sure that you will like our products; because you will it can help you a lot.

HP HPE7-J02 Exam Syllabus Topics:

Topic	Details
Topic 1	Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues.
Topic 2	Monitoring and Telemetry: This section examines the skills of Cloud Operations Specialists in using HPE or third-party management tools to monitor customer telemetry. Candidates must configure alerts, analyze logs, and evaluate reports to identify SLA trends, outages, and performance issues.
Topic 3	Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains.
Topic 4	Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations.
Topic 5	Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments.

HPE7-J02 Question Dumps Keep the High Accuracy of Advanced HPE Storage Integrator Solutions Written Exam Exam - Actual4Dumps

Our HPE7-J02 guide torrent boosts 98-100% passing rate and high hit rate. Our HPE7-J02 test torrent use the certificated experts and our questions and answers are chosen elaborately and based on the real exam. The language of our HPE7-J02 study torrent is easy to be understood and the content has simplified the important information. Our product boosts the function to simulate the HPE7-J02 Exam, the timing function and the self-learning and the self-assessment functions to make the learners master the HPE7-J02 guide torrent easily and in a convenient way.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q46-Q51):

NEW QUESTION # 46

Exhibit shows HPE StoreOnce Catalyst Store Security Settings:

Server Controlled Data Immutability enabled (7 days).
Maximum ISV Controlled Data Immutability Retention (90 days).
Which statement is correct?

- A. The Maximum ISV Controlled Data Immutability Retention parameter must be set to 0 for optimal Veeam v12 support.
- B. Server-Controlled Data Immutability is required to achieve the highest immutability with Veeam v12 backups.
- C. Maximum ISV Controlled Data Immutability Retention allows the ISV backup application to manage item-level immutability.
- D. Server-Controlled and ISV-Controlled Data Immutability values do not need to match when both are configured.

Answer: C

NEW QUESTION # 47

You are working with a customer to upgrade their backup target environment and they are interested in HPE StoreOnce. Which HPE tool should you use to size and configure a solution for this customer?

- A. HPE CloudPhysics

- B. HPE Ninja Online
- **C. HPE NinjaSTARS**
- D. One Config Advanced

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE NinjaSTARS (Storage Assessment and Right Sizing) is the dedicated HPE tool for sizing and configuring StoreOnce backup appliances. It evaluates backup datasets, retention policies, deduplication ratios, and replication to recommend the right StoreOnce model and configuration.

Distractors:

A (CloudPhysics): Used for virtual infrastructure and block storage assessments, not backup target sizing.

C (Ninja Online): General sizing tool, not specific for StoreOnce.

D (OCA): Used for quoting/configuration, but sizing requires NinjaSTARS first.

Key Concept: HPE NinjaSTARS is the StoreOnce sizing tool.

Reference: HPE NinjaSTARS Backup Sizing Tool Guide.

NEW QUESTION # 48

A mid-sized enterprise needs a file storage solution that offers scalable storage and integrated data protection, backup, and disaster recovery.

Which solution best meets the company's needs?

- **A. HPE GreenLake for File Storage**
- B. Scality
- C. Qumulo
- D. Cohesity

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage (powered by VAST Data) delivers scale-out NAS capabilities with native data protection, snapshots, and disaster recovery integration. It is designed for enterprises that need both scalability and integrated protection in a single consumption or CapEx model.

Distractors:

A (Qumulo): Excellent scale-out file, but lacks deep HPE ecosystem integration.

B (Scality): Primarily focused on object storage, not file workloads.

D (Cohesity): Strong in backup and secondary storage, but not primary enterprise file services.

Key Concept: HPE GreenLake for File Storage = enterprise-grade file storage + integrated protection.

Reference: HPE GreenLake for File Storage Overview.

NEW QUESTION # 49

Your customer is deploying HPE Morpheus Enterprise Software as a single orchestration platform for compute and storage resources. To achieve a high-availability deployment in a single site, how many VMs must be deployed if distributed databases are not required?

- A. 1 VM
- B. 1 VM with VMware HA and DRS active
- **C. 3 VMs**
- D. 4 VMs with distributed database setup

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Morpheus can run as a single VM in non-critical environments, but for high availability (HA) without distributed databases, the recommendation is to deploy 3 VMs in a cluster. This ensures quorum and redundancy across application nodes, protecting against single VM failure. Distributed database mode requires more VMs, but is not needed in this scenario.

Distractors:

A: 4 VMs are required only if distributed DB is enabled (PostgreSQL cluster), not here.

B/D: A single VM (with or without VMware HA) doesn't provide native Morpheus HA resilience.

Key Concept: Morpheus HA = 3-node cluster minimum without distributed DB.

Reference: HPE Morpheus Deployment and Architecture Guide.

NEW QUESTION # 50

You are meeting with a customer who wants to replace their current file storage system. You plan to recommend HPE GreenLake for File Storage. The customer asks whether the solution can provide cross-protocol access to the same data using both NFS and SMB simultaneously.

What is the impact on your design?

- A. Two different IP pools are required, one for each access protocol. The virtual IP pool address enables cross-protocol functionality
- B. A 3rd-party SDS solution such as Qumulo or Scality should be discussed since the HPE GreenLake for File Storage does not support this
- **C. HPE GreenLake for File Storage supports native cross-protocol access with NFS, SMB, and S3. You must enable both protocols per share**
- D. This is perfectly possible with HPE GreenLake for File Storage by creating two file shares (one for each protocol) and setting up replication

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE GreenLake for File Storage, powered by VAST Data software, natively supports cross-protocol access (NFS, SMB, and S3) to the same dataset. This means a file written via NFS can be accessed via SMB or S3 without replication. For cross-protocol access, both protocols must be enabled at the share/bucket level.

This is a core differentiator of HPE's GreenLake for File Storage solution.

Distractors:

A: Wrong, because GreenLake for File Storage already has native multi-protocol support - no need for 3rd party SDS.

C: Incorrect, as replication between separate shares is not required; it is a native capability.

D: Misleading - IP pools are used for load balancing and client connectivity, but not required to enable cross-protocol access.

Key Concept: Multi-protocol access in HPE GreenLake for File Storage (NFS/SMB/S3).

Reference: HPE GreenLake for File Storage Technical Overview, VAST Data Universal Storage white papers

NEW QUESTION # 51

.....

As job seekers looking for the turning point of their lives, it is widely known that the workers of recruitment is like choosing apples--viewing resumes is liking picking up apples, employers can decide whether candidates are qualified by the HPE7-J02 appearances, or in other words, candidates' educational background and relating HPE7-J02 professional skills. Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged HPE7-J02 Certification, can they become popular employees. So for you, the HPE7-J02 latest braindumps compiled by our company can offer you the best help.
