

HPE7-J02 Test Braindumps: Advanced HPE Storage Integrator Solutions Written Exam & HPE7-J02 Exam Guide & HPE7-J02 Study Guide

Some sites provide HP HPE7-J02 Exam study materials on the Internet, but they do not have any reliable guarantee. Let me be clear here a core value problem of PracticeMaterial. All HP exams are very important. In this era of rapid development of information technology, PracticeMaterial just questions provided by one of them. Why do most people choose PracticeMaterial? This is because the exam information provided by PracticeMaterial will certainly be able to help you pass the exam. Why? Because it provides the most up-to-date information, which is the majority of candidates proved by practice.

For candidates who are going to buy HPE7-J02 training materials online, they may pay much attention to the quality of the exam dumps, since it will depend on whether they may pass the exam or not. HPE7-J02 exam braindumps of us are reviewed by experienced specialists, therefore the quality can be guaranteed. They also check HPE7-J02 Training Materials at times to ensure the timely update. Moreover, we offer you free demo to have a try, and you can have a try before buying. You will know the mode of the complete version of the HPE7-J02 exam dumps.

HPE7-J02 Reliable Test Book, New HPE7-J02 Braindumps Files

As the development of the science and technology is fast, so the information of the HPE7-J02 exam materials changes fast accordingly. The updated version of the HPE7-J02 study guide will be different from the old version. Some details will be perfected and the system will be updated. You will enjoy learning on our HPE7-J02 Exam Questions for its wonderful and latest design with the latest technologies applied.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

A growing technology company is planning to upgrade its data center infrastructure. Their considerations:

Budget: Predictable monthly payments, no upfront CapEx.

Flexibility: Long-term use, no forced returns.

Ownership: Prefer eventual ownership, spread payments.

Control: Full customization and upgrades.

Which procurement option best meets their needs?

- A. Capital purchase
- **B. Capital lease**
- C. Operating lease

- D. Consumption based

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

A Capital Lease (also known as a finance lease) spreads costs over time like OpEx, while giving the customer the ability to own the equipment at the end of the lease term. This matches the desire for predictable payments, eventual ownership, and full control.

Distractors:

A (Consumption model): GreenLake provides OpEx flexibility but does not lead to ownership.

B (Operating lease): Pure rental; equipment must be returned, no ownership.

C (Capital purchase): Requires large upfront payment, which the customer wants to avoid.

Key Concept: Capital Lease = predictable payments + ownership path.

Reference: HPE Financial Services Procurement Options.

NEW QUESTION # 25

A pool of Microsoft SQL servers started to use the Alletra 6000 family array six months ago. The data growth has been higher than expected, and the performance of the databases is facing some latency issues.

Which method would allow both capacity and performance to grow when expanding the array, while keeping the management simple?

- A. By initially selecting the timeless storage option for the array.
- B. By selecting more flash to cache ratio on the expansion shelves.
- **C. By adding more arrays and capacity to a single scale-out group.**
- D. By including more NIC cards to load balance host traffic.

Answer: C

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Alletra 6000 is a scale-out architecture array. Adding more arrays to a single scale-out group increases both performance (IOPS, throughput) and capacity, while maintaining single-pane management via HPE Data Services Cloud Console. This is the most efficient way to address both capacity growth and latency reduction for SQL workloads.

Distractors:

B: Adding NICs may help with throughput but not backend latency or capacity scaling.

C: Flash-to-cache ratios can optimize read caching but don't fundamentally increase system-wide performance.

D: Timeless storage is a procurement/licensing option, not a performance/capacity scaling method.

Key Concept: Alletra 6000 scale-out clustering for balanced growth of capacity and performance.

Reference: HPE Alletra 6000 Technical Architecture Guide.

NEW QUESTION # 26

Two HPE Alletra 6000 arrays are configured for peer persistence between datacenters A and B, which have a fiber distance of 50km (31mi). The datacenter B hardware will be relocated to a new location that will increase the fiber distance to 150km (93mi).

Which condition is valid once the relocation is finished?

- **A. The peer persistence configuration is supported, when latency remains <10ms.**
- B. The peer persistence replication links need to be changed to RC transport.
- C. The fiber distance exceeds the distance supported for peer persistence setup.
- D. The peer persistence setup needs to be changed to active peer persistence.

Answer: A

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE Peer Persistence is supported over distances of up to 150-200 km, as long as the round-trip latency is

#10ms. Therefore, even after relocation to 150km, Peer Persistence remains supported provided latency requirements are met.

Distractors:

B: RC (Remote Copy) transport is already the underlying technology, but no change is required.

C: Peer Persistence is already an active-active design; no change to "active" mode is needed.

D: Distance does not exceed the supported range; only latency matters.

Key Concept: Latency <10ms is the critical requirement for Peer Persistence.

Reference: HPE Alletra 6000/Primera Peer Persistence Best Practices.

NEW QUESTION # 27

Your customer is using 2 HPE StoreOnce appliances across 2 sites with replication enabled for disaster recovery. They are concerned about the fact that the StoreOnce administrators have full access to the systems, which allows them to delete backup copies on these systems.

What needs to be used to address the concern of your customer?

- A. Data at rest encryption
- **B. Dual Authorization**
- C. Challenge Handshake Authentication Protocol (CHAP)
- D. Resource restriction policies

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

HPE StoreOnce Dual Authorization prevents a single administrator from deleting, expiring, or modifying backup data. Instead, any destructive action requires approval from a second administrator, mitigating insider threats and accidental deletions. This is the correct feature for immutability protection in a replicated StoreOnce environment.

Distractors:

B (CHAP): Used for iSCSI authentication, not backup immutability.

C: Encryption protects data confidentiality, not accidental deletion.

D: Resource restrictions are policy-driven but don't enforce dual control over destructive actions.

Key Concept: Dual Authorization for ransomware and insider-threat protection on StoreOnce.

Reference: HPE StoreOnce Security Features White Paper.

NEW QUESTION # 28

Which statement is correct when deploying an HPE Zerto DR solution where an Extended Journal Copy is required with a one-year retention period?

- A. An additional license is required to enable the Extended Journal Copy feature.
- **B. HPE Zerto integrates with HPE StoreOnce to enable long-term retention for Extended Journal Copies.**
- C. Extended Journal Copies always come from the target site to avoid impact on the production site.
- D. HPE Zerto supports a maximum of 30-day retention and cannot exceed this period.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

Zerto Extended Journal allows retention up to one year by integrating with secondary storage like HPE StoreOnce. Short-term journals (seconds to days) reside on primary replication storage, while long-term copies (weeks/months/years) are offloaded to StoreOnce for cost-efficient retention.

Distractors:

A: No separate license is required - it is a standard Zerto feature when integrated.

C: Extended Journals can be sourced from production or target, depending on setup; not "always" target.

D: Incorrect - Zerto supports >30 days retention with Extended Journal.

Key Concept: Zerto + HPE StoreOnce for long-term DR retention.

Reference: HPE Zerto with StoreOnce White Paper.

NEW QUESTION # 29

.....

Our website offer you the latest HPE7-J02 dumps torrent in pdf version and test engine version, which selected according to your study habit. You can print our HPE7-J02 practice questions out and share the materials with your classmates and friends. The test engine version is a way of exam simulation that helps you get used to the atmosphere of HPE7-J02 Real Exam and solve the problems with great confidence.
