The money you have invested on updating yourself is worthwhile. The knowledge you have learned is priceless. You can obtain many useful skills on our H12-725\_V4.0 study guide, which is of great significance in your daily work. Never feel sorry to invest yourself. Our H12-725\_V4.0 Exam Materials deserve your choice. If you still cannot make decisions, you can try our free demo of the H12-725\_V4.0 training quiz.

Huawei H12-725\_V4.0 : HCIP-Security V4.0 exam is a complex exam that requires extensive knowledge and skills in network security. It is designed for professionals who have experience in network security and desire a deeper understanding of this field. H12-725\_V4.0 Exam evaluates the candidates' ability to design, implement, and maintain secure networks.

## Test H12-725\_V4.0 Score Report, H12-725\_V4.0 Practice Braindumps

If you are a child's mother, with H12-725\_V4.0 test answers, you will have more time to stay with your if you are a student, with H12-725\_V4.0 exam torrent, you will have more time to travel to comprehend the wonders of the world. In the other worlds, with H12-725\_V4.0 guide tests, learning will no longer be a burden in your life. You can save much time and money to do other things what meaningful. You will no longer feel tired because of your studies, if you decide to choose and practice our H12-725\_V4.0 Test Answers. Your life will be even more exciting.

Huawei is a leading global provider of information and communications technology (ICT) infrastructure and smart devices. The company is committed to providing its customers with the latest and most innovative technology solutions, and its Huawei H12-725\_V4.0 (HCIP-Security V4.0) Certification Exam is no exception.

Huawei H12-725\_V4.0 certification is an intermediate-level certification that builds on the HCIA-Security certification. HCIP-Security V4.0 certification is suitable for IT professionals who want to advance their careers in network security, including network security engineers, network security administrators, and security analysts. HCIP-Security V4.0 certification also provides a pathway for IT professionals who want to pursue higher-level certifications, such as the HCIE-Security certification.

## Huawei HCIP-Security V4.0 Sample Questions (Q40-Q45):

### NEW QUESTION # 40

Which of the following methods are used by flood attacks to cause denial of services?(Select All that Apply)

- A. Exhaust available bandwidth.
- B. Exhaust server-side resources.
- C. Exhaust network device resources.
- D. Control network host rights.

**Answer: A,B,C**

Explanation:

Comprehensive and Detailed Explanation:

\* Flood attacks (DoS/DDoS) overwhelm network resources, preventing normal users from accessing services.

\* Correct answers:

\* A. Exhaust available bandwidth# Large amounts of traffic saturate the network.

\* B. Exhaust server-side resources# High CPU/memory usage causes server crashes.

\* D. Exhaust network device resources# Firewalls, routers, and switches become overloaded.

\* Why is C incorrect?

\* Controlling host rights is related to hacking, not flooding attacks.

HCIP-Security References:

\* Huawei HCIP-Security Guide # DoS/DDoS Attack Prevention

### NEW QUESTION # 41

In quota control policies, which of the following can be set for users?(Select All that Apply)

- A. Limiting the daily online duration
- B. Limiting the total monthly online traffic
- C. Limiting the total daily online traffic
- D. Limiting the total online duration per month

**Answer: A,B,C,D**

Explanation:

Comprehensive and Detailed Explanation:

\* Quota control policies regulate user access and resource usage based on bandwidth and time constraints.

\* All options are correct since Huawei firewalls support:

\* A# Restricting the daily online duration.

\* B# Restricting the total monthly online traffic.

\* C# Restricting the total daily online traffic.

\* D# Restricting the total online duration per month.

HCIP-Security References:

\* Huawei HCIP-Security Guide # User Quota Control Policies

### NEW QUESTION # 42

Which of the following protocols can be encapsulated through GRE over IPsec?(Select All that Apply)

- A. IPX
- B. VRRP
- C. IPv6
- D. OSPF

**Answer: A,B,C,D**

Explanation:

Comprehensive and Detailed Explanation:

\* IPsec does not support non-IP traffic (e.g., multicast, routing protocols, or legacy protocols like IPX).

\* GRE over IPsec allows encapsulation of:

\* A. IPX# Legacy protocol supported via GRE.

\* B. VRRP# Uses multicast, which GRE supports.

\* C. IPv6# GRE tunnels can carry IPv6 over IPv4.

\* D. OSPF# Uses multicast (224.0.0.5 & 224.0.0.6), requiring GRE.

\* Why are all options correct?

\* GRE over IPsec is required for non-unicast and legacy protocols.

HCIP-Security References:

\* Huawei HCIP-Security Guide # GRE over IPsec Deployment

#### NEW QUESTION # 43

Before configuring DDoS attack defense, you must configure different thresholds for defense against different types of attacks. Each threshold can be considered an upper limit for normal network traffic.

When the rate of traffic exceeds the pre-configured threshold, the firewall considers it to be attack traffic and takes a corresponding action to defend against it.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

\* DDoS defense mechanisms rely on threshold settings to distinguish between normal and attack traffic.

\* Thresholds define:

\* Maximum allowed traffic volume.

\* When exceeded, firewall triggers mitigation actions (blocking, rate-limiting, etc.).

\* Why is this statement true?

\* Threshold-based detection is a fundamental part of DDoS mitigation.

HCIP-Security References:

\* Huawei HCIP-Security Guide # DDoS Attack Prevention Thresholds

#### NEW QUESTION # 44

The difference between DoS attacks and DDoS attacks is that DoS attacks are usually directly initiated by attackers, whereas DDoS attacks are usually initiated by attackers controlling multiple zombies.

- A. FALSE
- B. TRUE

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation:

\* DoS (Denial-of-Service) # A single attacker sends excessive traffic to a target.

\* DDoS (Distributed Denial-of-Service) # Uses multiple compromised devices (zombies or botnets) to amplify the attack.

\* Why is this statement true?

\* DDoS attacks originate from multiple sources (botnets), unlike DoS attacks.

HCIP-Security References:

\* Huawei HCIP-Security Guide # DoS vs. DDoS Attacks

#### NEW QUESTION # 45
