You can also use the HCIP-Datcom-Advanced Routing & Switching Technology V1.0 PDF format using smartphones, tablets, and laptops. Since the PDF format of real dumps questions is portable, you can access it from any place in free time. The HCIP-Datcom-Advanced Routing & Switching Technology V1.0 web-based practice exam can be easily taken from every browser and operating system without installing additional software. The desktop HCIP-Datcom-Advanced Routing & Switching Technology V1.0 practice exam software comes with all specs of the Huawei H12-831_V1.0-ENU web-based version but it works offline only on Windows computer or laptop.

The Huawei H12-831_V1.0-ENU Exam consists of multiple-choice questions and is conducted online. The duration of the exam is 90 minutes, and candidates must achieve a minimum score of 600 out of 1000 to pass. H12-831_V1.0-ENU exam is available in both English and Chinese languages.

Huawei H12-831_V1.0-ENU certification exam is a valuable credential for network engineers who want to advance their careers in the field of data communication. HCIP-Datcom-Advanced Routing & Switching Technology V1.0 certification demonstrates that the candidate has a strong understanding of advanced routing and switching technologies, and is capable of designing and implementing complex network solutions.

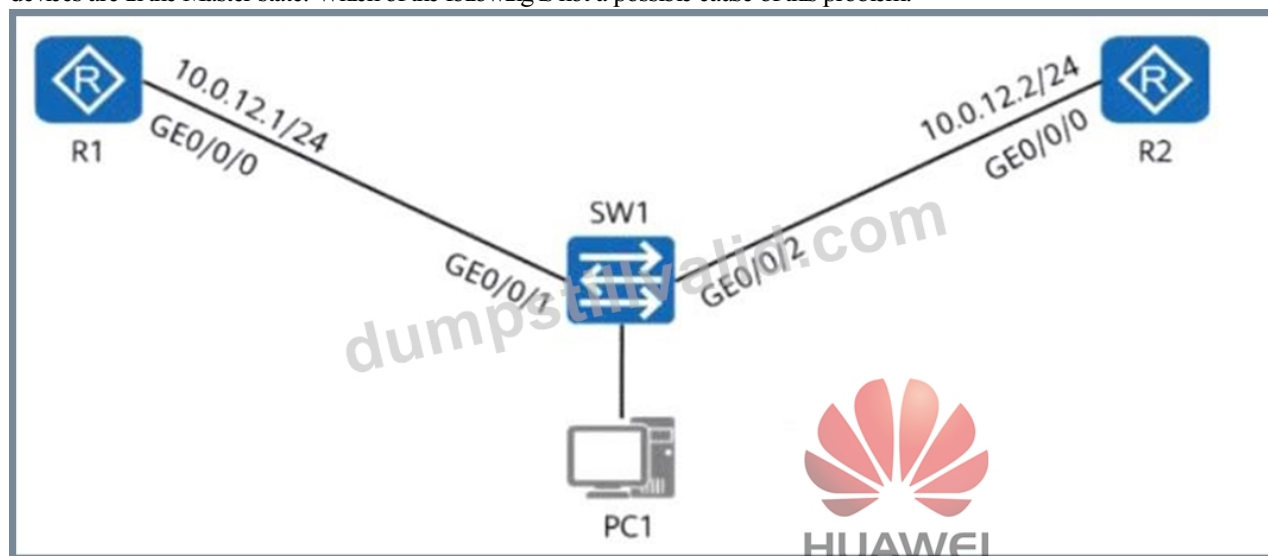

2025 Huawei H12-831_V1.0-ENU: HCIP-Datcom-Advanced Routing & Switching Technology V1.0 Updated Testing Center

If you want to improve yourself and make progress, if you are not satisfied with your present job, if you are still staying up for the H12-831_V1.0-ENU exam day and night, please use our H12-831_V1.0-ENU study materials. For with the high pass rate as 98% to 100%, we are confident to claim that our high quality and high efficiency of our H12-831_V1.0-ENU Exam Torrent is unparalleled in the market. We provide the latest and exact H12-831_V1.0-ENU exam quiz to our customers and you will be grateful if you choose our exam torrent and gain what you are expecting in the shortest time.

Huawei HCIP-Datcom-Advanced Routing & Switching Technology V1.0 Sample Questions (Q16-Q21):

NEW QUESTION # 16

On the network shown in the figure, VRRP is configured on R1 and R2, and the virtual IP address is 10.0.12.254. After the configuration is complete, the network engineer checks the VRRP status on R1 and R2, and finds that both devices are in the Master state. Which of the following is not a possible cause of this problem?

- A. The VRIDs configured on R1 and R2 are different.
- B. The virtual IP addresses configured on R1 and R2 are different.
- C. R1 and R2 have different priorities in the VRRP group.
- D. GE0/0/1 and GE0/0/2 of SW1 belong to different VLANs.

Answer: C

NEW QUESTION # 17

MPLS is called multi-protocol label switching. Which description is correct about the label in MPLS? (Multiple choice)

- A. MPLS system has a variety of label publishing protocols, such as LDP is a label publishing protocol
- B. The label is carried by the header of the MPLS message and has a global meaning, that is, the label value of all routers cannot be repeated
- C. A label is an identifier with a fixed length and only local meaning, which is used to uniquely identify the FEC to which a group belongs
- D. MPLS supports single-layer labels as well as multi-layer labels

Answer: A,C,D

NEW QUESTION # 18

Which of the following descriptions is correct about configuring static LSPs in MPLS networks?

- A. when a certain LSR for Egress LSR, you only need to configure In Label, The range is 16-1023
- B. when a certain LSR for Transit LSR, you need to configure In Label and Out Label, The range is 16-1023, Out Label The range is 16~1048575
- C. when a certain LSR for Transit LSR need to be configured at the same time In Label and Out Label, The range is 16-1023
- D. when a certain LSR for Ingress LSR, just configure Out Label, The range is 16~1048575

Answer: A,B,D

NEW QUESTION # 19

The figure shows the output information on a switch.

Which of the following can be determined from the information?

PortName	Type	Rate (Min/Max)	Mode	Action	Punish- Status	Trap	Log	Int	Last- Punish-Time
GE0/0/1	Broadcast	1000 /2000	Pps	Block	Normal	Off	On	90	-
GE0/0/1	Multicast	1000 /2000	Pps	Block	Normal	Off	On	90	-
GE0/0/1	Unicast	1000 /2000	Pps	Block	Normal	Off	On	90	-

- A. When the average rate of known unicast packets is 2500 pps, GE0/0/1 is shut down.
- B. When the average rate of unknown multicast packets is 1500 pps, GE0/0/1 blocks the multicast packets.
- C. After broadcast packets are blocked on GE0/0/1, broadcast packets are forwarded only when their average rate is lower than 1000 pps.
- D. The administrator configures traffic suppression on GE0/0/1 of the switch.

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Understanding the Table and Traffic Suppression Configuration

Port Name

Type

Rate (Min/Max)

Mode

Action

Punish-Status

Trap

Log

Int

Last-Punish-Time

GE0/0/1

Broadcast

1000 / 2000

Pps

Block

Normal

Off

On

90

-

GE0/0/1

Multicast

1000 / 2000

Pps
Block
Normal
Off
On
90
-
GE0/0/1
Unicast
1000 / 2000
Pps
Block
Normal
Off
On
90
-

Key Observations from the Table:

- * Traffic suppression (or rate limiting) is configured on interface GE0/0/1 for broadcast, multicast, and unicast traffic.
- * Thresholds:
 - * Min rate: 1000 pps (packets per second)
 - * Max rate: 2000 pps
 - * If the traffic exceeds the configured threshold (2000 pps), the action is to "Block".
- * The interface is still "Normal" (not shut down), meaning exceeding 2000 pps does not disable the port.
- * Logging is enabled (Log: On), but trapping (Trap: Off) is disabled.

Analysis of Each Answer Choice

A: "When the average rate of unknown multicast packets is 1500 pps, GE0/0/1 blocks the multicast packets." # (False)

- * The blocking threshold for multicast is 2000 pps (Max rate).

* If the rate is 1500 pps, it is still below the threshold, so traffic is not blocked yet.

Statement A is incorrect.

B: "When the average rate of known unicast packets is 2500 pps, GE0/0/1 is shut down." # (False)

- * The table does not indicate that exceeding the max threshold (2000 pps) shuts down the interface.

* Instead, it simply blocks packets exceeding the rate limit.

* The interface remains "Normal", meaning it is not shut down.

Statement B is incorrect.

C: "After broadcast packets are blocked on GE0/0/1, broadcast packets are forwarded only when their average rate is lower than 1000 pps." # (False)

- * The minimum rate is 1000 pps, but there is no indication that traffic resumes forwarding only when it drops below this rate.

* The configuration only states blocking when exceeding 2000 pps, but does not enforce a strict reactivation at 1000 pps.

Statement C is incorrect.

D: "The administrator configures traffic suppression on GE0/0/1 of the switch." # (True - Correct Answer)

- * The table explicitly shows that a traffic suppression policy is applied to broadcast, multicast, and unicast packets on GE0/0/1.

* This confirms that the administrator has configured traffic suppression (rate limiting) on this interface.

Statement D is correct.

Final Conclusion:

Correct answer: D. The administrator configures traffic suppression on GE0/0/1 of the switch.

NEW QUESTION # 20

IS-IS supports multi-instance and multi-process, that is, on an IS-IS router. You can configure multiple VPN instances to be associated with multiple IS-IS processes.

Which of the following descriptions about IS-IS multi-instance and multi-process are correct? (Multiple choice)

- A. One IS-IS process can only be associated with one VPN instance
- B. One IS-IS process can be associated with multiple different VPN instances
- C. If an IS-IS router creates multiple IS-IS processes, each process does not affect each other and is independent of each other
- D. A VPN instance can be associated with multiple different IS-IS processes

Answer: A,C,D

NEW QUESTION # 21

.....

Nowadays, the certification has been one of the criteria for many companies to recruit employees. And in order to obtain the H12-831_V1.0-ENU certification, taking the H12-831_V1.0-ENU exam becomes essential. Although everyone hopes to pass the exam, the difficulties in preparing for it should not be overlooked. There are plenty of people who took a lot of energy and time but finally failed to pass. You really need our H12-831_V1.0-ENU practice materials which can work as the pass guarantee.
