Quiz SolarWinds - Latest Hybrid-Cloud-Observability-Network-Monitoring - New Hybrid Cloud Observability Network Monitoring Exam Exam Online

What adds to the dominance of the 2Pass4sure market is its promise to give its customers the latest Hybrid-Cloud-Observability-Network-Monitoring practice exams. The hardworking and strenuous support team is always looking to refine the Hybrid-Cloud-Observability-Network-Monitoring prep material and bring it to the level of excellence. It materializes this goal by taking responses from above 90,000 competitive professionals.

SolarWinds Hybrid Cloud Observability Network Monitoring Exam Sample

Questions (Q89-Q94):

NEW QUESTION # 89

Which two of the following troubleshooting steps can be performed when a node is "up" and the data cannot be found in SolarWinds' platform web console? (Choose two.)

- A. Wait ten minutes after a device is added to the console. Refresh the screen.
- B. Add a remote site node and make sure the firewall rules are configured to allow SNMP traffic.
- C. Ping the device from the polling engine the device is assigned to using the command line.
- D. Verify hardware health sensors on the device provide both status and values.

Answer: A,C

NEW QUESTION # 90

The unclassified traffic in the web console has been identified as MSSQL traffic. It is known as an application mapping that hybrid cloud observability maps by default. Which two of the following reasons explain why the traffic is showing as unclassified? (Choose two.)

- A. A different port is being used.
- B. The source or the destination port field is not present.
- C. The version of MSSQL being used is not supported.
- D. A firewall is blocking the traffic.

Answer: A,B

NEW QUESTION # 91

Which custom poller supports interface traffic, UPS battery status, and CPU temperature?

- A. visualization integration
- B. universal device poller
- C. hardware health
- D. device studio

Answer: B

NEW QUESTION # 92

In device studio, the test node being built for a new custom poller is returning four usage values for the CPU (one for each CPU core). If the goal is to have one value for the entire CPU, how can that be accomplished?

- A. device studio would not be the correct tool to use in this situation
- B. create a new calculated value to average the four individual values
- C. values can be combined after the poller is created in poller settings
- D. there is not an object ID (OJD) for CPU usage, nothing can be done

Answer: B

NEW QUESTION # 93

Which SNMP version allows usernames and passwords?

- A. version 3
- B. version 2c
- C. version 1
- D. version 4

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

SNMP version 3 introduces enhanced security features, including the use of usernames and passwords (authentication and encryption). SNMP v1 and v2c only use community strings, which are essentially passwords but without username support or encryption. SNMP v4 does not exist.

Reference:

"SNMPv3 supports authentication with usernames and passwords and offers encrypted communication, unlike SNMPv1 and SNMPv2c, which use only community strings."

- (Network Performance Monitor Administrator Guide, SNMP version overview)

NEW QUESTION # 94

.....

Our desktop Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) practice exam software allows you to see your progress report at the end of each attempt. In this way, you find your mistakes and overcome them before the final take. Our desktop software is customizable so you can change the duration and SolarWinds questions of Hybrid-Cloud-Observability-Network-Monitoring Practice Tests according to your learning requirements. Since this software requires installation on Windows computers, you can take the Hybrid Cloud Observability Network Monitoring Exam (Hybrid-Cloud-Observability-Network-Monitoring) practice exam offline.
