### **NEW QUESTION # 56**

The objectives that the organization wants to achieve from its asset management activities, are ....

- A. the future capability and performance requirements of assets, asset systems and the asset portfolio as a whole
- B. A & B False
- C. to describe an organisation's long-term approach to managing its assets
- **D. A & B True**

**Answer: D**

Explanation:

Asset management objectives capture both strategic intent and performance expectations. They serve as the basis for determining investment priorities, risk controls, and lifecycle decisions.

\* A refers to the long-term vision of asset management.

\* B specifies measurable technical and functional requirements. Both are correct and together form the foundation of asset-centric organizational planning.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 4.3.1 - Asset Management Objectives:

"Asset management objectives describe what the organization aims to achieve from managing its assets, including both long-term direction and specific capability and performance outcomes."

### **NEW QUESTION # 57**

The asset management strategy will:

- A. Consider how to discourage future demand growth
- **B. Consider how and why current and future customer requirements are assessed**
- C. Consider how to encourage customer demand
- D. Focus on historical customer requirements for forecasting
- E. Consider what customers want and how to limit change

**Answer: B**

Explanation:

A sound strategy evaluates future customer needs to ensure asset capability and investment planning is aligned. Backward-looking or restrictive approaches do not align with proactive asset management.

Exact Extract from IAM - Asset Management: An Anatomy (v4), Section 4.3 - Demand Analysis:

"Asset strategies must reflect an understanding of both current and future customer requirements, including external drivers of demand."
