Die IAPP CIPP-E Zertifizierungsprüfung ist eine sehr populäre Prüfung. Obwohl es sehr schwierig zu bestehen ist, können Sie diese Prüfung leichter bestehen, wenn Sie die richtige Methode finden. Und Wir ZertPruefung sind Ihre beste Wahl. Mit der 100%-Hitrate Prüfungsunterlagen von ZertPruefung können Sie alle Probleme in der IAPP CIPP-E Zertifizierungsprüfung auslösen. Wenn Sie die Prüfungsfragen und Testantworten ernst lernen, gibt es keine Probleme für Sie. Und nach dem Kauf können Sie einjährigen kostenlosen Aktualisierungsservice bekommen. (innerhalb einem Jahr) Sie können über die gewünschten IAPP CIPP-E Schulungsunterlagen beherrschen, wenn Sie auf jeden Fall die neueste Version bekommen. Probieren Sie sofort, bitte.

Die CIPP/E -Prüfung ist ein strenger Test des Wissens und des Verständnisses der europäischen Datenschutzgesetze und -vorschriften. Es wurde entwickelt, um die Fähigkeit des Kandidaten zu testen, die Prinzipien und Konzepte des Datenschutzes auf reale Szenarien anzuwenden. Die Prüfung besteht aus 90 Multiple-Choice-Fragen, die eine breite Palette von Themen abdecken, einschließlich Datenschutzprinzipien, Beteiligungsrechtsrechten, Datenverletzungen und grenzüberschreitenden Datenübertragungen.

Die CIPP/E -Zertifizierungsprüfung wird von der International Association of Privacy Professionals (IAPP), der weltweit größten Vereinigung von Datenschutzfachleuten, angeboten. Die IAPP verpflichtet sich, den Datenschutzberuf zu fördern, indem sie Bildung, Netzwerkmöglichkeiten und Zertifizierungsprogramme bereitstellen. Die CIPP/E -Zertifizierung ist eine von vier Zertifizierungen der IAPP, wobei die anderen CIPP/US, CIPM und CIPT sind.

CIPP-E Pass Dumps & PassGuide CIPP-E Prüfung & CIPP-E Guide

Die Schulungsunterlagen zur CIPP-E Zertifizierungsprüfung von ZertPruefung sind in der Form von PDF und Software angeboten. Sie umfassen die Fragen und Antworten zur CIPP-E Zertifizierungsprüfung. Sie können vielleicht auch den realen Prüfungsaufgaben hier begegnen. Alle diesen Fragen sind perfekt und wirksam. Sie können alle IAPP CIPP-E Zertifizierungsprüfungen bestehen. Die IAPP CIPP-E Zertifizierungsprüfungen von ZertPruefung umfassen alle Planprogramme und sowie komplizierte Fragen. Die Fragen und Antworten zur IAPP CIPP-E Zertifizierungsprüfung von ZertPruefung sind die realen Herausforderungen. Sie müssen Ihre Fähigkeiten und Denkweisen entfalten.

IAPP Certified Information Privacy Professional/Europe (CIPP/E) CIPP-E Prüfungsfragen mit Lösungen (Q77-Q82):

77. Frage

SCENARIO

Please use the following to answer the next question:

Jane Stan's her new role as a Data Protection Officer (DPO) at a Malta-based company that allows anyone to buy and sell cryptocurrencies via its online platform. The company stores and processes the personal data of its customers in a dedicated data center located in Malta (EU).

People wishing to trade cryptocurrencies are required to open an online account on the platform. They then must successfully pass a

KYC due diligence procedure aimed at preventing money laundering and ensuring compliance with applicable financial regulations. The non-European customers are also required to waive all their GDPR rights by reading a disclaimer written in bold and belong a checkbox on a separate page in order to get their account approved on the platform. The customers must likewise accept the terms of service of the platform. The terms of service also include a privacy policy section, saying, among other things, that if a Are the cybersecurity assessors required to sign a data processing agreement with the company in order to comply with the GDPR"

- A. Yes, the assessors are data processors and their processing of personal data must be governed by a separate contract or other legal act.
- B. Yes, the assessors are considered to be joint data controllers and must sign a mutual data processing agreement.
- C. No, the assessors do not qualify as data processors as they only have access to encrypted data.
- D. No, the assessors do not qualify as data processors as they do not copy the data to their facilities.

Antwort: A

78. Frage

Based on GDPR Article 35, which of the following situations would trigger the need to complete a DPIA?

- A. A company wants to build a dating app that creates candidate profiles based on location data and data from third-party sources.
- B. A company wants to use location data to infer information on a person's clothes purchasing habits.
- C. A company wants to use location data to track delivery trucks in order to make the routes more efficient.
- D. A company wants to combine location data with other data in order to offer more personalized service for the customer.

Antwort: A

79. Frage

What are the obligations of a processor that engages a sub-processor?

- A. The processor must obtain the controller's specific written authorization and provide annual reports on the sub-processor's performance.
- B. The processor must receive a written agreement that the sub-processor will be fully liable to the controller for the performance of its obligations in relation to the personal data concerned.
- C. The processor must obtain the consent of the controller and ensure the sub-processor complies with data processing obligations that are equivalent to those that apply to the processor.
- D. The processor must give the controller prior written notice and perform a preliminary audit of the sub-processor.

Antwort: B

80. Frage

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's Questions: on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and

speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well. The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a question, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure. The answer is given through the figure's integrated speakers, making it appear as though that the toy is actually responding to the child's question. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

Why is this company obligated to comply with the GDPR?

- A. The company's data center is located in a country outside the EU.
- B. The company employs staff in the EU.
- C. The company's products are marketed directly to EU customers.
- D. The company has offices in the EU.

Antwort: C

A. The company has offices in the EU. B. The company employs staff in the EU. C. The company's data center is located in a country outside the EU. D. The company's products are marketed directly to EU customers.

Verified Answer: D. The company's products are marketed directly to EU customers.

[illegible]

81. Frage

When hiring a data processor, which action would a data controller NOT be able to depend upon to avoid liability in the event of a security breach?

- A. Requiring that the processor directly notify the appropriate supervisory authority.
- B. Maintaining evidence that the processor was the best possible market choice available.
- C. Documenting due diligence steps taken in the pre-contractual stage.
- D. Conducting a risk assessment to analyze possible outsourcing threats.

Antwort: A

Begründung:

The GDPR imposes several obligations on data controllers when they engage data processors to process personal data on their behalf. One of these obligations is to ensure that the contract or other legal act between the controller and the processor stipulates that the processor must assist the controller in complying with its obligations under the GDPR, including the obligation to notify personal data breaches to the competent supervisory authority and, where applicable, to the affected data subjects¹. However, this does not mean that the processor can directly notify the supervisory authority without the involvement of the controller. The GDPR clearly states that it is the controller's responsibility to notify the supervisory authority without undue delay and, where feasible, not later than 72 hours after having become aware of the breach². The processor must only notify the controller without undue delay after becoming aware of the breach³. Therefore, requiring that the processor directly notify the appropriate supervisory authority is not an action that a data controller can depend upon to avoid liability in the event of a security breach, as it would be contrary to the GDPR and the controller's own obligation. Options A, B and D are actions that a data controller can take to reduce the risk of liability, as they demonstrate that the controller has exercised due diligence, assessed the potential impact of outsourcing, and chosen a reliable and compliant processor. Reference: 1: Article 28(3)(f) of the GDPR 2: Article 33(1) of the GDPR 3: Article 33(2) of the GDPR
