OACETT Internationally Educated Professional Practice Exam Sample

Questions (Q88-Q93):

NEW QUESTION # 88

Which OACETT division is responsible for managing the OACETT chapters?

- A. Registration and Professional Practice Committee (RPPC)
- **B. Member Engagement Services Committee (MESC)**
- C. Administration
- D. Government Relations

Answer: B

Explanation:

1. What are OACETT Chapters?

* OACETT has regional chapters across Ontario, which allow members to network, engage in professional development, and participate in local events.

* These chapters are managed by a specific division within OACETT to ensure members receive ongoing support and professional development opportunities.

2. Role of the Member Engagement Services Committee (MESC):

* Coordinates and manages OACETT chapters to ensure local engagement.

* Organizes member networking events, training, and professional development programs.

* Supports outreach programs to encourage certification and continuing education.

3. Why Option D is Correct:

* The MESC is the division responsible for chapter management and member engagement.

4. Why Other Options Are Incorrect:

* A (Government Relations)- Handles policy, advocacy, and external relations, not chapter management.

* B (RPPC)- Oversees certification and professional practice, not engagement services.

* C (Administration)- Focuses on internal operations, not member services.

NEW QUESTION # 89

It can take a lot of time to construct a new building, and often legislation, codes, or standards will change during that time. With which codes must the end design be compliant?

- A. The end design must meet the requirements that are in place at the end of the process.
- **B. The end design must meet the requirements that were in place when permits were issued.**
- C. The end design must meet requirements that were in place when the contract was signed.
- D. The end design must meet requirements that were in place when they broke ground.

Answer: B

Explanation:

1. Why Construction Must Follow the Codes in Place When Permits Are Issued

* Building codes and regulations exist to ensure the safety, structural integrity, and efficiency of construction projects.

* Once a building permit is granted, the project is legally required to comply with the codes in effect at the time the permit was issued.

2. Understanding Code Compliance in Construction Projects:

* Step 1: Building Permit Issued# The project must comply with the Ontario Building Code (OBC) and other relevant standards at this time.

* Step 2: Construction Begins# If codes change after the permit is issued, the original code still applies.

* Step 3: Project Completion# The building is inspected based on the original permit conditions.

3. Why Option B is Correct:

* The end design must comply with the code in effect when the permits were granted, ensuring that projects are not unfairly affected by regulatory changes.

4. Why Other Options Are Incorrect:

* A (Meet requirements in place at project completion)- Incorrect; regulations at completion do not apply if a permit was issued earlier.

* C (Meet requirements when ground is broken)- Building codes apply at the time of permit approval, not construction start.

* D (Meet requirements when the contract was signed)- A contract does not determine legal building requirements.

NEW QUESTION # 90

Which Ontario ministry is responsible for overseeing the Ontario Building Code?

- A. The Ministry of Energy.
- **B. The Ministry of Municipal Affairs and Housing.**
- C. The Ministry of the Environment, Conservation, and Parks.
- D. The Ministry of Economic Development, Job Creation and Trade.

Answer: B

Explanation:

1. What is the Ontario Building Code (OBC)?

* The Ontario Building Code (OBC) is a set of regulations that governs construction, renovation, and safety standards in buildings across Ontario.

* It ensures that buildings are safe, accessible, and environmentally sustainable.

2. Which Ministry Oversees the OBC?

* The Ministry of Municipal Affairs and Housing (MMAH) is responsible for developing, updating, and enforcing the Ontario Building Code.

* The MMAH works with municipal governments to ensure local compliance with building safety standards.

3. Why Option C is Correct:

* The Ministry of Municipal Affairs and Housing oversees building regulations, permitting, and compliance inspections.

4. Why Other Options Are Incorrect:

* A (Ministry of Energy)- Deals with energy policies, not construction regulations.

* B (Ministry of Economic Development, Job Creation and Trade)- Focuses on business growth and economic policies, not building codes.

* D (Ministry of the Environment, Conservation, and Parks)- Responsible for environmental protection, not construction laws.

NEW QUESTION # 91

What are the two main categories of membership?

- A. Associate and Student.
- B. C.Tech. and Graduate Technologist.
- C. C.E.T. and Graduate Technician.
- **D. Certified and Associate.**

Answer: D

Explanation:

1. OACETT Membership Categories

OACETT has two primary membership categories:

* Certified Members:

* Includes Certified Engineering Technologists (CETs) and Certified Technicians (C.Techs).

* These members have met all certification requirements and are recognized professionals in their field.

* Associate Members:

* Includes individuals working toward certification (e.g., students, recent graduates, and professionals gaining work experience).

* They do not yet have full certification but are on the path to achieving it.

2. Why Option A is Correct:

* These two categories define whether a member is certified or working towards certification.

3. Why Other Options Are Incorrect:

* B (CET & Graduate Technician)- Graduate Technician is not an official category.

* C (C.Tech & Graduate Technologist)- Graduate Technologist is not a separate category.

* D (Associate & Student)- Students fall under the Associate category, but they are not a main membership type.

NEW QUESTION # 92

What is a basic strategy that can be used to help eliminate or mitigate health and safety hazards in the workplace?

- A. Ensuring that all employees have access to a family doctor.
- B. Train employees to complete a daily workplace health and safety checklist.
- **C. Train employees to inspect and maintain all of the equipment that they use.**
- D. Train employees to monitor their own health on a daily basis.

Answer: C

Explanation:

1. Why Workplace Safety is Critical

* Workplace accidents can lead to injuries, lawsuits, and financial losses.

* Employers are legally required under Ontario's Occupational Health and Safety Act (OHSA) to ensure a safe work environment.

2. Effective Strategies to Reduce Workplace Hazards

* Training employees to inspect and maintain equipment reduces the risk of malfunctions and accidents.

* Ensuring proper safety procedures are followed prevents injuries.

* Using safety checklists and regular maintenance schedules helps keep workplaces compliant with OHSA standards.

3. Why Option D is Correct:

* Regular inspection and maintenance of equipment is one of the best ways to prevent workplace hazards.

4. Why Other Options Are Incorrect:

* A (Access to a family doctor)- Important for overall health, but does not directly eliminate workplace hazards.

* B (Self-monitoring health)- Employees should report health issues, but this does not eliminate external safety hazards.

* C (Checklists alone are not enough)- Checklists help, but physical maintenance and inspections are more effective.
