Free PDF 2025 IIA IIA-CIA-Part3: Authoritative Business Knowledge for Internal Auditing Latest Dumps Ppt

It is browser-based; therefore no need to install it, and you can start practicing for the Business Knowledge for Internal Auditing (IIA-CIA-Part3) exam by creating the IIA IIA-CIA-Part3 practice test. You don't need to install any separate software or plugin to use it on your system to practice for your actual Business Knowledge for Internal Auditing (IIA-CIA-Part3) exam. ValidTorrent Business Knowledge for Internal Auditing (IIA-CIA-Part3) web-based practice software is supported by all well-known browsers like Chrome, Firefox, Opera, Internet Explorer, etc.

IIA Business Knowledge for Internal Auditing Sample Questions (Q447-Q452):

NEW QUESTION # 447

The difference between the required rate of return on a given risky investment and that of a risk-free investment with the same expected return is the:

- A. Risk premium.
- B. Coefficient of variation.
- C. Standard error of measurement.
- D. Beta coefficient

Answer: A

Explanation:

The market risk premium $R_M - R_F$) is the amount above the risk-free rate required to include average investors to enter the market. The risk premium is the portion of expected return attributed to the increased risk.

NEW QUESTION # 448

Organizations use matrix management to accomplish which of the following?

- A. To increase lateral communication.
- B. To strengthen corporate headquarters.
- C. To improve the chain of command.
- D. To focus better on a single market.

Answer: A

NEW QUESTION # 449

Which of the following principles is shared by both hierarchies and open organizational structures?

1. A superior can delegate the authority to make decisions but cannot delegate the ultimate responsibility for the results of those decisions.
2. A supervisor's span of control should not exceed seven subordinates.
3. Responsibility should be accompanied by adequate authority.
4. Employees at all levels should be empowered to make decisions.

- A. 1 and 4 only
- B. 2 and 3 only
- C. 1 and 3 only
- D. 3 and 4 only

Answer: C

NEW QUESTION # 450

Which of the following refers to taxes that do not necessarily take a larger absolute share of an increase in income?

- A. Proportional
- B. Progressive.
- C. Regressive.
- D. Flat.

Answer: C

Explanation:

Regressive taxes are those for which the average tax rate falls as income rises. They take a smaller percentage of income as income rises, so they will not necessarily take a larger absolute amount of income as income rises.

NEW QUESTION # 451

Which approach should a chief audit executive take when preparing the internal audit plan?

- A. Eliminate auditable units not mandated to be audited by laws and regulations applicable to the organization
- B. Select auditable units within the organization based on monetary values
- C. Evaluate auditable units based on senior management's information about risks
- **D. Organize the auditable units within the organization into an audit universe to facilitate risk assessment**

Answer: D

Explanation:

The internal audit plan should be risk-based. To achieve this, the CAE should develop an audit universe that lists all auditable units (processes, functions, systems, etc.) and use it as the foundation for risk assessment and prioritization.

Option B is too narrow (monetary value is just one factor). Option C is incomplete since senior management's input is important but not the sole basis. Option D is incorrect because eliminating units not mandated by law ignores risk-based planning requirements. Thus, the most appropriate approach is Option A: establishing an audit universe.
