2025 100% Free 350-601 –Excellent 100% Free Valid Test Notes | Test Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Collection

Now we live in a highly competitive world. If you want to find a decent job and earn a high salary you must own excellent competences and rich knowledge. Under this circumstance, owning a 350-601 guide torrent is very important because it means you master good competences in certain areas and can handle the job well. The 350-601 exam prep we provide can help you realize your dream to pass exam and then own a 350-601 exam torrent. PassSureExam provide high pass rate materials that are compiled by experts with profound experiences according to the latest development in the theory and the practice so they are of great value. Please firstly try out our 350-601 Exam Materials demo before you decide to buy our product. It is worthy for you to buy our 350-601 exam preparation not only because it can help you pass the exam successfully but also because it saves your time and energy.

Cisco 350-601 exam is designed for IT professionals who are responsible for designing, deploying, and managing data center infrastructures. Implementing Cisco Data Center Core Technologies (350-601 DCCOR) certification exam is suitable for network architects, systems engineers, network designers, and data center administrators. 350-601 Exam is a combination of multiple-choice and performance-based questions, which tests the candidate's understanding of real-world scenarios.

Cisco Implementing Cisco Data Center Core Technologies (350-601 DCCOR) Sample Questions (Q239-Q244):

NEW QUESTION # 239

Which Cisco HyperFlex component is used to add a converged node to an existing Cisco HyperFlex standard cluster?

- A. Cisco HyperFlex CVM

- B. Cisco DCNM
- C. Cisco Nexus Dashboard
- D. Cisco HyperFlex Installer

Answer: D

Explanation:

To add a converged node to an existing Cisco HyperFlex standard cluster, the Cisco HyperFlex Installer is used. The Cisco HyperFlex Installer automates the deployment and expansion of HyperFlex clusters, including adding new converged nodes. It simplifies the provisioning of compute, storage, and networking resources in the HyperFlex environment. The installer ensures the new node is properly integrated into the cluster with the correct configuration and policies.

NEW QUESTION # 240

Refer to the exhibit.

```
show install all impact epld bootflash:n9000-epld.6.1.2.I3.1.img
```

What is the outcome of this command when the EPLD is updated on a Cisco Nexus 9000 series switch?

- A. upgrades the EPLD on the switch disruptively
- B. shows a simulated upgrade of the EPLD
- C. displays the impact of the upgrade on the operation of the switch
- D. displays the compatibility of the EPLD upgrade and the image in the bootflash

Answer: D

NEW QUESTION # 241

A DevOps engineer must design a solution for a Cisco Unified Fabric solution to provision, monitor, and troubleshoot the network infrastructure for a data center based on Cisco Nexus Series Switches. The solution must provide visibility and control of the unified data center. Which solution meets these requirements?

- A. Nexus Dashboard Fabric Controller
- B. Cisco AppDynamics
- C. Cisco CloudCenter Suite
- D. Cisco DNA Center

Answer: A

Explanation:

Nexus Dashboard Fabric Controller (formerly Cisco DCNM) is designed specifically for managing Cisco Nexus switches in a data center environment. It provides comprehensive tools to provision, monitor, and troubleshoot the network infrastructure, along with visibility and control of the entire unified fabric. It is particularly well-suited for managing Cisco Nexus environments in data centers.

NEW QUESTION # 242

An engineer must deploy Cisco ACI in two data centers with a multisite configuration. The deployment must support a central management console for multiple data centers host multiple applications and support hardware and virtual clouds. Which product must be used?

- A. Nexus Dashboard
- B. Nexus Dashboard Fabric Controller
- C. Nexus Dashboard Insights
- D. Nexus Dashboard Orchestrator

Answer: D

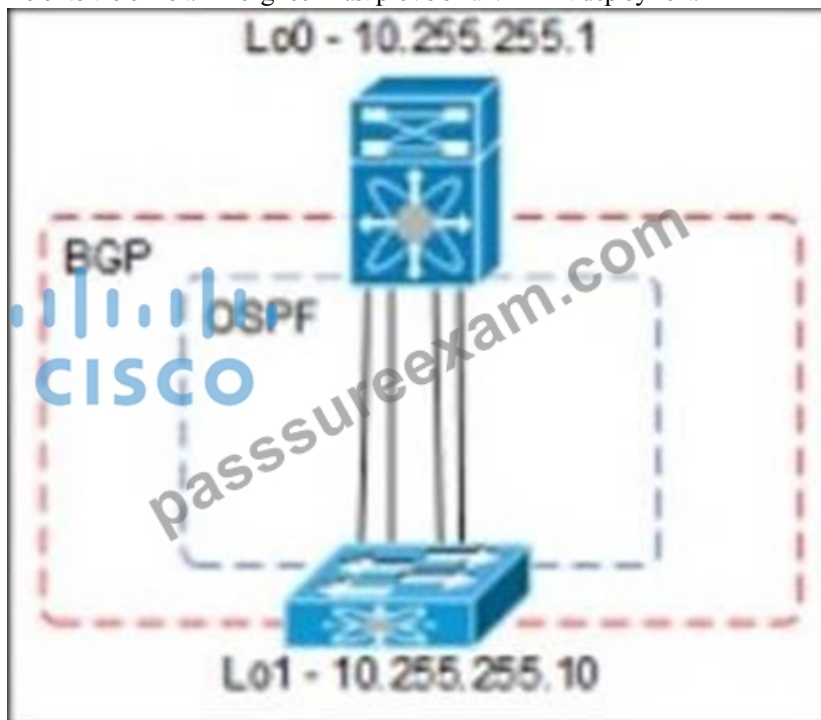

Explanation:

<https://www.cisco.com/c/en/us/products/collateral/cloud-systems-management/multi-site-orchestrator/nb-06-mso-so-cte-en.html>

NEW QUESTION # 243

Drag and Drop Question

Refer to the exhibit. An engineer must provision a VXLAN deployment.

The OSPF has already been configured as the underlay protocol. All BGP configurations will be performed using the template method. The deployment must meet these requirements:

- The local update source for leaf switches must be loopback 1
- The router ID must be the local loopback IP address
- The external BGP connections must use a template name

Drag and drop the configuration snippets from the bottom to complete the configuration.

```
router bgp 65000
  router-id 
  template peer SPINE
  bfd
  remote-as 
  update-source loopback1
  timers 3 9
  address-family  
    send-community extended
  neighbor 
     peer SPINE
```

10.255.255.1	inherit	65000
10.255.255.10	12vpn	evpn

Answer:

```
router bgp 65000
  router-id 10.255.255.10
  template peer SPINE
  bfd
  remote-as 65000
  update-source loopback1
  timers 3 9
  address-family 12vpn evpn
    send-community extended
  neighbor 10.255.255.1
    inherit peer SPINE
```
