

Infoblox NIOS-DDI-Expert Practice Test - A Surefire Way To Achieve Success

BTW, DOWNLOAD part of Prep4sures NIOS-DDI-Expert dumps from Cloud Storage: <https://drive.google.com/open?id=1FuBYB50krwJP6s9MpkHrEbKv5MAgpZde>

About Infoblox NIOS-DDI-Expert Exam, each candidate is very confused. Everyone has their own different ideas. But the same idea is that this is a very difficult exam. We are all aware of Infoblox NIOS-DDI-Expert exam is a difficult exam. But as long as we believe Prep4sures, this will not be a problem. Prep4sures's Infoblox NIOS-DDI-Expert exam training materials is an essential product for each candidate. It is tailor-made for the candidates who will participate in the exam. You will absolutely pass the exam. If you do not believe, then take a look into the website of Prep4sures. You will be surprised, because its daily purchase rate is the highest. Do not miss it, and add to your shoppingcart quickly.

If you follow the steps of our NIOS-DDI-Expert exam questions, you can easily and happily learn and ultimately succeed in the ocean of learning. And our NIOS-DDI-Expert exam questions can help you pass the NIOS-DDI-Expert exam for sure. Choosing our NIOS-DDI-Expert exam questions actually means that you will have more opportunities to be promoted in the near future. We are confident that in the future, our NIOS-DDI-Expert Study Tool will be more attractive and the pass rate will be further enhanced. For now, the high pass rate of our NIOS-DDI-Expert exam questions is more than 98%.

NIOS-DDI-Expert New Test Camp, NIOS-DDI-Expert Exam Experience

If you want to pass your exam and get the certification in a short time, choosing the suitable NIOS-DDI-Expert exam questions are very important for you. You must pay more attention to the Infoblox NIOS-DDI-Expert Study Materials. In order to provide all customers with the suitable study materials, a lot of experts from our company designed the NIOS-DDI-Expert training materials.

Infoblox Qualified NIOS DDI Expert - INE Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which action can an administrator safely perform during an upgrade?

- A. Modify Member DHCP properties
- B. None of the above
- C. Update DNS views

- **D. Setting time zone for a Grid Member**

Answer: D

NEW QUESTION # 53

What is the correct order of a NIOS upgrade?

- A. Upload > Distribute > Upgrade > Test
- B. Distribute > Upload > Test > Upgrade
- C. Upload > Distribute > Test > Upgrade
- **D. Test Upload > Distribute > Upgrade**

Answer: D

Explanation:

Comprehensive and Detailed In-Depth Explanation:A NIOS software upgrade follows a structured process in Grid Manager (Grid > Upgrade):

* Correct Order:

* Test Upload:Upload the .upgrade file (e.g., NIOS 8.6.2) and test it for integrity/compatibility (checks file checksum, version support).

* Distribute:Push the file to all Grid members, ensuring each has the update locally.

* Upgrade:Execute the upgrade, rebooting members per the schedule (e.g., passive nodes first).

* Why A:"Test Upload" combines the upload and initial validation steps, followed by distribution and execution. NIOS documentation uses this sequence for clarity.

* Options:

* B:Splits Test and Upload, but Test occurs with Upload in practice. Incorrect flow.

* C:Distribute before Upload is impossible-members need the file first. Incorrect.

* D:Test after Upgrade defeats the purpose of pre-validation. Incorrect.

* Practical Example:In an INE lab, you'd upload/test NIOS 8.6.2, distribute to an HA pair, upgrade the passive node, and troubleshoot sync issues, mastering Grid deployment.References:Infoblox NIOS Administrator Guide - Upgrade Process; INE Course Content: NIOS DDI Grid Deployment.

NEW QUESTION # 54

Which of the following transport protocols are supported by scheduled NIOS Grid Backup? (Select all that apply.)

- **A. SFTP**
- **B. HTTPS**
- **C. FTP**
- **D. SCP**

Answer: A,B,C,D

Explanation:

Comprehensive and Detailed In-Depth Explanation:NIOS Grid Backup allows scheduled exports of the configuration database (DNS, DHCP, Grid settings) to an external server. Supported protocols ensure flexibility and security:

* A (SFTP):Secure File Transfer Protocol (SSH-based) is supported for encrypted backups to remote servers (port 22). Widely used for secure transfers. Correct.

* B (SCP):Secure Copy Protocol (also SSH-based) is supported, offering a simple, secure file transfer option (port 22). Correct.

* C (FTP):File Transfer Protocol (unencrypted, port 21) is supported for legacy systems, though less secure. Correct.

* D (HTTPS):Web-based secure transfer (port 443) is supported, allowing backups to HTTP servers with SSL/TLS encryption. Correct.

* Setup:In Grid Manager (Grid > Grid Manager > Backup), you configure the protocol, server IP, and credentials.

* Practical Example:In an INE lab, you'd schedule a backup using SFTP to a remote server, test restoration, and troubleshoot connectivity issues, reinforcing Grid deployment skills.

* Note:All four are explicitly supported per NIOS documentation, making this a comprehensive list.

NEW QUESTION # 55

What protocol and port does DHCP Failover use to keep lease information synchronized between two peers?

- A. Default is TCP 1194, can be user configured
- B. Default is UDP 647, can be user configured
- **C. Default is TCP 647, can be user configured**
- D. Default is UDP 1194, can be user configured

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation: Infoblox NIOS implements DHCP Failover based on the IETF DHCP Failover protocol (draft standard), using TCP port 647 by default for lease synchronization between peers. This port facilitates the exchange of lease data to ensure both the primary and secondary servers maintain consistent states (e.g., NORMAL, COMMUNICATIONS-INTERRUPTED). TCP is used for reliability, as lease sync requires guaranteed delivery. The port can be changed by the administrator if needed (e.g., for firewall rules), making "user configured" accurate. Options A and B (port 1194) are incorrect-1194 is commonly associated with OpenVPN, not DHCP Failover. Option D is wrong because it's TCP, not UDP. This is a key DHCP troubleshooting topic in the INE course. References: Infoblox NIOS Administrator Guide - DHCP Failover; INE Course Content: NIOS DDI DHCP Troubleshooting.

NEW QUESTION # 56

After making a configuration change on the NIOS Grid, you are prompted to restart services. What option provides the least service disruption?

- A. Force restart on all members simultaneously
- **B. Restart if needed on all members sequentially**
- C. Force restart on GM only
- D. Restart if needed on HA members only

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation: Restarting services post-change (e.g., DNS zone update) requires minimizing downtime:

* B: "Restart if needed" checks if a restart is required per member, and "sequentially" staggers restarts (e.g., passive HA nodes first), ensuring continuous service. Least disruptive. Correct.

* A: Simultaneous force restart stops all services at once-maximum disruption. Incorrect.

* C: GM-only restart ignores other members needing updates, incomplete. Incorrect.

* D: HA members only misses single nodes or GM, partial solution. Incorrect.

* Practical Example: In an INE lab, you'd select sequential restart after a DHCP range change, monitor client connectivity, and troubleshoot minimal impact. References: Infoblox NIOS Administrator Guide - Service Restarts; INE Course Content: NIOS DDI Grid Troubleshooting.

NEW QUESTION # 57

.....

With the simulation function, our NIOS-DDI-Expert training guide is easier to understand and have more vivid explanations to help you learn more knowledge. You can set time to test your study efficiency, so that you can accomplish your test within the given time when you are in the Real NIOS-DDI-Expert Exam. Besides, you can get the real feeling of taking part in the real exam for our NIOS-DDI-Expert exam questions have the function of simulating the real exam. So that you can have a better performance when you attend the real exam.
