### WGU Information Technology Management QGC1 Sample Questions (Q130-Q135):

#### NEW QUESTION # 130

Which statement describes the analysis phase of the systems development life cycle (SDLC)?

- A. Physically constructing software and information systems using programming languages
- B. Establishing a high-level strategy and goals for an intended project
- C. Identifying end-user business requirements and refining project goals into defined functions and operations
- D. Establishing full descriptions of the desired features and operations of the system

**Answer: C**

Explanation:

\* Analysis Phase in SDLC:

\* The analysis phase involves gathering detailed requirements from stakeholders to ensure the system aligns with business needs.

\* This phase translates high-level goals into specific functions, operations, and deliverables.

\* Key Activities in the Analysis Phase:

\* Engaging stakeholders and subject-matter experts.

\* Documenting requirements in detail (e.g., user stories, use cases).

\* Identifying potential constraints and refining goals.

\* Incorrect Options Analysis:

\* A. Physically constructing software: Part of the development phase.

\* B. Desired features descriptions: Happens in the design phase.

\* D. High-level strategy: Belongs to the planning phase.

References and Documents of Information Technology Management:

\* "SDLC Analysis Phase Best Practices" (Gartner).

\* ITIL Requirement Gathering Framework (Axelos).

#### NEW QUESTION # 131

Which dashboard capability helps a business manager break down data into segments to understand it from different perspectives?

- A. Consolidation
- B. Exploration
- C. Pivot
- D. Slice-and-dice

**Answer: D**

#### NEW QUESTION # 132

Which term describes a type of computer built using environment-friendly materials and designed to save energy?

- A. Green
- B. Workstation
- C. Server
- D. Personal

**Answer: A**

#### NEW QUESTION # 133

How can a chief information officer (CIO) become a transformational leader?

- A. By overseeing non-technical business functions
- B. By prioritizing operational stability and change
- C. By driving innovation and business growth
- D. By focusing on maintaining existing systems

**Answer: C**

Explanation:

A transformational CIO goes beyond maintaining IT infrastructure and instead focuses on innovation, strategic initiatives, and enabling business growth through technology. This leadership approach involves aligning IT with business strategy, driving digital transformation, and fostering a culture of continuous improvement and adaptability.

Option A: Incorrect-operational stability is important but not transformational.

Option B: Incorrect-maintaining existing systems is reactive, not innovative.

Option C: Incorrect-non-technical business oversight is outside the CIO's IT leadership role.

Thus, the CIO becomes transformational by driving innovation and business growth.

WGU Information Technology Management - IT Leadership, section on CIO Strategic and Transformational Roles.

#### NEW QUESTION # 134

What is the focus of materials management in supply chain management?

- A. Coordinating the availability and movement of materials and products
- B. Designing production to optimize equipment placement
- C. Developing strategies to promote products in the market
- D. Eliminating the need for inventory control

**Answer: A**

Explanation:

Materials management within supply chain management focuses on coordinating the availability, flow, and movement of raw materials, components, and finished products. This ensures that production schedules are met, inventory is managed effectively, and customer deliveries are fulfilled on time.

Option A: Equipment placement is part of production design, not materials management.

Option B: Materials management includes inventory control, not eliminating it.

Option C: Marketing strategies are unrelated to supply chain material flow.

Thus, the correct focus is coordinating the availability and movement of materials and products.
