

Instant and Proven Way to Crack Cisco 100-150 Exam

P.S. Free 2025 Cisco 100-150 dumps are available on Google Drive shared by PassTorrent: <https://drive.google.com/open?id=1fbzSiwZpC8DB4DL8XpW9HgCPxw3E61QH>

The authority of Cisco 100-150 exam questions rests on its being high-quality and prepared according to the latest pattern. PassTorrent is proud to announce that our Cisco 100-150 Exam Dumps help the desiring candidates of Cisco 100-150 certification to climb the ladder of success by grabbing the Cisco Exam Questions.

There are three versions of Cisco Certified Support Technician (CCST) Networking test torrent—PDF, software on pc, and app online, the most distinctive of which is that you can install 100-150 test answers on your computer to simulate the real exam environment, without limiting the number of computers installed. Through a large number of simulation tests, you can rationally arrange your own 100-150 exam time, adjust your mentality in the examination room, find your own weak points and carry out targeted exercises. But I am so sorry to say that 100-150 Test Answers can only run on Windows operating systems and our engineers are stepping up to improve this. In fact, many people only spent 20-30 hours practicing our 100-150 guide torrent and passed the exam. This sounds incredible, but we did, helping them save a lot of time.

Cisco 100-150 Reliable Test Review & Braindumps 100-150 Pdf

Cisco Certified Support Technician (CCST) Networking Practice exams of PassTorrent i.e. desktop software and web-based are customizable and you can attempt them for multiple times. These practice exam save progress report of each attempt so you can assess it to find and overcome mistakes. As mentioned earlier, these Cisco Certified Support Technician (CCST) Networking (100-150) practice exams can be customized according to your requirements. You can change their time and numbers of Cisco Certified Support Technician (CCST) Networking (100-150) dumps questions as you want.

Cisco Certified Support Technician (CCST) Networking Sample Questions (Q34-Q39):

NEW QUESTION # 34

Select the statements that are correct about bandwidth and throughput (Choose 3).

- A. High latency reduces the bandwidth capacity.
- B. Low bandwidth can result in increased latency.
- C. Reducing latency generally increases throughput.
- D. High bandwidth ensures low latency.

Answer: A,B,C

NEW QUESTION # 35

You need to connect a computer's network adapter to a switch using a 1000BASE-T cable. Which connector should you use?

- A. RJ-11
- B. Coax
- C. OS2 LC
- D. RJ-45

Answer: D

Explanation:

- * 1000BASE-T Cable: This refers to Gigabit Ethernet over twisted-pair cables (Cat 5e or higher).
- * Connector: RJ-45 connectors are used for Ethernet cables, including those used for 1000BASE-T.
- * Coax: Used for cable TV and older Ethernet standards like 10BASE2.
- * RJ-11: Used for telephone connections.
- * OS2 LC: Used for fiber optic connections.

Reference: * Ethernet Standards and Cables: Ethernet Cable Guide

NEW QUESTION # 36

Which command will display the following output?

Image is command output that states the following:

Capability Codes: R - Router, T - Trans Bridge, B - Source Route Bridge, S - Switch, H - Host, I - IGMP,

Device ID	Local Intfrfce	Holdtme	Capability	Platform	Port ID
esxi	Gig 0/5	177	S	VMware ES	vmnic0
esxi	Gig 0/7	177	S	VMware ES	vmnic1
esxi	Gig 0/6	177	S	VMware ES	vmnic2
981888fc23a7	Gig 0/47	160	R S	Meraki MR	Port 0
3456fec1d08	Gig 0/1	178	S	MS120-8LP	Port 9"

- A. show ip interface
- B. show cdp neighbor
- C. show mac-address-table
- D. show inventory

Answer: B

Explanation:

The command that will display the output provided, which includes capability codes, local interface details, device IDs, hold times, and platform port ID capabilities, is the show cdp neighbor command. This command is used in Cisco devices to display current information about neighboring devices detected by Cisco Discovery Protocol (CDP), which includes details such as the interface through which the neighbor is connected, the type of device, and the port ID of the device1.

Reference: =

* Cisco - show cdp neighbors

The provided output is from the Cisco Discovery Protocol (CDP) neighbor table. The show cdp neighbor command displays information about directly connected Cisco devices, including Device ID, Local Interface, Holdtime, Capability, Platform, and Port ID.

* A. show mac-address-table: Displays the MAC address table on the switch.

* C. show inventory: Displays information about the hardware inventory of the device.

* D. show ip interface: Displays IP interface status and configuration.

Thus, the correct answer is B. show cdp neighbor.

Reference: =

* Cisco CDP Neighbor Command

* Understanding CDP

NEW QUESTION # 37

HOTSPOT

You plan to use a network firewall to protect computers at a small office. For each statement about firewalls, select True or False.

Note: You will receive partial credit for each correct selection.

	True	False
A firewall can direct all web traffic to a specific IP address.	☐	☐
A firewall can block traffic to specific ports on internal computers.	☐	☐
A firewall can prevent specific apps from running on a computer.	☐	☐

Answer:

Explanation:

	True	False
A firewall can direct all web traffic to a specific IP address.	☒	☐
A firewall can block traffic to specific ports on internal computers.	☒	☐
A firewall can prevent specific apps from running on a computer.	☐	☒

Explanation:

A firewall can direct all web traffic to a specific IP address.

True: Firewalls can be configured to perform Network Address Translation (NAT) and port forwarding, which can direct all web traffic (typically on port 80 and 443) to a specific internal IP address.

A firewall can block traffic to specific ports on internal computers.

True: Firewalls can be configured with access control lists (ACLs) or rules to block traffic to specific ports on internal computers, enhancing security by restricting unwanted or harmful traffic.

A firewall can prevent specific apps from running on a computer.

False: Firewalls typically control traffic flow and do not prevent specific applications from running on a computer. Application control is usually managed by endpoint security software or application control systems.

Directing Web Traffic: Firewalls can manage traffic redirection using NAT and port forwarding rules to route web traffic to designated servers or devices within the network.

Blocking Specific Ports: Firewalls can enforce security policies by blocking or allowing traffic based on port numbers, ensuring that only permitted traffic reaches internal systems.

Application Control: While firewalls manage network traffic, preventing applications from running typically requires software specifically designed for endpoint protection and application management.

NEW QUESTION # 38

A help desk technician receives the four trouble tickets listed below. Which ticket should receive the highest priority and be addressed first?

- A. Ticket 1: A user requests relocation of a printer to a different network jack in the same office. The jack must be patched and made active.
- B. Ticket 3: A user reports that response time for a cloud-based application is slower than usual.
- C. Ticket 4: Two users report that wireless access in the cafeteria has been down for the last hour.
- D. Ticket 2: An online webinar is taking place in the conference room. The video conferencing equipment lost internet access.

Answer: D

Explanation:

When prioritizing trouble tickets, the most critical issues affecting business operations or high-impact activities should be addressed first. Here's a breakdown of the tickets:

* Ticket 1: Relocation of a printer, while necessary, is not urgent and does not impact critical operations.

* Ticket 2: An ongoing webinar losing internet access is critical, especially if the webinar is time- sensitive and involves multiple participants.

* Ticket 3: Slower response time for a cloud-based application is important but typically not as urgent as a complete loss of internet access for a live event.

* Ticket 4: Wireless access down in the cafeteria affects users but does not have the same immediate impact as a live webinar losing connectivity.

Thus, the correct answer is B. Ticket 2: An online webinar is taking place in the conference room. The video conferencing equipment lost internet access.
