VMware 3V0-42.23 Exam Syllabus Topics:

Topic	Details
Topic 1	Plan and Design the VMware Solution: This section evaluates the expertise of Solution Designers and Infrastructure Architects in planning and designing VMware solutions. It includes identifying design terms, frameworks, and methodologies, understanding VMware Cloud Foundation designs, and analyzing customer requirements. Additionally, it covers conceptual, logical, and physical designs for NSX Edge clusters, logical switching, routing architectures, security features, network services, physical infrastructure design, multi-location setups with NSX Federation, and optimization using DPU-based acceleration.
Topic 2	VMware Solution: This section of the exam measures the skills of NSX Administrators and Cloud Architects in understanding NSX architecture and its components. It covers the main elements of NSX architecture, including management clusters, control planes, and data planes. It also addresses NSX Manager sizing options, cluster design decisions, and differences between enterprise and service provider NSX designs.
Topic 3	Troubleshoot and Optimize the VMware Solution: This section does not include any testable objectives. It is intended to offer insights into troubleshooting methodologies and optimization strategies for VMware environments.
Topic 4	Install, Configure, Administrate the VMware Solution: This section does not include any testable objectives. It focuses on providing a high-level understanding of installation and administrative tasks related to VMware solutions.
Topic 5	IT Architectures, Technologies, Standards: This section of the exam does not include any testable objectives. It is designed to provide foundational context for understanding VMware solutions and their alignment with IT architectures, technologies, and standards.
